PREFACE ix

CHAPTER 1. NON-ISOLATED SWITCH-MODE POWER SUPPLIES 1

1.1. Buck converters 1
1.2. Dimensioning a ferrite core inductance 5
1.3. Boost converters 7
1.4. Buck–boost converters 9

CHAPTER 2. ISOLATED CONVERTERS 19

2.1. Forward converters 19
2.2. Flyback converters 24
2.3. Dimensioning a flyback transformer 28
2.4. Dimensioning a forward transformer 33
2.5. Snubbers 35
2.5.1. Impact of transformer leakage inductance in a converter 36
2.5.2. Implementation and dimensioning of a snubber 37

CHAPTER 3. RESONANT CONVERTERS AND SOFT SWITCHING 41

3.1. Soft switching 41
3.1.1. Definitions, ZVS and ZCS switching 41
3.1.2. Resonance 42
3.2. Study of a resonant inverter 43
3.2.1. Presentation 43
3.2.2. Operating model 44
3.2.3. Impact of the operating frequency 45
3.2.4. Power behaviors at variable frequency 47
3.3. Study of the full converter 48
3.3.1. Analysis of the diode rectifier 48
3.3.2. Characteristics and control modes 51
3.3.3. Application to contactless power supplies . . 57

CHAPTER 4. CONVERTER MODELING FOR CONTROL 59

4.1. Principles 59
4.2. Continuous conduction modeling 60
4.2.1. The buck converter 61
4.2.2. The buck–boost converter 64
4.2.3. The boost converter 67
4.3. Discontinuous conduction modeling 67
4.4. PWM control modeling and global modeling for control 67
4.5. General block diagram of a voltage-regulated power supply 69

CHAPTER 5. CASE STUDY – THE FLYBACK POWER SUPPLY 71

5.1. Specification 71
5.2. Dimensioning switches 72
5.3. Calculation of passive components 76
5.3.1. Output capacitors 76
5.3.2. Coupled inductances 82
5.4. Dimensioning coupled inductances 83

5.4.1. Choice of a ferrite core 84
5.4.2. Windings 89
5.4.3. Tests and leakage measurements 92
5.5. Transistor control and snubber calculation . . . 94
5.5.1. Determining gate resistance 94
5.5.2. RCD snubber circuit 96
5.6. PWM control and regulation 96
5.6.1. PWM controller 96
5.6.2. Galvanic isolation of controls 97
5.6.3. Notes on modeling and control 99
5.6.4. Regulator tuning 100
5.6.5. Production 101
5.6.6. Simulations and experimental results 102

APPENDIX 1 111

APPENDIX 2 131
