

## Table of Contents

|   |     |
|---|-----|
| <b>Preface</b> . . . . .  | vii |
| <b>Chapter 1. Basics of Climatological and Meteorological Observations for GIS Applications</b> . . . . .                             | 1   |
| Wolfgang SCHONER  |     |
| 1.1. Data measurements and observations in climatology . . . . .  | 2   |
| 1.2. Data quality control and data homogenization in climatology . . . . .  | 12  |
| 1.3. Metadata: documenting quality and usability . . . . .  | 20  |
| 1.4. Future perspectives . . . . .  | 25  |
| 1.5. Bibliography . . . . .   | 26  |
| <b>Chapter 2. Spatial Analysis, Cartography and Climate</b> . . . . .   | 29  |
| Daniel JOLY   |     |
| 2.1. Introduction. . . . .  | 29  |
| 2.2. Geographic information necessary for interpolation . . . . .   | 32  |
| 2.3. The main interpolation methods . . . . .   | 36  |
| 2.4. Geographic information used in statistical interpolations: advantages and disadvantages. . . . .                                 | 42  |
| 2.5. Conclusion . . . . .   | 67  |
| 2.6. Bibliography . . . . .   | 69  |
| <b>Chapter 3. Geographical Information, Remote Sensing and Climatology</b> . . . . .  | 73  |
| Vincent DUBREUIL  |     |
| 3.1. Introduction. . . . .  | 73  |
| 3.2. The development phases of meteorological satellites . . . . .  | 74  |
| 3.3. Examples of how geostationary data are used in Brazil. . . . .   | 85  |
| 3.4. Examples of NOAA-AVHRR data used in Western France . . . . .   | 92  |
| 3.5. Conclusion . . . . .   | 99  |
| 3.6. Acknowledgements . . . . .   | 100 |
| 3.7. Bibliography . . . . .   | 100 |
| <b>Chapter 4. Geographical Information for the Initialization of Numerical Weather Forecast Models and Climate Modeling</b> . . . . . | 103 |
| Pierre BESSEMOULIN  |     |
| 4.1. Introduction. . . . .  | 103 |
| 4.2. Brief description of the climate system . . . . .  | 103 |
| 4.3. Brief overview of numerical weather forecast models . . . . .  | 107 |

|  |            |
|--|------------|
| 4.4. Role and description of the Earth's surface . . . . .   | 111        |
| 4.5. Description of surface parameters used in a forecast model . . . . .  | 119        |
| 4.6. Bibliography . . . . .  | 123        |
| <b>Chapter 5. Assessing and Modeling the Urban Climate in Lisbon . . . . .</b>                                   | <b>125</b> |
| Maria João ALCOFORADO  |            |
| 5.1. Introduction . . . . .  | 125        |
| 5.2. Historical evolution of urban climate studies . . . . .   | 126        |
| 5.3. Spatial scales . . . . .  | 127        |
| 5.4. Climatic modifications induced by settlements . . . . .   | 128        |
| 5.5. Urban climate monitoring methods . . . . .  | 130        |
| 5.6. Modeling . . . . .  | 134        |
| 5.7. Modeling Lisbon's urban climate at the mesoscale . . . . .  | 135        |
| 5.8. Modeling Lisbon's urban climate at the microscale<br>(Telheiras city-district) . . . . .                    | 144        |
| 5.9. Conclusion . . . . .  | 152        |
| 5.10. Acknowledgements . . . . .   | 153        |
| 5.11. Bibliography . . . . .   | 154        |
| <b>Chapter 6. Geographical Information, Climate and Atmospheric Pollution . . . . .</b>                          | <b>159</b> |
| Isabelle ROUSSEL   |            |
| 6.1. Introduction . . . . .  | 159        |
| 6.2. Peak pollution periods and alerts: pollution and climate paroxysm . . . . .                                 | 161        |
| 6.3. LAURE and territory age . . . . .   | 171        |
| 6.4. The geography of science and action . . . . .   | 180        |
| 6.5. Conclusion . . . . .  | 190        |
| 6.6. Bibliography . . . . .  | 191        |
| <b>Chapter 7. Geographical Information and Climatology for Hydrology . . . . .</b>                               | <b>195</b> |
| Jean-Pierre LABORDE  |            |
| 7.1. Hydrological problems of today's society . . . . .  | 195        |
| 7.2. Pluviometry: a spatially continuous piece of geographical information . . . . .                             | 200        |
| 7.3. The problems associated with recording rainfall and<br>average spatial rainfall . . . . .                   | 218        |
| 7.4. Conclusion . . . . .  | 228        |
| 7.5. Bibliography . . . . .  | 229        |
| <b>Chapter 8. Geographical Information, Climatology and Forest Fires . . . . .</b>                               | <b>233</b> |
| Pierre CARREGA   |            |
| 8.1. Forest fires: associated risks and individual components . . . . .  | 233        |
| 8.2. The influence that different climate and weather factors have<br>on forest fires: the indexes . . . . .     | 238        |
| 8.3. Using geographic information to work out the meteorological risks<br>associated with forest fires . . . . . | 246        |
| 8.4. Conclusion . . . . .  | 267        |
| 8.5. Bibliography . . . . .  | 269        |
| <b>List of Authors . . . . .</b>   | <b>271</b> |
| <b>Index . . . . .</b>   | <b>273</b> |
