<b>FOREWORD</b> . . . . .	xi
<b>CHAPTER 1. MARINE ECOSYSTEMS UNDER TOXIC PRESSURE</b> . . . . .	1
Véronique LOIZEAU and Marie-Hélène TUSSEAU-VUILLEMIN	
1.1. Introduction . . . . .	1
1.2. Details of the marine environment . . . . .	3
1.2.1. The coastal zone . . . . .	4
1.2.2. The open ocean. . . . .	6
1.3. What is the biological response of organisms to contaminants? . . . . .	9
1.3.1. At cellular level . . . . .	10
1.3.2. On an individual level. . . . .	13
1.3.3. On the level of the population . . . . .	16
1.4. Consequences of toxic pressure on ecosystems . . . . .	18
1.4.1. Interspecies relationships . . . . .	19
1.4.2. Contamination and impact on genetic diversity . . . . .	25
1.4.3. Host–parasite interactions . . . . .	27
1.4.4. Resilience and resistance . . . . .	28
1.5. Indirect effects and multiple stress factors . . . . .	33
1.5.1. Impact on the future of contaminants. . . . .	34
1.5.2. Effects of contaminants and climate change on different organization levels of life forms. . . . .	35

1.6. Conclusion . . . . .	38
1.7. Bibliography . . . . .	41
<b>CHAPTER 2. VULNERABILITY AND RESILIENCE OF ESTUARIES TO CONTAMINATION BY ANTIBIOTICS AND ANTIBIOTIC-RESISTANT BACTERIA: A CHALLENGE FOR THE NEXT DECADE . . . . .</b>	<b>65</b>
Fabienne PETIT, Thierry BERTHE, H��l��ne BUDZINSKI, Roland LECLERCQ, Vincent CATTOIR, Antoine ANDREMONT, Kenny OBERL��, Annet LAVERMAN, Erick DENAMUR	
2.1. Why does the ecosystem matter for human health in the emergence of antibiotic resistance. . . . .	65
2.2. Bacterial antibiotic resistance: a global ecological process . . . . .	67
2.3. Fate of contamination by antibiotics and antibiotic-resistant bacteria in estuary environments: Seine Estuary case study . . . . .	69
2.3.1. The Seine Estuary: one of the most anthropized estuaries in Europe . . . . .	69
2.3.2. The fate of contamination by antibiotics, from the sources of contamination to the estuary . . . . .	70
2.3.3. Occurrence of antibiotic- resistant <i>Escherichia coli</i> and <i>Enterococcus</i> in the Seine estuary . . . . .	78
2.4. Estuary sediments: a vulnerable environment? . . . . .	83
2.4.1. The resistome in estuary sediments . . . . .	83
2.4.2. Impact of contamination by antibiotics on the functional microbial community of sediments . . . . .	83
2.5. Vulnerability and resilience in the estuary environment. . . . .	84
2.6. Acknowledgments . . . . .	86
2.7. Bibliography . . . . .	86
<b>CHAPTER 3. MICROBIOLOGICAL COASTAL RISKS AND MONITORING SYSTEMS. . . . .</b>	<b>95</b>
Patrick MONFORT, Serge MORAND and Murielle LAFAYE	
3.1. Introduction . . . . .	95

3.2. Risks and infectious diseases linked to coastal regions . . . . .	96
3.2.1. Pathogenic agents . . . . .	97
3.2.2. Environmental change and modifications in the epidemiological environment . . . . .	101
3.2.3. The consequences in terms of new infectious risks . . . . .	103
3.2.4. Emergence: cases of human pathogenic vibrios . . . . .	103
3.3. Monitoring of key environmental parameters . . . . .	107
3.3.1. Systems of measurement in situ . . . . .	108
3.3.2. Measurement systems by satellite . . . . .	110
3.3.3. Some ideas to bear in mind. . . . .	113
3.4. Toward remote monitoring systems and early warning systems applied to the remote monitoring of vibrios and algae . . . . .	114
3.4.1. Understanding the effect of global change. . . . .	114
3.4.2. “Remote sensing” approach . . . . .	115
3.4.3. Application of remote monitoring to vibrios . . . . .	117
3.4.4. Application of remote monitoring to cyanobacteria . . . . .	119
3.4.5. Integration of models in the monitoring and alert systems . . . . .	122
3.5. Acknowledgments . . . . .	123
3.6. Bibliography. . . . .	123
<b>CHAPTER 4. VULNERABILITY, IMPACTS AND ADAPTATION OF COASTAL ZONES TO GLOBAL CHANGE . . . . .</b>	<b>131</b>
Filipe DUARTE SANTOS	
4.1. Introduction . . . . .	131
4.1.1. The coastal zones . . . . .	131
4.1.2. Global change . . . . .	132
4.2. Coastal zones and global systemic and cumulative changes. . . . .	134
4.3. The impact of climate change on coastal zones . . . . .	136
4.3.1. Socio-economic and climate scenarios . . . . .	136

---

4.3.2. Impacts of climate change on coastal zones on different time scales . . . . .	138
4.3.3. The rise of the global mean sea level – observations and projections . . . . .	141
4.3.4. Other impacts of climate factors on coastal zones . . . . .	150
4.4. Impacts of cumulative global changes on coastal zones . . . . .	156
4.5. Vulnerabilities of humans and natural coastal systems . . . . .	157
4.6. The adaptation of coastal zones to environmental changes . . . . .	158
4.6.1. Options and strategies for adaptation . . . . .	158
4.6.2. Systems for analyzing institutional and government decisions . . . . .	162
4.6.3. Adaptation in practice . . . . .	163
4.6.4. The costs of adaptation . . . . .	165
4.7. Bibliography . . . . .	168
<b>CHAPTER 5. THE SHORELINE BETWEEN NATURE AND SOCIETY, A CHANGING HERITAGE . . . . .</b>	<b>173</b>
Alain MIOSSEC	
5.1. Introduction: the coastal “heritage”, a new concept . . . . .	173
5.2. Coastal dynamics . . . . .	176
5.2.1. The morphogenic coastal system . . . . .	176
5.2.2. Marine submersion . . . . .	181
5.3. Anthropogenic pressures: coastlines in the face of human pressures . . . . .	188
5.3.1. Demographic growth expresses the increasing attraction of coasts . . . . .	188
5.3.2. From resource use to competing human activities . . . . .	191
5.3.3. The modernization of fishing and its effects on the oceans . . . . .	191
5.3.4. The rise in coastal tourism and its effects on coastlines . . . . .	192
5.3.5. The sediment deficit and the growing demand for sediments with its effects on coastlines and the foreshore . . . . .	193

5.3.6. The globalization of trade and its effects on coastlines . . . . .	196
5.3.7 ...as a transition. . . . .	198
5.4. Management models for the protection of coastlines . . . . .	200
5.4.1. The stages of the realization . . . . .	200
5.4.2. The implementation of the Coastal Zone Management Act in the United States. . . . .	201
5.4.3. The slow development of a centralized concept of coastal planning . . . . .	203
5.4.4. The emergence of a policy of integrated coastal management, from the global down to the local levels (and vice versa) . . . . .	205
5.5. Conclusion. . . . .	219
5.6. Bibliography. . . . .	220

**CHAPTER 6. FROM VULNERABILITY TO ADAPTATION TO CLIMATE CHANGE: FOOD FOR THOUGHTS IN SOCIAL SCIENCES . . . . . 223**  
 Alexandre MAGNAN

6.1. Introduction . . . . .	223
6.2. Around the concept of vulnerability . . . . .	225
6.2.1. The development of vulnerability concepts . . . . .	226
6.2.2. Hazard, place and vulnerability . . . . .	229
6.3. Toward a global and systematic approach to climate change vulnerability . . . . .	237
6.3.1. From vulnerability to general environmental changes . . . . .	237
6.3.2. The six broad factors affecting vulnerability . . . . .	241
6.4. From vulnerability to adaptation: theoretical framework . . . . .	248
6.4.1. The dynamic relationships between vulnerability and adaptation . . . . .	248
6.4.2. Adaptation, a three-dimensional concept (process, state and strategy) . . . . .	250
6.4.3. Thinking in terms of pathways toward adaptation . . . . .	252

6.5. The action framework: thinking of adaptation as being at the crossroads of anticipation and resilience . . . . .	253
6.5.1. Anticipating for adaptation . . . . .	254
6.5.2. Remaining or becoming resilient . . . . .	255
6.5.3. The overlap between anticipation and resilience . . . . .	256
6.6. Conclusion . . . . .	257
6.7. Bibliography . . . . .	259
<b>CHAPTER 7. ANTHROPOLOGICAL APPROACH TO VULNERABILITY AND MAJOR HAZARDS . . . . .</b>	<b>263</b>
Yoann MOREAU	
7.1. General introduction . . . . .	263
7.2. Definitions: “environment and milieu” and “risk and danger” . . . . .	264
7.3. Ambrym 1913 . . . . .	269
7.3.1. The point of view of the settlers . . . . .	270
7.3.2. The native point of view . . . . .	272
7.3.3. The asymmetry of the interpretations . . . . .	274
7.3.4. What makes a catastrophe? . . . . .	276
7.4. Edo, 1855 . . . . .	279
7.4.1. Destruction of governmental infrastructures and granaries . . . . .	280
7.4.2. Incooperating the rise of globalization . . . . .	284
7.4.3. Victims and profit-makers . . . . .	286
7.4.4. Tears and laughter . . . . .	287
7.4.5. Synthesis . . . . .	288
7.4.6. Conclusion: the fundamental ambivalence of catastrophes . . . . .	289
7.4.7. An analytical tool: the ideogram of a catastrophe . . . . .	294
7.4.8. Example . . . . .	295
7.5. Tsunami or tidal wave? . . . . .	297
7.6. Conclusion . . . . .	301
7.7. Bibliography . . . . .	303
<b>LIST OF AUTHORS . . . . .</b>	<b>307</b>
<b>INDEX . . . . .</b>	<b>309</b>
