

Table of Contents

| | |
|--|----|
| Preface | ix |
| Chapter 1. Respiration and Pulmonary Initiation | 1 |
| 1.1. The rib cage. | 2 |
| 1.2. Lungs | 3 |
| 1.3. Normal respiration. | 5 |
| 1.3.1. Inhalation. | 5 |
| 1.3.2. Exhalation | 5 |
| 1.4. Respiration muscles | 5 |
| 1.4.1. Inhalation muscles | 6 |
| 1.4.2. Exhalation muscles | 7 |
| 1.5. Pulmonary capacity and pulmonary volume | 10 |
| 1.6. Respiration in phonation | 11 |
| 1.6.1. The respiratory cycle. | 11 |
| 1.6.2. Control of exhalation. | 13 |
| 1.6.3. Subglottal pressure | 16 |
| 1.6.4. Subglottal pressure and stress. | 20 |
| Chapter 2. Phonation and the Larynx | 23 |
| 2.1. The larynx | 23 |
| 2.1.1. External configuration of the larynx | 24 |
| 2.1.2. Internal configuration | 26 |
| 2.2. The laryngeal cartilages | 30 |
| 2.2.1. The cricoid cartilage | 30 |
| 2.2.2. The thyroid cartilage | 31 |
| 2.2.3. The arytenoid cartilages | 31 |
| 2.2.4. The epiglottic cartilage. | 32 |
| 2.3. Joints and ligaments | 32 |
| 2.3.1. Intrinsic joints and ligaments | 32 |

| | |
|---|-----------|
| 2.3.2. The membranes and the extrinsic ligaments | 34 |
| 2.4. The larynx muscles | 35 |
| 2.4.1. The intrinsic muscles | 35 |
| 2.4.2. The extrinsic muscles | 42 |
| 2.5. Innervation of the larynx | 50 |
| 2.6. The mucous membrane of the larynx | 50 |
| 2.7. Phonation | 50 |
| 2.7.1. Opening and closing of the glottis | 51 |
| 2.7.2. Vocal fold vibration | 52 |
| 2.7.3. Voice registers | 56 |
| 2.7.4. Head voice? | 57 |
| 2.7.5. Efficiency of the vocal generator | 58 |
| 2.7.6. The evaluation of phonation: voice quality | 59 |
| 2.8. The linguistic functions of laryngeal activity | 59 |
| 2.8.1. Glottal states and phonation types | 59 |
| 2.8.2. Tone and intonation | 63 |
| 2.8.3. Glottal articulation | 63 |
| 2.9. Phonetic features | 63 |
| Chapter 3. Articulation: Pharynx and Mouth | 65 |
| 3.1. The oral cavity | 66 |
| 3.1.1. The tongue | 67 |
| 3.1.2. Tongue control | 75 |
| 3.2. The pharynx | 77 |
| 3.2.1. The rhino-pharynx | 78 |
| 3.2.2. The hypopharynx and the oropharynx | 83 |
| 3.2.3. The role of the pharynx in speech | 88 |
| Chapter 4. Articulation: The Labio-Mandibular System | 97 |
| 4.1. The lips: anatomical and functional description | 98 |
| 4.1.1. Lip closure | 99 |
| 4.1.2. Lip protrusion | 99 |
| 4.1.3. Lip rounding | 99 |
| 4.1.4. Raising the upper lip | 100 |
| 4.1.5. Lowering the lower lip | 100 |
| 4.1.6. Lip spreading | 101 |
| 4.1.7. Lowering the corners of the mouth | 101 |
| 4.1.8. Raising the corners of the mouth | 104 |
| 4.2. The jaw | 106 |
| 4.2.1. Muscles of the lower jaw | 106 |
| 4.2.2. The suprahyoid muscles | 109 |
| 4.3. Linguistic functions of lip movement | 110 |
| 4.3.1. Vowels | 110 |

| | |
|---|------------|
| 4.3.2. Consonants | 111 |
| 4.4. Motor coordination between the lips and the lower jaw | 114 |
| Chapter 5. Elements of Articulatory Typology | 117 |
| 5.1. Aerodynamic mechanisms | 117 |
| 5.1.1. Pulmonary initiation | 117 |
| 5.1.2. The larynx | 119 |
| 5.1.3. The supralaryngeal articulators | 119 |
| 5.2. Phonatory modes | 121 |
| 5.2.1. Voicing or modal voice | 122 |
| 5.2.2. Voicelessness | 122 |
| 5.2.3. Breathy mode | 122 |
| 5.2.4. The murmur | 124 |
| 5.2.5. Laryngealization or “creaky” mode | 124 |
| 5.2.6. Whisper mode | 125 |
| 5.2.7. Glottal closure | 125 |
| 5.3. Articulation | 125 |
| 5.3.1. The dimensions of the articulatory description of speech sounds | 125 |
| Chapter 6. The Articulatory Description of Vowels and Consonants | 133 |
| 6.1. Vowels | 134 |
| 6.1.1. Mode | 134 |
| 6.1.2. Articulatory region/zone | 135 |
| 6.1.3. Vocalic aperture | 135 |
| 6.1.4. The vowel space: cardinal vowels | 136 |
| 6.1.5. The temporal dimension | 137 |
| 6.1.6. Dynamic aspects | 138 |
| 6.1.7. Secondary articulation | 140 |
| 6.1.8. Tension | 140 |
| 6.2. Consonants | 141 |
| 6.2.1. Articulation mode | 141 |
| 6.2.2. Description of consonantal articulations | 142 |
| Chapter 7. Coarticulation and Co-production | 153 |
| 7.1. Translation models | 155 |
| 7.1.1. From plan to execution | 157 |
| 7.1.2. Feature spreading | 157 |
| 7.1.3. Limits to translation theories | 159 |
| 7.2. Action models | 161 |
| 7.2.1. Control of coordinated movement | 162 |
| 7.2.2. Degrees of freedom | 163 |
| 7.2.3. Coordinative structures | 164 |
| 7.3. Towards a direct theory of speech production | 165 |

| | |
|--|-----|
| 7.3.1. The coordinative structures of speech | 167 |
| 7.3.2. The supervisory system | 170 |
| 7.4. The nature of coarticulation phenomena | 173 |
| 7.4.1. The allophone as phonetic entity | 173 |
| 7.4.2. The allophone as phonological entity | 173 |
| 7.4.3. Coarticulation: a redundant concept? | 174 |
| 7.4.4. Criteria for evaluating a model of coarticulation | 176 |
| 7.5. Interpretation of coarticulation phenomena | 177 |
| 7.6. Conclusion | 177 |
| Bibliography | 179 |
| Index | 209 |
