INTRODUCTION	ix
CHAPTER 1. SKIN FRICTION LINES PATTERN AND CRITICAL POINTS	1
1.1. Basic properties of the three-dimensional boundary layer	1
1.2. Skin friction lines and surface flow pattern . . .	5
1.3. Critical points of the skin friction line pattern.	8
1.3.1. General solution and the eigenvalue problem.	8
1.3.2. The different critical points	14
1.4. Critical points of the wall vorticity lines	24
CHAPTER 2. SEPARATION STREAMSURFACES AND VORTEX STRUCTURES	27
2.1. Generalization to the flow field and three-dimensional critical points.	27
2.2. Separation and attachment lines	32
2.3. Streamsurfaces of separation and attachment . .	36
2.4. Vortical structures.	40
2.5. Some properties of a vortical structure	42

CHAPTER 3. SEPARATED FLOW ON A BODY	47
3.1. Basic rules and definitions	47
3.2. General definition: the basic separated structures	49
3.3. Field associated with a separation with one saddle point and three nodes: the horseshoe vortex	56
3.4. Field associated with a separation with one point and two foci: the tornado-like vortex	62
 CHAPTER 4. VORTEX WAKE OF WINGS AND SLENDER BODIES.	 69
4.1. Vortical structures over a delta wing	69
4.2. Vortical flow over a slender body	77
4.3. Vortex wake of a classical wing	82
4.3.1. Topological description	82
4.3.2. A scenario for the origin of vortices on a wing	88
 CHAPTER 5. SEPARATION INDUCED BY AN OBSTACLE OR A BLUNT BODY.	 91
5.1. Separation in front of an obstacle	91
5.2. Flow induced by an obstacle of finite height or protuberance	97
5.3. Separation on a non-propelled afterbody	103
5.4. The flow past an automobile	110
5.4.1. The surface flow pattern	110
5.4.2. Separation surfaces	116
 CHAPTER 6. RECONSIDERATION OF THE TWO-DIMENSIONAL SEPARATION.	 121
6.1. Some definitions: a reminder	121
6.2. Two-dimensional separation	123
6.3. Special critical points	123

6.4. Three-dimensional structure of a two-dimensional separated flow	131
6.5. Axisymmetric afterbody	136
CHAPTER 7. CONCLUDING REMARKS	143
BIBLIOGRAPHY	147
LIST OF SYMBOLS	151
INDEX	153
