INTRODUCTION	ix
CHAPTER 1. CONTENT DISTRIBUTION ON THE INTERNET	1
1.1. End-to-end concept and limitations	2
1.2. Multicast communication	4
1.3. Peer-to-peer systems	5
1.4. Content distribution networks	6
1.5. Publish/subscribe systems	9
CHAPTER 2. INFORMATION-CENTRIC NETWORKS	13
2.1. Content naming	13
2.1.1. Flat naming	14
2.1.2. Hierarchical naming	16
2.1.3. Attribute-based names	17
2.2. Content or name-based routing	18
2.2.1. Non-hierarchical routing	19
2.2.2. Hierarchical routing	20
2.3. Content caching	22

CHAPTER 3. MAIN ICN ARCHITECTURES	23
3.1. Content-based networking/combined broadcast and content-based	23
3.2. Data-oriented network architecture	26
3.3. Content-centric networking/named-data networking	29
3.4. Publish-subscribe Internet routing paradigm/ publish-subscribe Internet technologies	33
3.5. Content-centric inter-network architecture	37
3.6. Other architectures	40
3.7. General comparison	41
CHAPTER 4. CHALLENGES	43
4.1. Naming	43
4.2. Routing	52
4.3. Caching	58
4.3.1. Analytical models for networks of caches	60
4.3.2. Content replacement policies	62
4.3.3. Content storage policies	65
4.4. Security	69
4.5. Mobility support in ICN	73
4.6. Applications	78
4.6.1. Real-time applications	78
4.6.2. Vehicular networks	80
4.6.3. Autonomous driving	81
4.6.4. Other applications	82
CHAPTER 5. PRACTICAL ISSUES	83
5.1. Economic models	83
5.2. Content routers	88
CONCLUSION	97

ACKNOWLEDGMENT	99
