<b>Preface</b> . . . . .	ix
<b>Part 1. Fatigue of Textile Composites</b> . . . . .	1
<b>Chapter 1. Fatigue Behavior and Damage Evolution of 2D and 3D Textile-Reinforced Composites</b> . . . . .	3
1.1. Introduction . . . . .	3
1.2. Experimental methodologies . . . . .	5
1.3. Fatigue behavior and damage evolution in 2D E-glass plain weave textile-reinforced epoxy composite . . . . .	9
1.3.1. Quasi-static tensile behavior and damage observation . . . . .	10
1.3.2. Fatigue life and damage metrics . . . . .	15
1.3.3. Fatigue damage observation and evolution . . . . .	18
1.3.4. Postfatigue mechanical properties and damage observation . . . . .	21
1.4. Fatigue behavior and damage evolution in single-ply non-crimp 3D orthogonal weave E-glass reinforced epoxy composite . . . . .	24
1.4.1. Quasi-static tensile behavior and damage observation . . . . .	26
1.4.2. Fatigue life and damage metrics . . . . .	34
1.4.3. Fatigue damage observation and evolution . . . . .	40
1.4.4. Postfatigue mechanical properties and damage observation . . . . .	44

1.5. Fatigue behavior and damage evolution in 3D rotary braided carbon reinforced epoxy composite . . . . .	49
1.5.1. Quasi-static tensile behavior and damage observation . . . . .	51
1.5.2. Fatigue life and damage metrics . . . . .	55
1.5.3. Fatigue damage observation and evolution . . . . .	58
1.5.4. Postfatigue mechanical properties . . . . .	60
1.6. Fatigue behavior and damage evolution in non-crimp stitched and unstitched carbon reinforced epoxy composite . . . . .	63
1.6.1. Quasi-static tensile behavior . . . . .	64
1.6.2. Fatigue life and damage metrics . . . . .	67
1.6.3. Fatigue damage observation and evolution . . . . .	71
1.6.4. Postfatigue mechanical properties . . . . .	73
1.7. Remarks and perspectives . . . . .	78
1.8. Bibliography . . . . .	80
<b>Chapter 2. Fatigue Limit: A Link to Quasi-Static Damage?</b> . . . . .	87
2.1. Fatigue limit . . . . .	87
2.2. Damage development stages and load thresholds for quasi-static tension . . . . .	90
2.3. Damage development in quasi-static tension and in the progression of fatigue loading . . . . .	93
2.4. Experimental data on the fatigue limit and the quasi-static damage thresholds for textile composites. . . . .	96
2.4.1. Fatigue limit for glass fiber reinforced composites. . . . .	98
2.4.2. Fatigue limit for carbon fiber reinforced composites. . . . .	100
2.5. Summary and conclusion on the fatigue life limit . . . . .	102
2.6. Bibliography . . . . .	104
<b>Part 2. Fatigue of Short Fiber Reinforced Composites</b> . . . . .	107
<b>Chapter 3. Experimental Observations of Fatigue of Short Fiber Reinforced Composites.</b> . . . . .	109
3.1. Injection molded SFRC . . . . .	110
3.2. SN curve behavior of SFRC . . . . .	113
3.2.1. Fiber-based parameters . . . . .	115

3.2.2. Loading-based parameters . . . . .	121
3.2.3. Environmental effects . . . . .	123
3.2.4. Specimen configurations . . . . .	125
3.3. Loss of stiffness . . . . .	127
3.3.1. Collection of loss of stiffness data . . . . .	131
3.3.2. Comparison of the loss of stiffness curves . . . . .	133
3.4. Future outlook and modeling strategy . . . . .	136
3.5. Bibliography . . . . .	137
<b>Chapter 4. Fatigue Modeling of SFRC: A Master SN Curve Approach . . . . .</b>	<b>145</b>
4.1. Overall framework and modeling strategy . . . . .	145
4.2. Choice of a mean field homogenization method . . . . .	151
4.2.1. Benchmarking of schemes with full FE solution . . . . .	153
4.3. Damage modeling . . . . .	157
4.3.1. Fiber–matrix debonding: equivalent bonded inclusion approach . . . . .	159
4.3.2. Matrix damage . . . . .	163
4.3.3. Validation . . . . .	163
4.4. MSNC approach . . . . .	165
4.4.1. Scaling of SN curves using the endurance limit . . . . .	166
4.4.2. MSNC approach . . . . .	168
4.4.3. Validation . . . . .	173
4.4.4. Comparison of the MSNC scheme with other schemes . . . . .	177
4.5. Component-level simulations . . . . .	181
4.6. Conclusions and future outlook . . . . .	184
4.7. Bibliography . . . . .	185
<b>Index . . . . .</b>	<b>195</b>
