

# Table of Contents

<b>Preface</b> . . . . .	ix
<b>Chapter 1. What We Measure and What We Process.</b> . . . . .	1
1.1. The quantities we want to know. . . . .	1
1.1.1. Velocity and density . . . . .	2
1.1.2. Pressure and depth . . . . .	6
1.1.3. Speed and movement. . . . .	8
1.1.4. Time and space . . . . .	9
1.2. Linking of essential quantities in oceanography . . . . .	10
1.2.1. Temperature . . . . .	11
1.2.2. Pressure. . . . .	20
1.2.3. Conductivity and salinity . . . . .	22
1.2.4. Velocity . . . . .	33
1.2.5. Time . . . . .	38
1.3. Calculation of density. . . . .	42
1.3.1. Density and EOS-80 . . . . .	42
1.3.2. Laboratory densitometers . . . . .	45
1.3.3. Density and absolute salinity . . . . .	46
1.4. Bibliography . . . . .	48
1.4.1. Quantities that we want to know . . . . .	48
1.4.2. Linking of essential quantities in oceanography . . . . .	49
<b>Chapter 2. Measurement Systems in Practice.</b> . . . . .	55
2.1. Determining temperature. . . . .	55
2.1.1. Principal instruments. . . . .	56
2.1.2. Sensor technologies . . . . .	63
2.1.3. Thermal transfers . . . . .	78
2.1.4. Response time of temperature sensors. . . . .	83

2.1.5. Viscous heating of temperature sensors . . . . .	88
2.2. Determining conductivity . . . . .	89
2.2.1. Principle instruments used . . . . .	89
2.2.2. Sensors' technologies . . . . .	90
2.2.3. Response time of conductivity sensors . . . . .	102
2.2.4. Aligning the response times of temperature and conductivity sensors and correcting thermal inertia . . . . .	105
2.2.5. Biofouling and protection of instruments . . . . .	108
2.3. Determining pressure . . . . .	111
2.3.1. Piezoresistive pressure sensors . . . . .	111
2.3.2. Piezoelectric pressure sensors . . . . .	113
2.3.3. Errors in pressure sensor measurements . . . . .	115
2.4. Determining velocity . . . . .	116
2.4.1. Principles of measurement . . . . .	116
2.4.2. Instruments used at sea . . . . .	123
2.5. Determining current . . . . .	125
2.5.1. Rotor current meters . . . . .	125
2.5.2. Doppler effect current meters . . . . .	129
2.5.3. Electromagnetic current meters . . . . .	138
2.5.4. Doppler effect profilers . . . . .	140
2.5.5. Directional referencing of current measurements . . . . .	151
2.5.6. Calibration of Doppler effect current meters . . . . .	161
2.6. Determining time or measuring frequency . . . . .	163
2.6.1. The connection of clocks . . . . .	164
2.6.2. Time bases of instruments . . . . .	166
2.7. Determining position and movement . . . . .	171
2.7.1. The Argos system . . . . .	171
2.7.2. The global positioning system . . . . .	178
2.8. Determining the height of water . . . . .	190
2.8.1. Tide gauges . . . . .	191
2.8.2. Tide gauges with pressure sensors . . . . .	199
2.8.3. Keying and uniting of tide gauges . . . . .	202
2.9. Determining waves and swell characteristics . . . . .	203
2.9.1. Factors relating to the origins and modeling of swell . . . . .	203
2.9.2. Instruments used to measure the state of the sea . . . . .	207
2.10. Determining the turbidity or sea water's optical properties . . . . .	220
2.10.1. Theoretical notions of the optical properties of sea water . . . . .	221
2.10.2. Measurement of apparent optical properties . . . . .	226
2.10.3. Transmissiometers and measurements of absorption . . . . .	228
2.10.4. Nephelometers and turbidity sensors . . . . .	232
2.10.5. Fluorimeters . . . . .	236
2.11. Determining various physicochemical properties . . . . .	245
2.11.1. Notions of the chemical parameters of sea water . . . . .	245

2.11.2. In situ measurement of dissolved oxygen . . . . .	254
2.11.3. In situ measurement of dissolved carbon . . . . .	264
2.11.4. In situ measurement of some other components . . . . .	269
2.12. Bibliography and further reading . . . . .	277
2.12.1. Measuring temperature . . . . .	277
2.12.2. Measuring conductivity . . . . .	279
2.12.3. Measuring pressure . . . . .	281
2.12.4. Measuring velocity . . . . .	281
2.12.5. Measuring current . . . . .	281
2.12.6. Measuring time and frequencies . . . . .	283
2.12.7. Measuring distance . . . . .	284
2.12.8. Measuring sea level . . . . .	285
2.12.9. Measuring state of sea . . . . .	285
2.12.10. Measuring turbidity and optical properties of sea water. . . . .	288
2.12.11. Measuring chemical parameters. . . . .	289
<b>Chapter 3. Measurements at Sea . . . . .</b>	<b>295</b>
3.1. Oceanographic vessels . . . . .	295
3.1.1. Ways of launching instruments into the water . . . . .	296
3.1.2. Ways of positioning and probing. . . . .	298
3.1.3. Ways to transmit data . . . . .	303
3.1.4. Ways to make oceanographic measurements by boat. . . . .	306
3.2. Moorings . . . . .	309
3.2.1. Constraints of mooring implementation. . . . .	309
3.2.2. Generalities on the implementation of moorings . . . . .	310
3.2.3. Deployment and recovery of moorings . . . . .	325
3.3. Drifters . . . . .	326
3.3.1. History and operating principles . . . . .	326
3.3.2. The concept and evolution of the Argo program . . . . .	328
3.3.3. Principles for positioning by acoustic sources . . . . .	332
3.3.4. Design and ballasting of drifters . . . . .	336
3.4. Instrumented buoys and underwater platforms . . . . .	342
3.4.1. Instrumented buoys. . . . .	342
3.4.2. Underwater platforms . . . . .	344
3.5. Bibliography . . . . .	347
3.5.1. Oceanographic vessels. . . . .	347
3.5.2. Moorings and anchored floats . . . . .	348
3.5.3. Drifting floats . . . . .	349
3.5.4. Buoys and instrumented platforms. . . . .	351
<b>Chapter 4. Evolutions and other Measurement Concepts . . . . .</b>	<b>353</b>
4.1. Other processes for measuring salinity and density . . . . .	353

viii Instrumentation and Metrology in Oceanography

4.1.1. Relationship between density and refractive index . . . . .	354
4.1.2. Measurement instruments of the refractive index . . . . .	357
4.2. Acoustic tomography of oceans and acoustic measurements. . . . .	362
4.2.1. General principles . . . . .	362
4.2.2. The instrumentation used . . . . .	365
4.3. The unmanned underwater vehicle: a new means for ocean exploration . . . . .	367
4.3.1. Energetic autonomy . . . . .	369
4.3.2. ROV and AUV displacement and positioning . . . . .	371
4.3.3. Autonomy in decision-making and communication. . . . .	373
4.3.4. Gliders . . . . .	374
4.4. Bibliography . . . . .	377
4.4.1. Other processes for measuring salinity and density . . . . .	377
4.4.2. Acoustic tomography of oceans and acoustic measurements . . . . .	378
4.4.3. The UUV: new means for ocean exploration. . . . .	379
<b>Acronyms and Abbreviations</b> . . . . .	<b>381</b>
<b>Index</b> . . . . .	<b>387</b>
