| FOREWORD | ix |
| CHAPTER 1. FISHING IN THE MEDITERRANEAN, PAST AND PRESENT: HISTORY AND TECHNICAL CHANGES | 1 |
| Daniel FAGET and Jacques SACCHI | |
| 1.1. Mediterranean fishing of the past (18th Century) | 2 |
| 1.1.1. Brotherhoods and prud'homies: old forms of regulation of the fishing world | 2 |
| 1.1.2. Plural communities | 4 |
| 1.1.3. Diversity of traditional techniques in the Mediterranean | 6 |
| 1.1.4. Speculative fishing: the madrague | 10 |
| 1.1.5. A highly varied consumption, reflective of relative shortages | 11 |
| 1.2. Evolving practices (18–19th Centuries). | 12 |
| 1.2.1. The evolving world of fishing: human migration and technical changes | 13 |
| 1.2.2. Between the thought of decline and fragility of the environment | 15 |
| 1.2.3. Aquaculture, or the dream of a domesticated sea (1850–1900) | 19 |
| 1.2.4. Rationalizing the fishing industry in the Mediterranean: the rise of “applied zoology” (1880–1914) | 20 |

| | |
|---|-----------|
| 1.3. Industrial power at the service of fisheries (end of 19th–20th Century) | 22 |
| 1.3.1. The industrialization of Mediterranean fishing | 24 |
| 1.3.2. Seine fishing | 25 |
| 1.3.3. Trawl fishing | 31 |
| 1.4. Fishermen today in the Mediterranean | 36 |
| 1.4.1. The role of fishing in the consumption of sea products | 38 |
| 1.4.2. Diagnosis, fragility and over-exploitation | 40 |
| 1.4.3. State of the resource and the environment | 42 |
| 1.4.4. Ecosystem approach of fisheries and governance | 43 |
| 1.4.5. Institutions | 45 |
| 1.4.6. Seeking to promote the value of seas | 46 |
| 1.4.7. Education, raising awareness and labeling: the fishermen, agents of a sustainable exploitation of the environment | 48 |
| 1.4.8. The necessary consideration of the patrimonial dimension of artisanal fishing | 49 |
| 1.5. Bibliography | 50 |
| CHAPTER 2. MICROALGAE AND BIOTECHNOLOGY | 57 |
| Jean-Paul CADORET, Gaël BOUGARAN, Jean-Baptiste BÉRARD, Grégory CARRIER, Aurélie CHARRIER, Noémie COULOMBIER, Matthieu GARNIER, Raymond KAAS, Loïc LE DÉAN, Ewa LUKOMSKA, Elodie NICOLAU, Catherine ROUXEL, Bruno SAINT-JEAN and Nathalie SCHREIBER | |
| 2.1. Microalgae | 57 |
| 2.2. The potential value of microalgae | 59 |
| 2.2.1. Human nutrition | 59 |
| 2.2.2. Animal nutrition | 60 |
| 2.2.3. Health | 61 |
| 2.2.4. Cosmetics | 65 |
| 2.2.5. Industrial application | 65 |
| 2.2.6. Microalgae as fuel sources | 68 |
| 2.3. The culture of microalgae | 70 |
| 2.3.1. Ecophysiological needs | 71 |
| 2.3.2. Productions and productivities | 85 |

| | |
|---|------------|
| 2.4. Research in support of the development of the branch | 94 |
| 2.4.1. Omics | 94 |
| 2.4.2. Species improvement | 97 |
| 2.5. Conclusion | 100 |
| 2.6. Bibliography | 102 |
| CHAPTER 3. PHARMACOLOGY OF REEF MARINE ORGANISMS | 117 |
| Cécile DEBITUS and Jean GUÉZENNEC | |
| 3.1. Introduction | 117 |
| 3.1.1. Geographical strengths | 117 |
| 3.1.2. The marine environment: a source of new molecules | 119 |
| 3.2. Applications of marine molecules: reality | 124 |
| 3.2.1. Acquired results | 124 |
| 3.2.2. Current trends | 127 |
| 3.3. Concrete examples of marine natural products research programs | 129 |
| 3.3.1. Steps of a project | 130 |
| 3.4. Marine environment and biotechnology: the essential role of microorganisms | 135 |
| 3.4.1. Microorganisms of the marine environment | 136 |
| 3.4.2. Example of an atypical ecosystem: microbial mats, or kopara | 139 |
| 3.5. Bibliography | 152 |
| CHAPTER 4. MARINE RENEWABLE ENERGIES | 157 |
| Michel PAILLARD, Bernard MULTON and Marc BŒUF | |
| 4.1. Introduction | 157 |
| 4.2. The energetic context and the stakes in the development of renewable energies | 158 |
| 4.2.1. Energy resources, reserves and final energy, definitions and concepts | 158 |
| 4.2.2. Global, European and French contexts: the stakes | 163 |
| 4.3. The place of marine energies in renewable energies | 167 |
| 4.3.1. Marine renewable energies (MRE) | 167 |

| | |
|--|------------|
| 4.3.2. The specificities of MRE and their place in the energy mix | 170 |
| 4.3.3. The four stakes of the development of MRE in France | 171 |
| 4.3.4. Technological diversity | 172 |
| 4.3.5. Involvement in France, Europe and the world. | 184 |
| 4.3.6. The importance of MRE overseas and the insular context | 188 |
| 4.4. Technological and non-technological issues | 191 |
| 4.4.1. Limitations of the marine environment | 191 |
| 4.4.2. Development of reliable and economically competitive technology | 194 |
| 4.4.3. The storing of electricity, a lever for large-scale development | 194 |
| 4.4.4. Controlling environmental and societal impacts | 197 |
| 4.4.5. Establishing an adapted regulatory context. | 200 |
| 4.5. Socio-economic consequences | 201 |
| 4.5.1. The industrial stakes. | 201 |
| 4.5.2. Impacts and usage conflicts to control – compensatory measures. | 206 |
| 4.6. Perspectives | 206 |
| 4.6.1. Development of the different sectors: present, short- and long-term | 206 |
| 4.6.2. Today in the world, in Europe and in France. | 207 |
| 4.6.3. 2015–2025: from demonstrators to power plants via pilot facilities | 208 |
| 4.6.4. 2030 and beyond: large-scale development | 210 |
| 4.7. Bibliography. | 211 |
| LIST OF AUTHORS | 215 |
| INDEX | 217 |
