<b>Acknowledgments</b> . . . . .	ix
<b>Introduction</b> . . . . .	xi
<b>Chapter 1. The Concept of Symbiosis, from Past to Present</b> . . . . .	1
1.1. A brief history . . . . .	1
1.1.1. Emergence of the concept of symbiosis . . . . .	2
1.1.2. Symbiosis at the beginning of the 20th Century. . . . .	5
1.2. Defining symbiosis . . . . .	7
1.2.1. Classical definitions and difficulties . . . . .	7
1.2.2. Recent definitions: a fresh perspective on symbiosis . . . . .	9
1.3. Studying symbiosis: questions and tools from past to present . . . . .	12
<b>Chapter 2. Symbiosis and Nutrition</b> . . . . .	19
2.1. Becoming autotrophic . . . . .	19
2.1.1. Air and light: photosynthesis in plants and algae . . . . .	20
2.1.2. Lichens. . . . .	23
2.1.3. Photosynthetic animals . . . . .	26
2.1.4. Chemosynthetic animals . . . . .	28

---

2.2. Assimilating nitrogen and other elements . . . . .	31
2.2.1. Bacterial fixation of atmospheric nitrogen in plants . . . . .	31
2.2.2. Access to soil elements by mycorrhizal fungi . . . . .	34
2.3. Digesting food . . . . .	37
2.3.1. Wood-eating termites . . . . .	38
2.3.2. Sap-sucking insects . . . . .	40
2.3.3. Blood-sucking insects . . . . .	41
2.3.4. The gut microbiota of vertebrates . . . . .	42
2.4. Recycling waste . . . . .	43
<b>Chapter 3. Symbiosis and Other Functions . . . . .</b>	<b>45</b>
3.1. Seeing, being seen, hiding: bioluminescence . . . . .	45
3.2. Movement: phoresy . . . . .	49
3.3. Reproduction . . . . .	51
3.4. Protection and defense . . . . .	54
3.4.1. Resisting physico-chemical stress . . . . .	55
3.4.2. Avoiding predation . . . . .	57
3.4.3. Fighting parasites and pathogens . . . . .	58
<b>Chapter 4. Outline of How Symbioses Work . . . . .</b>	<b>61</b>
4.1. Symbiosis acquisition . . . . .	62
4.1.1. Horizontal transmission . . . . .	62
4.1.2. Vertical transmission . . . . .	67
4.2. Dialogue between host and symbionts: who is in charge? . . . . .	70
4.2.1. Adjustment of the symbiosis with respect to the environment . . . . .	70
4.2.2. Selective cooperation and the adjustment of contributions . . . . .	72
4.2.3. Maintaining cooperation by sanctioning cheaters . . . . .	73
4.2.4. Forced cooperation by integration of the symbiont . . . . .	75
4.3. The end of the symbiosis: trapped, digested or discharged? . . . . .	77

---

<b>Chapter 5. Symbiosis and Evolution</b> . . . . .	79
5.1. Becoming a host or a symbiont . . . . .	80
5.2. Maintaining a symbiosis. . . . .	83
5.3. Coevolution, co-speciation and asymmetry in the symbiotic relationship. . . . .	85
5.4. Morpho-anatomical consequences for hosts . . . . .	88
5.5. Genetic and genomic consequences for symbionts . . . . .	92
5.6. Integration between partners and the concept of organelle . . . . .	97
5.7. The origins of the eukaryotic cell . . . . .	99
5.8. Symbiosis imposes a new perspective on the tree of life and on evolution . . . . .	102
5.9. Are the concepts of holobiont and hologenome ultimately useful? The story continues... . . . . .	104
<b>Chapter 6. Symbiosis and the Biosphere</b> . . . . .	109
6.1. Symbiosis and the current biosphere . . . . .	109
6.1.1. Symbiosis and ecosystem productivity . . . . .	109
6.1.2. Symbiosis and biodiversity. . . . .	110
6.2. Symbiosis and history of the biosphere . . . . .	112
6.2.1. Syntrophy and symbiosis. . . . .	112
6.2.2. Origin and diversification of eukaryotic lineages. . . . .	114
6.2.3. Phototrophic symbioses and atmospheric oxygen . . . . .	115
6.2.4. Symbiosis and the origins of pluricellularity in animals? . . . . .	116
6.2.5. Contribution to the appearance of terrestrial plants. . . . .	117
<b>Chapter 7. Good Uses for Symbiosis</b> . . . . .	119
7.1. Some avenues in fundamental research . . . . .	119
7.1.1. Viruses: new players in symbiosis . . . . .	119
7.1.2. Symbionts as models for synthetic biology . . . . .	120

7.2. Some avenues for applied research . . . . .	122
7.2.1. Unexpected roles of the human microbiota . . . . .	123
7.2.2. When the symbiont becomes an Achilles heel or a vaccine . . . . .	125
7.2.3. Symbiosis and plant production . . . . .	126
7.2.4. Avenues in animal productivity . . . . .	128
7.3. Some avenues in ecology . . . . .	129
<b>Conclusion and Perspectives . . . . .</b>	<b>131</b>
<b>Bibliography . . . . .</b>	<b>135</b>
<b>Index . . . . .</b>	<b>151</b>
