<b>Introduction</b> . . . . .	ix
<b>Chapter 1. Chi-squared Goodness-of-fit Tests for Complete Data</b> . . . . .	1
1.1. Classical Pearson's chi-squared test . . . . .	1
1.2. Joint distribution of $\mathbf{X}_n(\theta_n^*)$ and $\sqrt{n}(\theta_n^* - \theta)$ . . . . .	3
1.3. Parameter estimation based on complete data. Lemma of Chernoff and Lehmann . . . . .	5
1.4. Parameter estimation based on grouped data. Theorem of Fisher . . . . .	10
1.5. Nikulin-Rao-Robson chi-squared test . . . . .	12
1.6. Other modifications . . . . .	18
1.7. The choice of grouping intervals . . . . .	20
<b>Chapter 2. Chi-squared Test for Censored Data</b> . . . . .	31
2.1. Generalized Pearson-Fisher chi-squared test . . . . .	32
2.2. Maximum likelihood estimators for censored data . . . . .	34
2.3. Nikulin-Rao-Robson chi-squared test for censored data . . . . .	38
2.4. The choice of grouping intervals . . . . .	45
2.4.1. Equifrequent grouping (EFG) . . . . .	45

2.4.2. Intervals with equal expected numbers of failures (EENFG) . . . . .	46
2.4.3. Optimal grouping (OptG) . . . . .	48
2.5. Chi-squared tests for specific families of distributions . . . . .	51
2.5.1. Exponential distribution . . . . .	51
2.5.2. Weibull distribution . . . . .	55
2.5.3. Lognormal distribution . . . . .	60
2.5.4. Loglogistic distribution . . . . .	63
2.5.5. Gompertz distribution . . . . .	67
<b>Chapter 3. Comparison of the Chi-squared Goodness-of-fit Test with Other Tests . . . . .</b>	71
3.1. Tests based on the difference between non-parametric and parametric estimators . . . . .	71
3.2. Comparison of goodness-of-fit tests for complete data . . . . .	76
3.3. Comparison of goodness-of-fit tests for censored data . . . . .	79
3.3.1. Lognormal-generalized Weibull pair of competing hypotheses . . . . .	80
3.3.2. Exponential-Weibull pair of competing hypotheses . . . . .	82
3.3.3. Weibull-generalized Weibull pairs of competing hypotheses . . . . .	84
<b>Chapter 4. Chi-squared Goodness-of-fit Tests for Regression Models . . . . .</b>	87
4.1. Data and the idea of chi-squared test construction . . . . .	89
4.2. Asymptotic distribution of the random vector $Z$ . . . . .	91
4.3. Test statistic . . . . .	96
4.4. Choice of random grouping intervals . . . . .	97
4.4.1. Test for the exponential AFT model . . . . .	99

4.4.2. Tests for the scale-shape AFT models with constant covariates . . . . .	101
4.4.3. Test for the Weibull AFT model with step-stresses . . . . .	108
<b>Appendices</b> . . . . .	111
<b>Appendix 1</b> . . . . .	113
<b>Appendix 2</b> . . . . .	125
<b>Bibliography</b> . . . . .	131
<b>Index</b> . . . . .	141
