Introduction	ix
Philippe GESLIN	
Chapter 1. Anthropotechnological Practice and Time Politics in the Development Industry	1
Matthieu BOLAY	
1.1. Conducting research about water allocation when there is no water.	2
1.2. Time, power and cotemporalities.	6
1.2.1. Ethnographic temporality.	9
1.2.2. Bureaucratic temporality	13
1.3. Anthropotechnological temporalities: the Tanzanian case	14
1.3.1. The oMoMi project	15
1.3.2. Project genesis: when does a project begin?.	16
1.3.3. Supported iterations	18
1.3.4. Productive cotemporality: simultaneity, crowdsourcing and FabLab fabrication	20
1.4. Conclusion: designing technologies based on user temporality.	23
1.5. Bibliography.	25
Chapter 2. The Appropriation of Knowledge: An Anthropology of Transmission in the Context of Professional Training	27
Hervé MUNZ	
2.1. The anthropotechnological approach to appropriation as a critique of the notion of transmission	28

2.2. Learning an industry	30
2.2.1. The “mechanical sense” as a way of knowing	31
2.2.2. Skilled vision or sight training	33
2.3. Transmission methods for the “mechanical sense”	36
2.3.1. Professional training beyond binary oppositions	36
2.3.2. The pedagogy of concealment	39
2.3.3. Objects as transfer vectors of the profession	41
2.4. A theory of transmission as appropriation and transformation	44
2.5. Bibliography	46
Chapter 3. At the Heart of the Sensibility: The “Profane” Gold of Madre de Dios	49
Carole BAUDIN	
3.1. Prologue	49
3.2. Context: the challenge of a perceived nature	51
3.3. The scene: a humid and slippery topography	53
3.4. Gold mining: a skillful practice between nature and culture	56
3.5. Body techniques: embodied tempo	60
3.6. Body to body with the elements	64
3.7. Gold and mercury: sensual alchemy	66
3.8. The mythic body of miners	69
3.9. Sensitive memory: transmission of a “slippery” skill	70
3.10. Collective memory: the development of a social body	71
3.11. Local memory of development	73
3.12. Discussion: an intervention based on profane knowledge	75
3.13. Conclusion: contribution to anthropotechnology	79
3.14. Bibliography	82
Chapter 4. The Fall Between the Objectification of Engineers and the Subjectification of Elderly People: The Challenges of Mediation	85
Laura BERTINI	
4.1. Introduction	85
4.2. New technologies for older generations	87
4.3. The cultural dimension of gerontechnologies	90
4.4. Defining and understanding the fall in the home	94
4.5. Common frames of reference	101
4.6. Anthropotechnology, process of legitimization and transfer of ethnographic knowledge	103

4.7. Conclusion	107
4.8. Bibliography.	108
Chapter 5. In Step with Prosthetic Limbs! A Study of Scaling Up from Local Innovations	111
Chloé LECOMTE	
5.1. A multisite study in northern and southern Vietnam	113
5.2. The conventional route: standard and existing prostheses	114
5.3. Forms of appropriation and illustrative stories.	116
5.4. Taking the next step: an analysis of scale-up factors	119
5.4.1. Partnerships and history: anchoring in the local network to better scale-up.	119
5.4.2. Local adaptation of techniques and objects, proof of appropriation	121
5.4.3. Adaptability of technologies in an autopoietic system.	122
5.5. Discussions and a review of the anthropotechnological approach.	123
5.6. Acknowledgements.	126
5.7. Bibliography.	126
Chapter 6. FabLabs: Product Design and Anthropotechnology	129
Gaëtan BUSSY	
6.1. FabLabs	131
6.1.1. History.	131
6.1.2. Philosophy	132
6.1.3. Evolution	135
6.2. A day in the FabLab.	135
6.3. Anthropotechnology and FabLabs	138
6.3.1. Managing water in Tanzania.	139
6.3.2. Pleco: the electrolytic pencil	141
6.4. Conclusion	143
6.5. Bibliography.	145
List of Authors	147
