Foreword	9
Claude GIRAULT	
Chapter 1. Introduction	17
Serge HADDAD, Fabrice KORDON, Laurent PAUTET and Laure PETRUCCI	
FIRST PART. FORMAL MODELS FOR DISTRIBUTED SYSTEMS	21
Chapter 2. Introduction to Formal Models	23
Laure PETRUCCI	
2.1. Motivation	23
2.2. Semi-formal models	24
2.3. Formal models	27
2.4. After specification, verification	35
2.5. Outline of Part I	37
2.6. Bibliography	37
Chapter 3. Specification and Design Approaches	41
Christine CHOPPY and Laure PETRUCCI	
3.1. Introduction	41
3.2. Criteria for developing specifications	42
3.3. Specification development methodologies	50
3.4. Conclusion	60
3.5. Bibliography	60
Chapter 4. Modeling Time	63
Béatrice BÉRARD	
4.1. Introduction	63
4.2. Semantics of timed models	65

6 Models and Analysis in Distributed Systems

4.3. Classical timed models	68
4.4. Specification of timing requirements	85
4.5. Conclusion	90
4.6. Bibliography	90
Chapter 5. Architecture Description Languages	97
Pascal POIZAT and Thomas VERGNAUD	
5.1. Introduction	97
5.2. Concepts	100
5.3. Formal ADLs	109
5.4. ADLs for actual implementation	117
5.5. Conclusion	130
5.6. Bibliography	130
SECOND PART. VERIFICATION TECHNIQUES FOR DISTRIBUTED SYS-	
TEMS	135
Chapter 6. Introduction to Verification	137
Serge HADDAD	
6.1. Introduction	137
6.2. Formal models for verification	138
6.3. Expression of properties	141
6.4. Verification methods	144
6.5. Outline of Part 2	151
6.6. Bibliography	151
Chapter 7. Verification of Finite-State Systems	155
Jean-François PRADAT-PEYRE and Yann THIERRY-MIEG	
7.1. Introduction	155
7.2. Petri net definition	156
7.3. Structural approaches	158
7.4. Formal verification by model-checking	183
7.5. Classification of model-checking approaches	191
7.6. Decision diagram-based approaches	194
7.7. Partial order reductions	203
7.8. Reductions exploiting symmetry	212
7.9. Conclusion	214
7.10. Bibliography	215
Chapter 8. Verification of Infinite-State Systems	221
Stéphane DEMRI and Denis POITRENAUD	
8.1. Introduction	221

8.2. Counter systems	225
8.3. Recursive Petri nets	233
8.4. Presburger arithmetic as symbolic representation	250
8.5. Concluding remarks	263
8.6. Bibliography	263
Chapter 9. Verification of Timed Systems	271
Pierre-Alain REYNIER	
9.1. Introduction	271
9.2. Construction of the region graph	273
9.3. Handling infinite abstractions	284
9.4. Robustness issues in timed systems	293
9.5. Conclusion	303
9.6. Bibliography	303
Chapter 10. Distributed Control	307
Claude DUTHEILLET, Isabelle MOUNIER and Nathalie SZNAJDER	
10.1. Introduction	307
10.2. Decentralized Control	311
10.3. Controller synthesis for distributed systems	323
10.4. Multi-player games	339
10.5. Conclusion	346
10.6. Bibliography	346
List of Authors	353
Index	355
