<b>Acknowledgments</b> . . . . .	xxi
<b>Preface</b> . . . . .	xxiii
Bernard JACOB and Jean-Bernard KOVARIK	
<b>Introduction</b> . . . . .	xxvii
Michel ANDRÉ and Zissis SAMARAS	
<b>Part 1. Electromobility and its Implementation</b> . . . . .	1
<b>Introduction to Part 1</b> . . . . .	3
Zissis SAMARAS	
<b>Chapter 1. Toward a Europe-Wide Interoperable Electromobility System</b> . . . . .	5
Gabriele GIUSTINIANI, Luca PERSIA, Heike BARLAG and Norbert VIERHEILIG	
1.1. Background . . . . .	5
1.2. The Green eMotion project partnership and objectives . . . . .	7
1.3. GeM achievements so far . . . . .	8
1.3.1. Development of a marketplace as common innovative service platform . . . . .	8
1.3.2. Improvement in standardization . . . . .	10
1.3.3. Technical reports and policy recommendations . . . . .	11
1.3.4. Extensive amount of valuable electromobility data . . . . .	11
1.3.5. Developments in other areas . . . . .	12
1.4. Next steps . . . . .	13
1.4.1. Assessment of impact on EVs' diffusion of support/regulatory measures at local level . . . . .	13

---

1.4.2. Assessment of potential market penetration of EVs . . . . .	14
1.4.3. Demonstration of new forms of EV sharing . . . . .	14
1.5. Conclusions . . . . .	16
1.6. Bibliography . . . . .	17
<b>Chapter 2. Advanced Services for Electromobility: the Integration of the SmartCEM Project Platform for the Reggio Emilia Pilot Site . . . . .</b>	<b>19</b>
Mauro DELL'AMICO, Guido DI PASQUALE, Leandro GUIDOTTI and Pietro MASCOLO	
2.1. Introduction . . . . .	19
2.1.1. Electromobility in Europe . . . . .	19
2.1.2. The SmartCEM project . . . . .	20
2.2. Reggio Emilia pilot site . . . . .	21
2.3. Research hypotheses. . . . .	23
2.4. Technical architecture and data exchange . . . . .	23
2.5. Experimental design, data and questionnaires. . . . .	24
2.5.1. Services to be tested . . . . .	26
2.5.2. Facilities and key management . . . . .	27
2.6. Conclusions . . . . .	28
2.7. Bibliography . . . . .	29
<b>Chapter 3. Cognitive Mapping and Multi-criteria Assessment for the Design of an Electric Car Sharing Service. . . . .</b>	<b>31</b>
Alessandro LUÈ, Alberto COLORNI and Roberto NOCERINO	
3.1. Introduction . . . . .	31
3.2. Decision-aiding methods and causal maps . . . . .	33
3.3. Assessment of the configuration options . . . . .	36
3.4. Conclusion . . . . .	42
3.5. Bibliography . . . . .	42
<b>Chapter 4. Eco-driving for Clean Vehicles – Optimizing Energy Use for Trams and e-buses . . . . .</b>	<b>47</b>
Wolfgang BACKHAUS	
4.1. Background. . . . .	47
4.2. Advanced training and education for safe eco-driving of clean vehicles: ACTUATE . . . . .	48
4.3. Evaluation of training programmes for safe eco-driving of clean vehicles . . . . .	52
4.4. Conclusions . . . . .	56
4.5. Bibliography . . . . .	57

<b>Chapter 5. The Role and Activities of SMEs in EU R&amp;D Transport Programmes: the Case of Electric Vehicles</b> . . . . .	59
David MORRIS	
5.1. Introduction . . . . .	59
5.2. Innovation in the transport market . . . . .	60
5.3. Methodology . . . . .	63
5.4. SME involvement in EU R&D programmes . . . . .	64
5.5. Strategies employed by SMEs to overcome barriers . . . . .	69
5.6. Summary . . . . .	70
5.7. Acknowledgments . . . . .	70
5.8. Bibliography . . . . .	71
<b>Part 2. Vehicle and Engine Technologies Development.</b> . . . . .	73
<b>Introduction to Part 2</b> . . . . .	75
Zissis SAMARAS	
<b>Chapter 6. HERCULES-1: The Long-Term (2004–2014) R&amp;D Programme on Large Engine Technologies for Ships</b> . . . . .	77
Nikolaos KYRTATOS	
6.1. Introduction . . . . .	78
6.2. Achievements of Hercules-A and Hercules-B. . . . .	79
6.3. Objectives of Hercules-C . . . . .	81
6.4. Project HERCULES-C results . . . . .	81
6.4.1. WPG1: new combustion concepts . . . . .	82
6.4.2. WPG2: fuel injection models and experiments. . . . .	83
6.4.3. WPG4: experimental and modeling studies of fuel injection systems . . . . .	84
6.4.4. WPG5: new materials and tribology . . . . .	88
6.5. Conclusions . . . . .	90
6.6. Acknowledgments . . . . .	91
6.7. Bibliography . . . . .	91
<b>Chapter 7. Energy Storage System Studies for Heavy Duty Hybrid Electric Vehicles in the EC HCV Project</b> . . . . .	93
Mario CONTE, Francesco VELLUCCI, Massimo CERAOLO, Peter DAEMON, Giorgio MANTOVANI, Christian NIKLAS, Sophie TINTIGNAC and Giancarlo TROTTI	
7.1. Introduction . . . . .	93
7.2. The reference vehicles and the selected energy storage systems (ESS) . . . . .	95
7.3. Dedicated testing procedures . . . . .	96
7.3.1. Abuse testing . . . . .	97

---

7.3.2. Electrical testing . . . . .	98
7.3.3. Sample under test . . . . .	99
7.4. Testing results . . . . .	100
7.4.1. Abuse testing results . . . . .	100
7.4.2. Electrical testing results . . . . .	102
7.5. Conclusions . . . . .	105
7.6. Acknowledgments . . . . .	105
7.7. Bibliography . . . . .	106
<b>Chapter 8. Achievements and Lessons Learnt in the Zero Regio EU Project . . . . .</b>	<b>109</b>
Heinrich LIENKAMP and Ashok RASTOGI	
8.1. Introduction . . . . .	109
8.2. Hydrogen infrastructure . . . . .	110
8.2.1. Hydrogen production . . . . .	110
8.2.2. Hydrogen transport to station . . . . .	111
8.2.3. Refueling dispensers . . . . .	112
8.3. Fuel-cell vehicles . . . . .	115
8.3.1. FCV fleet in Germany . . . . .	115
8.3.2. FCV fleet in Italy . . . . .	115
8.4. Results of demonstration . . . . .	115
8.4.1. Vehicle performance . . . . .	116
8.4.2. Experience with hydrogen infrastructure . . . . .	117
8.5. Unexpected events and lessons learnt . . . . .	118
8.5.1. Approval formalities in Italy . . . . .	118
8.5.2. Refueling infrastructure . . . . .	118
8.5.3. Assessment framework . . . . .	119
8.5.4. Public acceptance . . . . .	120
8.6. Post-project activities and future plans . . . . .	120
8.7. Concluding remarks . . . . .	121
8.8. Bibliography . . . . .	121
<b>Chapter 9. FEV HiFORS Injector with Continuous Rate Shaping: Influence on Mixture Formation and Combustion Process . . . . .</b>	<b>123</b>
Paul GRZESCHIK, Hermann-Josef LAUMEN and Udo SCHLEMMER KELLING	
9.1. Introduction . . . . .	123
9.2. HiFORS injector . . . . .	124
9.3. Optical chamber rate shaping investigations . . . . .	126
9.4. Single cylinder engine investigations . . . . .	128

9.4.1. Experimental design . . . . .	128
9.4.2. Base investigations . . . . .	129
9.4.3. Rate shaping. . . . .	130
9.4.4. Full load operation . . . . .	132
9.5. Conclusion and outlook . . . . .	134
9.6. Acknowledgments . . . . .	134
9.7. Bibliography . . . . .	134
<b>Chapter 10. Development of Predictive Vehicle and Drivetrain Operating Strategies Based Upon Advanced Information and Communication Technologies . . . . .</b>	<b>137</b>
Stephen JONES, Arno HUSS, Emre KURAL, Alexander MASSONER, Edoardo MORRA, Christa SIMON, Reinhard TATSCHL and Christian VOCK	
10.1. Introduction . . . . .	137
10.2. Energy potential analysis with offline simulation . . . . .	139
10.3. Analysis of ICT measures for the reduction of CO <sub>2</sub> emissions in urban areas . . . . .	141
10.4. Development and implementation of predictive energy management systems for real-life application . . . . .	142
10.4.1. Optimal power-split strategy . . . . .	143
10.4.2. Coasting assistant algorithm . . . . .	144
10.4.3. Introduction of a co-simulation platform . . . . .	145
10.4.4. Testbed and real-world tests . . . . .	147
10.5. Conclusions and outlook. . . . .	148
10.6. Acknowledgments . . . . .	149
10.7. Bibliography . . . . .	149
<b>Part 3. Energies and Fuels for Transports . . . . .</b>	<b>151</b>
<b>Introduction to Part 3 . . . . .</b>	<b>153</b>
Zissis SAMARAS	
<b>Chapter 11. Measures to Promote the Diffusion of Alternative Fuel Vehicles in EU27. . . . .</b>	<b>155</b>
Michael KRAIL and Wolfgang SCHADE	
11.1. Introduction . . . . .	155
11.2. The integrated assessment model ASTRA . . . . .	157
11.3. Diffusion of alternative fuel cars . . . . .	160
11.4. Policies and scenarios . . . . .	165
11.5. Conclusions . . . . .	169
11.6. Acknowledgments . . . . .	170
11.7. Bibliography . . . . .	170

<b>Chapter 12. Creating Prospective Value Chains for Renewable Road Transport Energy Sources up to 2050 in Nordic Countries.</b> . . . . .	173
Anu TUOMINEN, Nina WESSBERG, Anna LEINONEN, Annele EEROLA and Simon BOLWIG	
12.1. Introduction . . . . .	173
12.2. Theoretical background . . . . .	174
12.2.1. The functions of foresight in policy-making . . . . .	175
12.2.2. Multi-level perspective to transition . . . . .	175
12.2.3. Value chain analysis. . . . .	176
12.3. Method . . . . .	178
12.3.1. Energy and transport in MLP framework . . . . .	178
12.3.2. An approach for outlining prospective value chains for sustainable energy systems in road transport . . . . .	179
12.4. Building future contexts for the prospective value chains . . . . .	181
12.5. Analysis of value network actors: a biodiesel case study . . . . .	183
12.6. Discussion and conclusions . . . . .	185
12.7. Acknowledgments . . . . .	186
12.8. Bibliography . . . . .	186
 <b>Chapter 13. The Consequences of Increasing Fuel Prices on Car Travel and Household Budgets</b> . . . . .	 189
Richard GRIMAL	
13.1. A break in trend in car travel: increasing financial constraints and the proximity of saturation . . . . .	189
13.2. A lagged reaction to rising fuel prices . . . . .	194
13.2.1. Model specification . . . . .	194
13.2.2. Model estimation . . . . .	196
13.2.3. Forecasting car travel . . . . .	198
13.3. The rise of fuel poverty . . . . .	200
13.3.1. Data and methodology . . . . .	200
13.3.2. Impacts of rising fuel prices on household budgets and the rationalization of car travel. . . . .	201
13.3.3. An increasing vulnerability, especially in areas of diffuse urbanization and among low-income households . . . . .	203
13.4. Bibliography . . . . .	206
 <b>Chapter 14. The Development of an Innovative On-board CNG Storage System for Methane-Fuelled Cars Conducted Within the FP7 EU Project 'InGAS'</b> . . . . .	 209
David Mark STORER, Giorgio MENZATO, Michael KLESCHINSKI, Volker STRUBEL, Bernhard KIENER, Jerzy KALETA, Pawel GASIOR, Wojciech BLAZEJEWSKI, Georg MAIR and Christian GREGOR	
14.1. Development of innovative, low-cost Type IV CNG vessels. . . . .	209

14.2. Development of advanced components for the on-board CNG storage and supply system . . . . .	212
14.3. Design of CNG storage module . . . . .	214
14.4. Integration of CNG storage module in vehicle. . . . .	215
14.5. Performance validation . . . . .	215
14.6. Considerations regarding production issues . . . . .	216
14.7. Conclusions . . . . .	217
14.8. Acknowledgments . . . . .	219
<b>Chapter 15. Sustainability Assessment of Infrastructure Elements with Integrated Energy Harvesting Technologies . . . . .</b>	<b>221</b>
Bijan ADL-ZARRABI, Mohammad HOSEINI, York OSTERMEYER and Holger WALLBAUM	
15.1. Background . . . . .	221
15.2. Highway E39 in Norway . . . . .	223
15.2.1. A summary of feasibility study. . . . .	225
15.3. Identification of environmental and economic lifecycle challenges. . . . .	229
15.4. Pareto optimized concepts balancing economic and environmental aspects . . . . .	230
15.5. Conclusions . . . . .	231
15.6. Bibliography . . . . .	232
<b>Part 4. Greenhouse Gas Mitigation. . . . .</b>	<b>235</b>
<b>Introduction to Part 4 . . . . .</b>	<b>237</b>
Michel ANDRÉ	
<b>Chapter 16. GHG Mitigation Strategy in the European Transport Sector . . . . .</b>	<b>241</b>
Wolfgang SCHADE and Michael KRAIL	
16.1. Introduction. . . . .	241
16.2. Analysis of R&D funding and the innovation systems of the transport modes . . . . .	244
16.3. Scoping of GHG reduction measures and technical reduction potentials . . . . .	247
16.4. Techno-economic assessment of cost of GHG reduction measures . . . . .	249
16.5. Stepwise scenario building and model-based assessment of scenarios and their GHG reduction pathways . . . . .	250

16.6. Synthesis on suitable GHG reduction strategy for transport . . . . .	253
16.7. Conclusions . . . . .	255
16.8. Acknowledgments . . . . .	256
16.9. Bibliography . . . . .	257

**Chapter 17. Why do CO<sub>2</sub> Emissions from Heavy Road Freight Transport Increase in Spite of Higher Fuel Prices?** . . . . . 259

Inge VIERTH

17.1. Introduction . . . . .	259
17.1.1. Background . . . . .	259
17.1.2. Scope and structure of the chapter . . . . .	260
17.2. Swedish freight transport market . . . . .	260
17.2.1. Freight transport intensity and modal split . . . . .	260
17.2.2. Transport service prices . . . . .	262
17.3. Logistic efficiency of road freight transports . . . . .	263
17.3.1. Vehicle utilization . . . . .	263
17.3.2. Consumed fuel per tonne-km. . . . .	264
17.4. Consumed fuel per vehicle-km . . . . .	265
17.4.1. Measurements to improve fuel efficiency . . . . .	266
17.4.2. Barriers to the implementation of fuel-saving technologies . . . . .	266
17.4.3. Rebound effect and elasticities of fuel use in respect to fuel price . . . . .	269
17.5. CO <sub>2</sub> -intensity of fuel used in the road freight sector . . . . .	269
17.6. Modeling policy impacts . . . . .	270
17.6.1. Observed elasticities . . . . .	270
17.6.2. Modeled elasticities . . . . .	271
17.7. Conclusions . . . . .	272
17.8. Acknowledgments . . . . .	273
17.9. Bibliography . . . . .	273

**Chapter 18. A Study on Super Credits and their Impact on Fleet-Average Real-World CO<sub>2</sub> Emissions** . . . . . 277

Petros KATSIS, Thomas PAPAGEORGIU and Leonidas NTZIACHRISTOS

18.1. Introduction . . . . .	277
18.2. Methodology . . . . .	279
18.2.1. E-mobility penetration . . . . .	282
18.2.2. Super credits . . . . .	283
18.3. Simulation . . . . .	283
18.3.1. Software . . . . .	283
18.3.2. Super credits estimation . . . . .	285

18.4. Results and discussion . . . . .	286
18.4.1. Type-approval results . . . . .	286
18.4.2. Real-world results . . . . .	288
18.5. Conclusion . . . . .	289
18.6. Bibliography . . . . .	290
<b>Chapter 19. A Study on Co-Modality and Eco-Driving Mobility . . . . .</b>	<b>293</b>
Sven MAERVOET, Lars AKKERMANS, Kristof CARLIER and Muriel DESAEGER	
19.1. Introduction . . . . .	293
19.2. Analyzing the GPS-based mobility data . . . . .	294
19.2.1. General information . . . . .	294
19.2.2. Extraction of mobility patterns as trip legs and trip chains. . . . .	296
19.2.3. Calculating CO <sub>2</sub> emissions per trip . . . . .	298
19.3. Assessing modal shift potential . . . . .	299
19.3.1. Collecting public transport data . . . . .	299
19.3.2. Development of the public transport model. . . . .	300
19.3.3. Modal shift analysis . . . . .	301
19.4. Vehicle choice, technology and automotive service. . . . .	305
19.5. Conclusions and recommendations . . . . .	306
19.6. Bibliography . . . . .	307
<b>Chapter 20. Harmonizing Carbon Footprint Calculation for Freight Transport Chains. . . . .</b>	<b>309</b>
Alan LEWIS, Verena EHRLER, Heidi AUVINEN, Hedi MAURER, Igor DAVYDENKO, Antje BURMEISTER, Saskia SEIDEL, Andreas LISCHKE and Jan KIEL	
20.1. Introduction . . . . .	309
20.1.1. Scope and objectives for harmonizing the carbon footprint calculation of freight transport. . . . .	309
20.1.2. Objectives . . . . .	311
20.1.3. The current situation . . . . .	311
20.2. The basis for standardization . . . . .	313
20.2.1. The technical approach . . . . .	313
20.2.2. Gaps and ambiguities . . . . .	315
20.2.3. The vehicle operation system. . . . .	316
20.2.4. Allocation principles . . . . .	317
20.2.5. Determination of shipment-level emissions within the full transport supply chain. . . . .	318
20.2.6. Addressing the gaps and ambiguities . . . . .	318

20.3. Working with real-life supply chains . . . . .	318
20.4. Outlook: requirements toward a future structure for the harmonized approach. . . . .	320
20.5. Conclusions . . . . .	322
20.5. Acknowledgments . . . . .	322
20.6. Bibliography . . . . .	322
<b>Chapter 21. Carbon Intensity of French Shippers . . . . .</b>	<b>325</b>
Christophe RIZET, Cecilia CRUZ, Matthieu DE LAPPARENT and Martine VROMANT	
21.1. Introduction: context and objective . . . . .	325
21.2. Data: the 2004 French shipper survey . . . . .	326
21.3. Estimating shipper yearly emissions from a typology of shippers . . . . .	328
21.3.1. Establishing a typology of shippers . . . . .	328
21.3.2. Estimating the quantity of freight transport CO <sub>2</sub> emissions per shipper of each type . . . . .	329
21.3.3. Precision of the estimated quantity of CO <sub>2</sub> per shipper . . . . .	330
21.4. Estimating yearly shipper emissions with a model of carbon intensity per tonne shipped . . . . .	332
21.4.1. A model of carbon intensity per tonne shipped . . . . .	332
21.4.2. Precision of the estimated carbon intensity per tonne . . . . .	333
21.4.3. Carbon intensity per shipper . . . . .	334
21.4.4. Precision of the estimated carbon intensity per shipper . . . . .	334
21.5. Comparison of carbon intensity per shipper estimated by the two methods . . . . .	335
21.6. Carbon intensity, carbon efficiency and the impact of a carbon tax on shipper competitiveness. . . . .	335
21.7. Conclusion . . . . .	337
21.8. Acknowledgments . . . . .	338
21.9. Bibliography . . . . .	338
<b>Part 5. Air Pollution . . . . .</b>	<b>339</b>
<b>Introduction to Part 5 . . . . .</b>	<b>341</b>
Michel ANDRÉ	
<b>Chapter 22. Impact of FAME Content on the Regeneration Frequency of Diesel Particulate Filters (DPFs) . . . . .</b>	<b>345</b>
Kenneth D. ROSE, Heather HAMJE, Dimitris KATSAOUNIS, Christos SAMARAS, Savas GEIVANIDIS and Zissis SAMARAS	
22.1. Introduction . . . . .	345
22.2. Experimental setup. . . . .	347

---

22.3. Test procedure . . . . .	348
22.4. Results. . . . .	350
22.4.1. PM emissions . . . . .	350
22.4.2. Fuel economy penalty. . . . .	352
22.5. Conclusions. . . . .	354
22.6. Acknowledgments . . . . .	355
22.7. Bibliography . . . . .	355
<b>Chapter 23. Exhaust Aftertreatment Potentials of Advanced Coupled NSC-SCR System. . . . .</b>	<b>357</b>
Thomas WITTKA, Bastian HOLDERBAUM and Thomas KÖRFER	
23.1. Introduction. . . . .	357
23.2. Description of investigated exhaust system and fuel reformer performance. . . . .	359
23.3. Discussion of results and aftertreatment potentials of investigated exhaust system . . . . .	363
23.4. Summary . . . . .	369
23.5. Acknowledgments . . . . .	370
23.6. Bibliography . . . . .	370
<b>Chapter 24. Power Controlled Microwave Reactor for the Removal of NO<sub>x</sub> and SO<sub>x</sub> from the Exhaust of Marine Diesel Engines. . . . .</b>	<b>373</b>
Maysam ABBOD, Radu BELECA, David PEIRCE, Lionel GANIPPA, Nadarajah MANIVANNAN and Wamadeva BALACHANDRAN	
24.1. Introduction. . . . .	373
24.2. Non-thermal plasma experimental set-up using diesel car engine . . . . .	375
24.2.1. Experimental results. . . . .	377
24.3. MW power control. . . . .	378
24.4. Non-thermal plasma experimental set-up using 40 kW marine engine . . . . .	380
24.5. Practical implementation . . . . .	383
24.6. Conclusions. . . . .	383
24.7. Bibliography . . . . .	384
<b>Chapter 25. Quantification of Non-Exhaust Particulate Matter Emissions from Road Transport . . . . .</b>	<b>385</b>
Ilias VOITSIS, Leonidas NTZIACHRISTOS, Christos SAMARAS and Zissis SAMARAS	
25.1. Introduction. . . . .	385
25.2. Methodology . . . . .	386

25.3. Database of road non-exhaust EFs . . . . .	388
25.3.1. PM10, PM2.5, organic matter and elemental carbon . . . . .	388
25.3.2. Metals . . . . .	389
25.3.3. PAHs . . . . .	390
25.3.4. Resuspension. . . . .	391
25.3.5. Particle number . . . . .	394
25.4. Conclusions . . . . .	395
25.5. Acknowledgments . . . . .	396
25.6. Bibliography . . . . .	396
<b>Chapter 26. COPERT Micro: a Tool to Calculate Vehicle Emissions in Urban Areas . . . . .</b>	<b>401</b>
Christos SAMARAS, Leonidas NTZIACHRISTOS and Zissis SAMARAS	
26.1. Introduction . . . . .	401
26.2. Methodology . . . . .	402
26.2.1. Input data: interaction with the traffic model . . . . .	402
26.2.2. Vehicle classification . . . . .	403
26.2.3. Emission factors . . . . .	405
26.2.4. Equations: calculation procedure. . . . .	406
26.3. Software application . . . . .	408
26.3.1. Software development . . . . .	408
26.3.2. User interface . . . . .	408
26.4. Results and applications . . . . .	410
26.4.1. Athens emissions inventory . . . . .	410
26.4.2. Emissions inventory of the Municipality of Pilea-Hortiatis . . . . .	412
26.5. Conclusions . . . . .	413
26.6. Bibliography . . . . .	414
<b>Chapter 27. Traffic and Vehicle Fleet Statistics for the Calculation of Air Pollutant Emissions from Road Transport in France . . . . .</b>	<b>417</b>
Michel ANDRÉ, Marion CARTERET and Anaïs PASQUIER	
27.1. Introduction . . . . .	417
27.2. Data needed for estimating pollutant emissions from road transports . . . . .	419
27.3. A typical approach for determining fleet composition . . . . .	419

27.4. Detailed assumptions and data for France . . . . .	420
27.4.1. Registration data, engine and vehicle size, and equipment . . . . .	421
27.4.2. Crucial statistics: survival probability and annual mileage. . . . .	423
27.4.3. Prospective trends . . . . .	425
27.5. Comparing different estimations for France . . . . .	425
27.6. The French vehicle fleet composition: some highlights. . . . .	427
27.7. Local observations and vehicle fleet variability . . . . .	429
27.8. Other data required for emission calculation. . . . .	431
27.9. Discussion and conclusions . . . . .	432
27.10. Acknowledgments . . . . .	432
27.11. Bibliography. . . . .	433
<b>Part 6. Noise and Vibration . . . . .</b>	<b>435</b>
<b>Introduction to Part 6 . . . . .</b>	<b>437</b>
Michel ANDRÉ	
<b>Chapter 28. AQUO European Collaborative Project – Development of Methods and Indicators for the Assessment of Shipping Noise Footprint on Underwater Environment and Impact on Marine Life . . . . .</b>	<b>439</b>
Christian AUDOLY, Céline ROUSSET, Thomas FOLEGOT, Michel ANDRÉ, Lanfranco BENEDETTI and Eric BAUDIN	
28.1. Introduction . . . . .	439
28.2. Overview of AQUO project . . . . .	440
28.3. Needs and policies . . . . .	442
28.3.1. Overview of the existing regulatory framework . . . . .	442
28.3.2. Actions conducted by organizations involved in the maritime sector. . . . .	443
28.3.3. Ship traffic and its evolution . . . . .	444
28.3.4. Spatial distribution of marine species . . . . .	445
28.4. Noise footprint characterization. . . . .	445
28.4.1. Result from a bibliographic analysis. . . . .	446
28.4.2. Bio-acoustic criteria. . . . .	446
28.4.3. Proposed definitions. . . . .	447
28.4.4. Test case to illustrate the idea of noise footprints. . . . .	449
28.5. Methodology for the derivation of noise mitigation guidelines . . . . .	450
28.6. Conclusions and ongoing actions . . . . .	452
28.7. Acknowledgments . . . . .	453
28.8. Bibliography . . . . .	453

<b>Chapter 29. Reduction of the Underwater Radiated Noise by Ships: New Shipbuilding Challenge. The Vessels “Ramón Margalef” and “Ángeles Alvariño” as Technological References of How to Build Silent Vessels . . . . .</b>	455
Publio BELTRÁN PALOMO, Raul SALINAS MULLOR and Alfonso MORENO RODRÍGUEZ	
29.1. Introduction . . . . .	456
29.2. Case study: “Ramón Margalef” and “Ángeles Alvariño” . . . . .	461
29.2.1. Introduction . . . . .	461
29.2.2. Description and main particulars of the vessels. . . . .	462
29.2.3. The methodology: N&V integrated management . . . . .	462
29.2.4. Sea trial tests: results . . . . .	465
29.3. Conclusions . . . . .	470
29.4. Acknowledgments . . . . .	472
29.5. Bibliography . . . . .	472
<b>Chapter 30. Mitigation of Ground Vibrations from Freight Trains . . . . .</b>	475
Patrick VANHONACKER and Hamid MASOUMI	
30.1. Introduction . . . . .	475
30.2. Vibrations from freight trains . . . . .	476
30.3. Decomposing the vibration problem . . . . .	477
30.4. Numerical modeling . . . . .	478
30.5. Mitigation measure at the source . . . . .	479
30.5.1. Track geometry correction by tamping . . . . .	479
30.5.2. Rail roughness and grinding . . . . .	480
30.5.3. Track structure system . . . . .	481
30.6. Mitigation measure in propagation path . . . . .	485
30.7. Conclusions . . . . .	489
30.8. Acknowledgements . . . . .	489
30.9. Bibliography . . . . .	489
<b>Chapter 31. ACOUTRAIN: Virtual Certification of Acoustic Performance for Freight and Passenger Trains . . . . .</b>	491
Nicolas FURIO, Maria STARNBERG, Estelle BONGINI, David THOMPSON, Ulf ORRENIUS and Nathalie CUNY	
31.1. Introduction . . . . .	491
31.1.1. Current noise conformity assessment . . . . .	492
31.1.2. The simplified evaluation method . . . . .	492
31.2. Acoutrain: a European research project . . . . .	493
31.2.1. The simplified evaluation method in Acoutrain. . . . .	494
31.2.2. Virtual testing concept in Acoutrain . . . . .	496
31.2.3. VT-approaches and first recommendations . . . . .	498

31.3. Conclusion . . . . .	499
31.4. Acknowledgments . . . . .	500
31.5. Bibliography . . . . .	500
<b>Chapter 32. Additional Efficient Warning Sounds for Electric and Hybrid Vehicles . . . . .</b>	<b>501</b>
Etienne PARIZET, Ryan ROBART, Perceval PONDROM, Jean-Christophe CHAMARD, Guillaume BAUDET, David QUINN, Karl JANSSENS and Manfred HAIDER	
32.1. Introduction . . . . .	501
32.2. Detectability . . . . .	502
32.2.1. Procedure . . . . .	503
32.2.2. Results . . . . .	504
32.3. Sound meaning . . . . .	505
32.3.1. Procedure . . . . .	506
32.3.2. Results . . . . .	506
32.4. Unpleasantness . . . . .	508
32.4.1. Procedure . . . . .	508
32.4.2. Results . . . . .	508
32.5. Conclusion . . . . .	509
32.6. Acknowledgments . . . . .	510
32.7. Bibliography . . . . .	510
<b>List of Authors . . . . .</b>	<b>511</b>
<b>Index . . . . .</b>	<b>519</b>
