

## Table of Contents

<b>Foreword.</b> . . . . .	xi
Guy FRIJA	
<b>Chapter 1. Interactions between Radiation and Matter: Consequences for Detection and Medical Imaging.</b> . . . . .	1
Jean-Pierre MOY	
1.1. The limits of imaging using light . . . . .	1
1.2. Imaging with other types of radiation . . . . .	2
1.3. X-rays: their interaction with matter . . . . .	3
1.3.1. The production of X-rays . . . . .	3
1.3.2. Beer-Lambert's law . . . . .	5
1.3.3. The photoelectric effect . . . . .	5
1.3.4. Creation of pairs . . . . .	12
1.3.5. Deviation and loss of energy. The Compton effect . . . . .	13
1.3.6. Absorption and attenuation . . . . .	16
1.3.7. Chemical effects . . . . .	17
1.3.8. The dose . . . . .	18
1.4. Radiological imaging relies on the X-ray-matter interaction . . . . .	19
1.4.1. Image constitution . . . . .	19
1.4.2. Role of scattered radiation. . . . .	21
1.5. Consequences of interaction modes on detection. . . . .	22
1.5.1. Signal, noises . . . . .	23
1.5.2. Counting, integration. . . . .	28
1.5.3. Specific imaging problems . . . . .	29
1.6. Conclusion . . . . .	33
1.7. Bibliography . . . . .	33

<b>Chapter 2. Detectors for Medical Imaging</b> . . . . .	35
Hervé FANET	
2.1. Radiation-matter interaction and signal formation . . . . .	36
2.1.1. A simple case of a plane detector: phenomenological explanation . . . . .	36
2.1.2. General case of the multi-electrode detector and weighting field . . . . .	39
2.1.3. Case with a real detector . . . . .	46
2.1.4. Examples of the silicon detector and the strip or pixel detector . . .	49
2.1.5. Influence of the dimension of the detector . . . . .	54
2.1.6. How the problem can be made more complicated . . . . .	57
2.1.7. Uses of current pulses for measurement . . . . .	58
2.2. Flux, energy, time and position measurements . . . . .	64
2.2.1. Flux measurements . . . . .	64
2.2.2. Measurement of energy . . . . .	68
2.2.3. Electronic noise . . . . .	71
2.2.4. Time measurement . . . . .	80
2.2.5. Position measurements . . . . .	83
2.3. Semi-conductor detectors . . . . .	86
2.3.1. The solid state ionization chamber . . . . .	86
2.3.2. Junction semi-conductor detectors . . . . .	87
2.3.3. Photoconduction . . . . .	91
2.3.4. Semi-conductor materials for detection . . . . .	94
2.3.5. Silicon detectors . . . . .	97
2.3.6. Germanium detectors . . . . .	99
2.3.7. Cadmium telluride detectors . . . . .	101
2.4. Scintillation and measurement channel . . . . .	102
2.4.1. Scintillator-based channel . . . . .	102
2.4.2. Scintillation mechanisms . . . . .	104
2.4.3. Inorganic materials . . . . .	105
2.4.4. Organic materials . . . . .	106
2.4.5. Quality of time and energy measures . . . . .	107
2.4.6. Principles and use of photomultipliers . . . . .	110
2.4.7. Photocathode technology . . . . .	112
2.4.8. Coupling the scintillator and the photomultiplier . . . . .	113
2.4.9. Photodiodes . . . . .	114
2.5. Pixel detectors . . . . .	116
2.5.1. Major characteristics . . . . .	116
2.5.2. Imaging system technologies . . . . .	118
2.6. Bibliography . . . . .	121

<b>Chapter 3. Quantitative Digital Radiography Image Processing</b> . . . . .	123
Jean RINKEL and Jean-Marc DINTEN	
3.1. Introduction to flat-panel sensors . . . . .	123
3.1.1. X-ray detection techniques . . . . .	124
3.1.2. Performance evaluation . . . . .	126
3.1.3. Clinical applications . . . . .	128
3.2. Relation between physical quantities and radiographic acquisition . . . . .	129
3.2.1. Attenuation distribution . . . . .	129
3.2.2. Poly-chromaticity . . . . .	129
3.2.3. Scattered radiation . . . . .	130
3.2.4. Response of the sensor . . . . .	131
3.2.5. Synthesis . . . . .	132
3.3. Access to linear attenuation coefficients from the attenuation image . . . . .	133
3.3.1. Processes linked to sensor effects . . . . .	133
3.3.2. Correction of radiation scattered by the patient . . . . .	140
3.4. Access to physical dimensions by combining several X-rays of a flat sensor . . . . .	149
3.4.1. Dual-energy imaging . . . . .	149
3.4.2. Computed tomography with a flat sensor . . . . .	153
3.5. Conclusion . . . . .	158
3.6. Bibliography . . . . .	159
 <b>Chapter 4. X-Ray Tomography</b> . . . . .	 161
Françoise PEYRIN and Philippe DOUEK	
4.1. Introduction . . . . .	161
4.2. Principle of the first acquisition systems . . . . .	162
4.2.1. Translation-rotation systems: first and second generations . . . . .	162
4.2.2. Fan-beam systems: third and fourth generations . . . . .	164
4.3. Physical aspects and the direct problem . . . . .	165
4.3.1. Nature of the tomographic image . . . . .	165
4.3.2. Modeling of the physical phenomenon . . . . .	167
4.3.3. Data modeling . . . . .	168
4.4. Principle of tomographic image reconstruction . . . . .	169
4.4.1. Problem positioning . . . . .	169
4.4.2. Analytical methods . . . . .	170
4.4.3. Discrete methods . . . . .	176
4.4.4. Conclusion . . . . .	181
4.5. Evolution of X-ray scanners and reconstruction algorithms . . . . .	181
4.5.1. Spiral systems . . . . .	182
4.5.2. Truly 3D systems . . . . .	184

4.5.3. Spiral divergent systems . . . . .	186
4.5.4. Dual-source systems . . . . .	187
4.5.5. Introduction to dosimetry . . . . .	187
4.6. Examples of clinical applications . . . . .	189
4.6.1. Introduction . . . . .	189
4.6.2. Cardiac CT: ECG synchronization. . . . .	189
4.6.3. Perfusion imaging . . . . .	195
4.7. From tomography to micro-tomography. . . . .	198
4.7.1. Osteo-articular applications . . . . .	198
4.7.2. Peripheral tomography systems . . . . .	198
4.7.3. Micro-tomography systems . . . . .	199
4.8. Conclusion . . . . .	200
4.9. Bibliography . . . . .	201
<b>Chapter 5. Positron-Emission Tomography: Principles and Applications . . . . .</b>	<b>207</b>
Régine TRÉBOSSEN	
5.1. Introduction. . . . .	208
5.1.1. Definition . . . . .	208
5.1.2. PET compared with other molecular imaging techniques . . . . .	209
5.2. PET: principle and performance . . . . .	210
5.2.1. Radiopharmaceuticals . . . . .	210
5.2.2. The physical principle of PET . . . . .	211
5.2.3. Acquired data processing . . . . .	214
5.2.4. Reconstruction of images . . . . .	216
5.2.5. Main PET performance . . . . .	217
5.3. PET systems . . . . .	218
5.3.1. Detector . . . . .	218
5.3.2. PET systems . . . . .	221
5.3.3. Disposition of detectors . . . . .	221
5.3.4. Uniformity of spatial resolution in the field of view: measurement of interaction depth . . . . .	222
5.3.5. Measurement of time of flight . . . . .	222
5.4. PET for cancer staging . . . . .	223
5.4.1. Physiological basis . . . . .	223
5.4.2. Acquisition and reconstruction protocol . . . . .	224
5.4.3. Image interpretation: sensitivity and specificity . . . . .	224
5.5. Conclusion . . . . .	225
5.6. Bibliography . . . . .	226

<b>Chapter 6. Single Photon Imaging</b> . . . . .	229
Irène BUVAT	
6.1. Introduction. . . . .	229
6.2. Overview of single photon imaging . . . . .	230
6.2.1. Radiopharmaceuticals . . . . .	230
6.2.2. Detectors . . . . .	231
6.2.3. Signal processing . . . . .	232
6.3. Conventional detection systems in single photon imaging: the scintillation gamma camera. . . . .	233
6.3.1. Overview of a conventional scintillation gamma camera . . . . .	233
6.3.2. Options in the components of the scintillation camera . . . . .	235
6.3.3. Performances and use of conventional scintillation cameras . . . . .	239
6.4. Innovative systems: semiconductor detectors. . . . .	240
6.5. Tomographic reconstruction and corrections . . . . .	241
6.5.1. Tomographic reconstruction . . . . .	241
6.5.2. Corrections. . . . .	250
6.6. Hybrid detectors . . . . .	258
6.7. Applications . . . . .	259
6.8. Future developments . . . . .	261
6.9. Conclusion . . . . .	262
6.10. Bibliography . . . . .	262
<b>Chapter 7. Optical Imaging</b> . . . . .	267
Anabela DA SILVA	
7.1. Introduction. . . . .	267
7.2. Physics of luminous propagation in biological tissue . . . . .	268
7.2.1. Scales of measurement and resolution: different imaging techniques . . . . .	268
7.2.2. Light-matter interaction . . . . .	270
7.2.3. From direct to inverse problem. . . . .	277
7.3. Different optical imaging techniques for different applications . . . . .	289
7.3.1. Selecting ballistic or snake photons . . . . .	290
7.3.2. Multiscattered photons. . . . .	293
7.4. Conclusion . . . . .	312
7.5. Bibliography . . . . .	313
<b>List of Authors</b> . . . . .	325
<b>Index</b> . . . . .	327
