<b>Introduction</b> . . . . .	ix
<b>Chapter 1. Portfolio Size, Weights and Entropy-based Diversification</b> . . . . .	1
1.1. Mathematical notations . . . . .	4
1.2. Portfolio concentration and diversity measures . . . . .	5
1.2.1. Properties of a portfolio concentration measure . . . . .	6
1.2.2. The concentration ratio . . . . .	7
1.2.3. The Herfindahl–Hirschman index (HHI) . . . . .	8
1.2.4. The Lorenz curve and the Gini index . . . . .	11
1.2.5. Other concentration indices . . . . .	14
1.3. Entropy . . . . .	18
1.3.1. Defining Shannon entropy . . . . .	18
1.3.2. Cross entropy and divergence measures . . . . .	22
1.3.3. Other entropy functions . . . . .	23
1.3.4. Entropy-based portfolio optimization and diversification . . . . .	27
1.4. Conclusions on pure weights and entropy-based diversification . . . . .	29
<b>Chapter 2. Modern Portfolio Theory and Diversification</b> . . . . .	33
2.1. The mathematics of return and risk . . . . .	34
2.1.1. Modeling returns as random variables . . . . .	34
2.1.2. Portfolio return and risk statistics . . . . .	36
2.2. Modern Portfolio Theory (MPT) . . . . .	38
2.2.1. Maximizing utility . . . . .	38
2.2.2. Optimal and efficient portfolios . . . . .	39

---

2.3. Empirical applications . . . . .	43
2.3.1. Diversification at the asset level . . . . .	44
2.3.2. Diversification by industry sector and/or by country. . . . .	47
2.3.3. Diversification by decile. . . . .	54
2.3.4. Diversification by asset class . . . . .	56
2.3.5. International diversification and currencies . . . . .	57
2.3.6. A note on average correlations as a proxy for diversification benefits . . . . .	62
2.4. Using MPT in practice: key issues . . . . .	65
2.4.1. Approximation risk. . . . .	65
2.4.2. Estimation risk . . . . .	66
2.4.3. Impact on portfolio diversification. . . . .	70
2.5. Increasing the diversification of Markowitz portfolios . . . . .	75
2.5.1. Reducing estimation risk for input parameters. . . . .	75
2.5.2. Robust portfolio selection. . . . .	77
2.5.3. Adding constraints on the weights . . . . .	79
2.5.4. Combining several portfolio weights . . . . .	83
2.5.5. Using entropy in the objective function. . . . .	85
2.6. Conclusions on MPT . . . . .	89
<b>Chapter 3. Naive Portfolio Diversification . . . . .</b>	<b>91</b>
3.1. A (very) simplified model . . . . .	91
3.2. The law of average covariance . . . . .	92
3.3. The relative benefits of naive portfolio diversification . . . . .	94
3.4. Empirical tests . . . . .	96
3.4.1. Archer and Evans . . . . .	97
3.4.2. Subsequent studies . . . . .	99
3.4.3. Analytical (but incorrect) approximations . . . . .	107
3.5. Economic limits and statistical tests . . . . .	112
3.5.1. Tests based on variance or standard deviation . . . . .	113
3.5.2. Tests of portfolio improvement. . . . .	116
3.6. Naive versus Markowitz diversification . . . . .	117
3.7. Conclusions on naive diversification . . . . .	119
<b>Chapter 4. Risk-budgeting and Risk-based Portfolios . . . . .</b>	<b>123</b>
4.1. Risk measures and their properties . . . . .	124
4.2. The toolkit for portfolio risk attribution . . . . .	126
4.2.1. Marginal contributions to portfolio risk. . . . .	126
4.2.2. Total contributions to portfolio risk (TCR). . . . .	127

4.2.3. Percentage contributions to portfolio risk (PCR) . . . . .	128
4.2.4. Illustrations . . . . .	128
4.3. Risk allocation and risk parity approaches . . . . .	131
4.3.1. Naive risk parity . . . . .	131
4.3.2. Maimonides risk parity . . . . .	133
4.3.3. Equal risk contributions . . . . .	135
4.4. The maximum diversification approach . . . . .	138
4.4.1. The diversification ratio and its properties . . . . .	139
4.4.2. The most diversified portfolio . . . . .	142
4.4.3. Extensions of the most diversified portfolio . . . . .	144
4.5. The minimum variance approach . . . . .	146
4.5.1. The global minimum variance (GMV) portfolio . . . . .	146
4.5.2. The GMV portfolio and diversification . . . . .	147
4.5.3. The long-only GMV (LOGMV) portfolio . . . . .	149
4.5.4. The LOGMV portfolio and diversification . . . . .	149
4.5.5. Constrained MV portfolio construction . . . . .	150
4.5.6. Empirical properties . . . . .	152
4.6. Revisiting portfolio construction with a risk-based view . . . . .	153
4.7. Conclusions on risk-based approaches . . . . .	154
<b>Chapter 5. Factor Models and Portfolio Diversification . . . . .</b>	<b>157</b>
5.1. Factor models . . . . .	157
5.1.1. Introduction to factor models . . . . .	157
5.1.2. Examples of factors and factor models . . . . .	161
5.1.3. Viewing portfolios from a factor lens . . . . .	163
5.1.4. Portfolio diversification with factor models . . . . .	168
5.2. Principal component analysis (PCA) . . . . .	173
5.2.1. Introduction to PCA . . . . .	173
5.2.2. The mathematics behind principal components . . . . .	176
5.2.3. From principal components to eigen-portfolios . . . . .	178
5.2.4. Eigen-portfolios, diversification and effective number of bets . . . . .	182
5.2.5. Extensions to PCA . . . . .	185
5.2.6. Improving portfolio diversification by pre-clustering assets . . . . .	187
5.3. Conclusion on factor models . . . . .	188

---

<b>Chapter 6. Non-normal Return Distributions, Multi-period Models and Time Diversification</b> . . . . .	189
6.1. Non-normal returns . . . . .	189
6.1.1. Higher moments: examples of skewness and kurtosis . . . . .	190
6.1.2. Risk budgeting with higher moments . . . . .	197
6.1.3. The diversification delta . . . . .	198
6.1.4. Downside risk measures . . . . .	202
6.1.5. Extreme tail risk modeling . . . . .	202
6.1.6. Diversification and heavy tail distributions . . . . .	203
6.1.7. A note on conditional correlations . . . . .	205
6.2. Multi-period models and time diversification . . . . .	208
6.2.1. Long-run diversification and co-integration . . . . .	211
<b>Chapter 7. Portfolio Diversification in Practice</b> . . . . .	213
7.1. Households and the empirical diversification puzzle . . . . .	213
7.2. Diversification versus concentration . . . . .	216
7.3. Interpreting correlations: history, facts and fallacies . . . . .	219
7.3.1. Correlation versus trends . . . . .	220
7.3.2. Linear relationships only . . . . .	224
7.3.3. Other issues with correlation . . . . .	225
<b>Conclusion</b> . . . . .	227
<b>Bibliography</b> . . . . .	231
<b>Index</b> . . . . .	261
