Figure 12.6. *Urban heat island intensity in Sinop in 2018: average temperature difference (in degrees) per hour (row) and per month (column) between the center and the periphery (source: designed and created by the authors)*
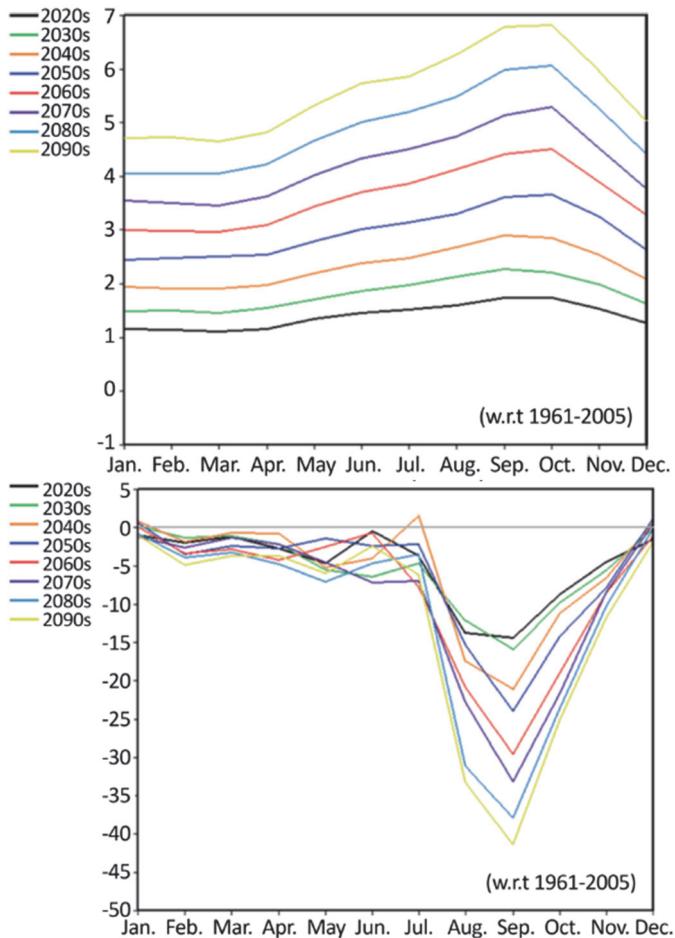

Figure 12.7. *Multi-model averages of the projected change in air temperature (top,°C) and precipitation (bottom, %) in the southern Amazon for the RCP8.5 scenario per decade over the period 2020–2100 relative to the baseline period 1961–2005 (source: Sampaio et al. 2018)*
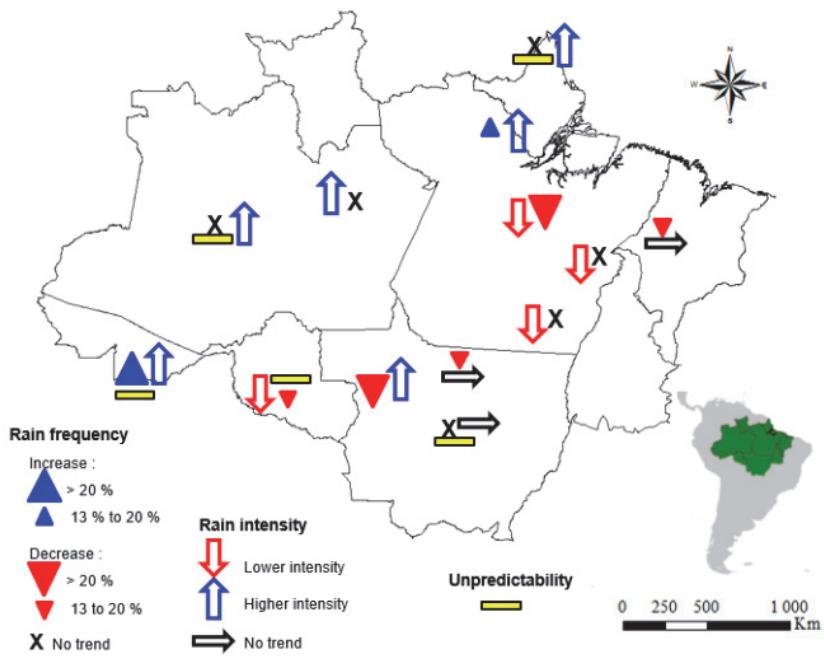

Figure 12.8. *Synthesis of perceptions of climate change in 13 Amazonian communities (source: based on Funatsu* et al. *2019)*
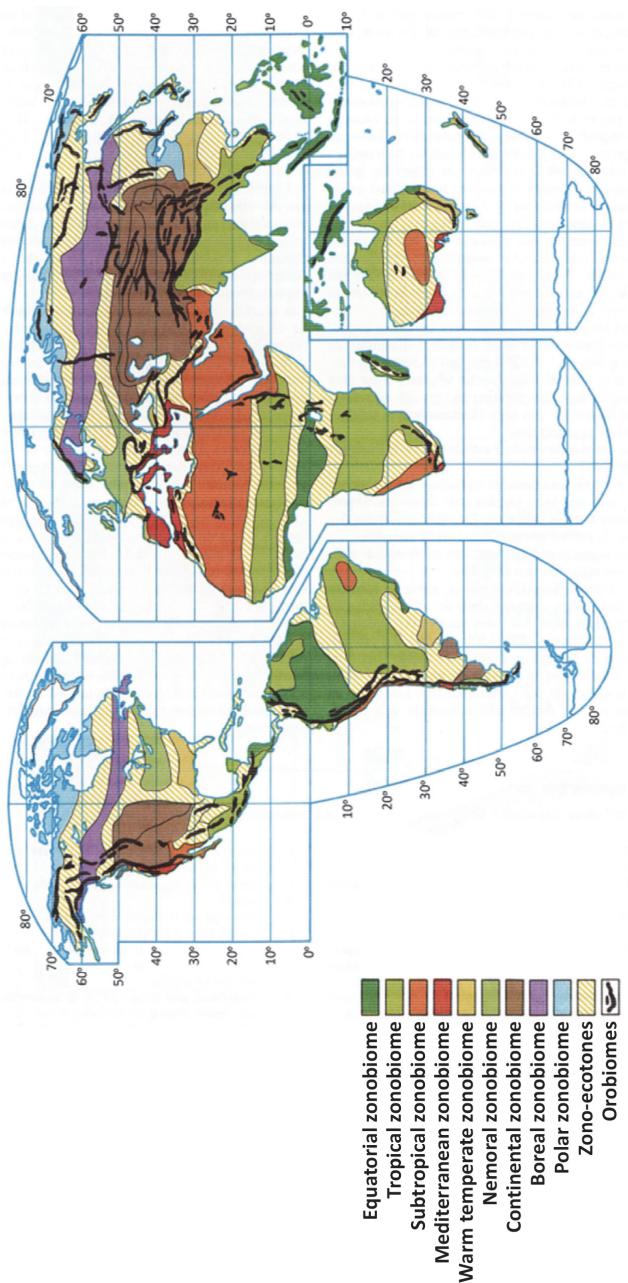

Figure 13.1. *Global map of terrestrial zonobiomes according to Walter (1976) classification (source: Heinrich and Hergt 1993)*

Equatorial zonobiome
Tropical zonobiome
Subtropical zonobiome
Mediterranean zonobiome
Warm temperate zonobiome
Nemoral zonobiome
Continental zonobiome
Boreal zonobiome
Polar zonobiome
Zono-ecotones
Orobiomes
