<b>Preface</b> . . . . .	ix
<b>Acknowledgments</b> . . . . .	xv
<b>Chapter 1. Introduction</b> . . . . .	1
1.1. History of algorithms . . . . .	3
1.2. Definition, structure and properties of algorithms . . . . .	4
1.2.1. Definition . . . . .	4
1.2.2. Structure and properties . . . . .	4
1.3. Development of an algorithm . . . . .	5
1.4. Data structures and algorithms . . . . .	6
1.5. Data structures – definition and classification . . . . .	7
1.5.1. Abstract data types . . . . .	7
1.5.2. Classification . . . . .	9
1.6. Algorithm design techniques . . . . .	9
1.7. Organization of the book . . . . .	11
<b>Chapter 2. Analysis of Algorithms</b> . . . . .	13
2.1. Efficiency of algorithms . . . . .	13
2.2. Apriori analysis . . . . .	15
2.3. Asymptotic notations . . . . .	17
2.4. Time complexity of an algorithm using the $O$ notation . . . . .	19
2.5. Polynomial time versus exponential time algorithms . . . . .	20
2.6. Average, best and worst case complexities . . . . .	21

2.7. Analyzing recursive programs. . . . .	23
2.7.1. Recursive procedures . . . . .	23
2.7.2. Apriori analysis of recursive functions . . . . .	27
2.8. Illustrative problems . . . . .	31
 <b>Chapter 3. Arrays</b> . . . . .	45
3.1. Introduction. . . . .	45
3.2. Array operations. . . . .	46
3.3. Number of elements in an array. . . . .	46
3.3.1. One-dimensional array. . . . .	46
3.3.2. Two-dimensional array . . . . .	47
3.3.3. Multidimensional array . . . . .	47
3.4. Representation of arrays in memory . . . . .	48
3.4.1. One-dimensional array. . . . .	49
3.4.2. Two-dimensional arrays . . . . .	51
3.4.3. Three-dimensional arrays . . . . .	52
3.4.4. N-dimensional array . . . . .	53
3.5. Applications . . . . .	54
3.5.1. Sparse matrix . . . . .	54
3.5.2. Ordered lists . . . . .	55
3.5.3. Strings . . . . .	56
3.5.4. Bit array . . . . .	58
3.6. Illustrative problems . . . . .	60
 <b>Chapter 4. Stacks</b> . . . . .	71
4.1. Introduction. . . . .	71
4.2. Stack operations . . . . .	72
4.2.1. Stack implementation . . . . .	73
4.2.2. Implementation of push and pop operations . . . . .	74
4.3. Applications . . . . .	76
4.3.1. Recursive programming . . . . .	76
4.3.2. Evaluation of expressions . . . . .	79
4.4. Illustrative problems . . . . .	83
 <b>Chapter 5. Queues</b> . . . . .	101
5.1. Introduction. . . . .	101
5.2. Operations on queues . . . . .	102
5.2.1. Queue implementation. . . . .	102
5.2.2. Implementation of insert and delete operations on a queue . . . . .	103

5.2.3. Limitations of linear queues. . . . .	105
5.3. Circular queues. . . . .	106
5.3.1. Operations on a circular queue . . . . .	106
5.3.2. Implementation of insertion and deletion operations in circular queue . . . . .	109
5.4. Other types of queues. . . . .	112
5.4.1. Priority queues . . . . .	112
5.4.2. Deques . . . . .	117
5.5. Applications . . . . .	119
5.5.1. Application of a linear queue . . . . .	119
5.5.2. Application of priority queues . . . . .	120
5.6. Illustrative problems . . . . .	125
 <b>Chapter 6. Linked Lists . . . . .</b>	 143
6.1. Introduction. . . . .	143
6.1.1. Drawbacks of sequential data structures . . . . .	143
6.1.2. Merits of linked data structures. . . . .	145
6.1.3. Linked lists – structure and implementation . . . . .	145
6.2. Singly linked lists . . . . .	147
6.2.1. Representation of a singly linked list . . . . .	147
6.2.2. Insertion and deletion in a singly linked list . . . . .	149
6.3. Circularly linked lists . . . . .	155
6.3.1. Representation. . . . .	155
6.3.2. Advantages of circularly linked lists over singly linked lists . . . . .	155
6.3.3. Disadvantages of circularly linked lists . . . . .	156
6.3.4. Primitive operations on circularly linked lists . . . . .	158
6.3.5. Other operations on circularly linked lists . . . . .	159
6.4. Doubly linked lists. . . . .	160
6.4.1. Representation of a doubly linked list. . . . .	161
6.4.2. Advantages and disadvantages of a doubly linked list . . . . .	162
6.4.3. Operations on doubly linked lists . . . . .	163
6.5. Multiply linked lists. . . . .	166
6.6. Unrolled linked lists. . . . .	171
6.6.1. Retrieval of an element . . . . .	172
6.6.2. Insert an element . . . . .	172
6.6.3. Delete an element. . . . .	173
6.7. Self-organizing lists. . . . .	175
6.8. Applications . . . . .	175
6.8.1. Addition of polynomials. . . . .	176
6.8.2. Sparse matrix representation . . . . .	178
6.9. Illustrative problems . . . . .	182

<b>Chapter 7. Linked Stacks and Linked Queues . . . . .</b>	201
7.1. Introduction . . . . .	201
7.1.1. Linked stack . . . . .	202
7.1.2. Linked queues . . . . .	203
7.2. Operations on linked stacks and linked queues . . . . .	203
7.2.1. Linked stack operations . . . . .	203
7.2.2. Linked queue operations . . . . .	204
7.2.3. Algorithms for Push/Pop operations on a linked stack . . . . .	205
7.2.4. Algorithms for insert and delete operations in a linked queue. . . . .	206
7.3. Dynamic memory management and linked stacks . . . . .	209
7.4. Implementation of linked representations . . . . .	214
7.5. Applications . . . . .	216
7.5.1. Balancing symbols . . . . .	216
7.5.2. Polynomial representation. . . . .	218
7.6. Illustrative problems . . . . .	222
