Introduction	xi
Chapter 1. Positioning Territorial Ecology in the Scientific and Institutional Context	1
1.1. Positioning of territorial ecology from a scientific point of view	2
1.1.1. Urban ecology	3
1.1.2. Industrial ecology	6
1.1.3. From industrial ecology to industrial and territorial ecology	9
1.1.4. The social ecology of Vienna	11
1.1.5. Toward a territorial ecology	12
1.2. Positioning in the institutional context	16
1.2.1. The evolution of concepts around sustainability	17
1.2.2. From industrial ecology to circular economy	20
1.2.3. A variation of circularity: the bioeconomy	22
1.2.4. An effective consideration of the stakes	23
1.3. Conclusion	25

Chapter 2. Main Methodologies Developed Around Urban and Territorial Metabolism: Contributions and Limitations	27
2.1. The main principles of metabolism	27
2.1.1. Plurality of objectives and methods	28
2.1.2. The implementation of the Eurostat method at the territorial level	30
2.1.3. A tool for analysis and comparison between territories.	32
2.2. The rise of social metabolism and the territorial footprint	35
2.2.1. The different facets of the place of energy in metabolism	36
2.2.2. The central place of the footprint	39
2.2.3. ... as well as the place of water	43
2.2.4. The stakes of social metabolism	48
2.3. Contributing to better knowledge of territorial issues	50
2.3.1. A more participatory approach	51
2.3.2. A more territorially focused approach.	53
2.4. Conclusion	54
Chapter 3. A Wealth Creation Approach for a Territorial Diagnosis Methodology	57
3.1. The model of wealth creation subsystems	59
3.1.1. The starting model	60
3.1.2. Multiple questions	66
3.2. Methods of analysis of the relationships between stakeholders within the territorial metabolism	69
3.2.1. Which stakeholders should be taken into account?	70
3.2.2. How to take into account the relationships between stakeholders?	74
3.3. Conclusion	89
Chapter 4. Territorial Ecology and the Challenges of the Socio-ecological Transition: Metabolism, Capacity and Resilience	91
4.1. Capabilities	92
4.1.1. The rise of individualistic freedom.	92
4.1.2. A certain approach to freedom	94
4.1.3. Individual capabilities or collective capabilities	95

4.1.4. Territory and capabilities	100
4.2. Better integration of the relationship to the environment within the metabolism	102
4.2.1. Socio-ecosystems and nature's contribution to people.	104
4.2.2. A socio-ecosystemic approach to wealth.	105
4.3. Territorial capability and resilience: a means to tackle transition issues.	109
4.3.1. Vulnerability and resilience	110
4.3.2. Capability and resilience of territorial systems	112
4.3.3. Beaufort cheese: between vulnerability and resilience.	116
4.4. Conclusion.	124
Chapter 5. Principles for Innovative Territorial Projects	127
5.1. Conventional regimes and principles	130
5.1.1. Conventions.	130
5.1.2. Conventional values and reference points	132
5.1.3. Conventional regimes	134
5.2. From the dominant conventional regime to a more sustainable one	135
5.2.1. The basis of the dominant conventional regime	136
5.2.2. What might the characteristics be of a sustainable conventional regime?	141
5.3. Toward innovative regional projects.	150
5.3.1. What innovation?	151
5.3.2. Local initiatives at the heart of the alternative regime	152
5.3.3. Is there a rise of an alternative regime?	154
5.3.4. The key role of politics	158
5.4. Conclusion.	159
Conclusion	161
