Preface	xi
Yannis DIMOTIKALIS, Alex KARAGRIGORIOU, Christina PARPOULA and Christos H. SKIADAS	
Part 1. Financial and Demographic Modeling Techniques	1
Chapter 1. Data Mining Application Issues in the Taxpayer Selection Process	3
Mauro BARONE, Stefano PISANI and Andrea SPINGOLA	
1.1. Introduction	3
1.2. Materials and methods	5
1.2.1. Data	5
1.2.2. Interesting taxpayers	6
1.2.3. Enforced tax recovery proceedings	9
1.2.4. The models	11
1.3. Results	13
1.4. Discussion	23
1.5. Conclusion	23
1.6. References	24
Chapter 2. Asymptotics of Implied Volatility in the Gatheral Double Stochastic Volatility Model	27
Mohammed ALBUHAYRI, Anatoliy MALYARENKO, Sergei SILVESTROV, Ying NI, Christopher ENGSTRÖM, Finnan TEWOLDE and Jiahui ZHANG	
2.1. Introduction	27
2.2. The results	30
2.3. Proofs	30
2.4. References	38

Chapter 3. New Dividend Strategies	39
Ekaterina BULINSKAYA	
3.1. Introduction	39
3.2. Model 1	41
3.3. Model 2	48
3.4. Conclusion and further results	51
3.5. Acknowledgments	51
3.6. References	52
Chapter 4. Introduction of Reserves in Self-adjusting Steering of Parameters of a Pay-As-You-Go Pension Plan	53
Keivan DIAKITE, Abderrahim OULIDI and Pierre DEVOLDER	
4.1. Introduction	53
4.2. The pension system	54
4.3. Theoretical framework of the Musgrave rule	57
4.4. Transformation of the retirement fund	60
4.5. Conclusion	63
4.6. References	64
Chapter 5. Forecasting Stochastic Volatility for Exchange Rates using EWMA	65
Jean-Paul MURARA, Anatoliy MALYARENKO, Milica RANCIC and Sergei SILVESTROV	
5.1. Introduction	65
5.2. Data	66
5.3. Empirical model	67
5.4. Exchange rate volatility forecasting	69
5.5. Conclusion	73
5.6. Acknowledgments	73
5.7. References	74
Chapter 6. An Arbitrage-free Large Market Model for Forward Spread Curves	75
Hossein NOHROUZIAN, Ying NI and Anatoliy MALYARENKO	
6.1. Introduction and background	75
6.1.1. Term-structure (interest rate) models	76
6.1.2. Forward-rate models versus spot-rate models	77
6.1.3. The Heath–Jarrow–Morton framework	77
6.1.4. Construction of our model	78
6.2. Construction of a market with infinitely many assets	79
6.2.1. The Cuchiero–Klein–Teichmann approach	79

6.2.2. Adapting Cuchiero–Klein–Teichmann’s results to our objective . . .	82
6.3. Existence, uniqueness and non-negativity	82
6.3.1. Existence and uniqueness: mild solutions	83
6.3.2. Non-negativity of solutions	85
6.4. Conclusion and future works	87
6.5. References	88

Chapter 7. Estimating the Healthy Life Expectancy (HLE) in the Far Past: The Case of Sweden (1751–2016) with Forecasts to 2060 91
 Christos H. SKIADAS and Charilaos SKIADAS

7.1. Life expectancy and healthy life expectancy estimates	92
7.2. The logistic model	94
7.3. The HALE estimates and our direct calculations	95
7.4. Conclusion	96
7.5. References	96

Chapter 8. Vaccination Coverage Against Seasonal Influenza of Workers in the Primary Health Care Units in the Prefecture of Chania 97
 Aggeliki MARAGKAKI and George MATALLIOTAKIS

8.1. Introduction	98
8.2. Material and method	98
8.3. Results	101
8.4. Discussion	105
8.5. References	107

Chapter 9. Some Remarks on the Coronavirus Pandemic in Europe 109
 Konstantinos ZAFEIRIS and Marianna KOUKLI

9.1. Introduction	109
9.2. Background	110
9.2.1. CoV pathogens	110
9.2.2. Clinical characteristics of COVID-19	111
9.2.3. Diagnosis	113
9.2.4. Epidemiology and transmission of COVID-19	113
9.2.5. Country response measures	115
9.2.6. The role of statistical research in the case of COVID-19 and its challenges	119
9.3. Materials and analyses	119
9.4. The first phase of the pandemic	121

9.5. Concluding remarks	126
9.6. References	127
Part 2. Applied Stochastic and Statistical Models and Methods	135
Chapter 10. The Double Flexible Dirichlet: A Structured Mixture Model for Compositional Data	137
Roberto ASCARI, Sonia MIGLIORATI and Andrea ONGARO	
10.1. Introduction	138
10.1.1. The flexible Dirichlet distribution	139
10.2. The double flexible Dirichlet distribution	140
10.2.1. Mixture components and cluster means	141
10.3. Computational and estimation issues	144
10.3.1. Parameter estimation: the EM algorithm	145
10.3.2. Simulation study	148
10.4. References	151
Chapter 11. Quantization of Transformed Lévy Measures	153
Mark Anthony CARUANA	
11.1. Introduction	153
11.2. Estimation strategy	156
11.3. Estimation of masses and the atoms	159
11.4. Simulation results	165
11.5. Conclusion	166
11.6. References	167
Chapter 12. A Flexible Mixture Regression Model for Bounded Multivariate Responses	169
Agnese M. DI BRISCO and Sonia MIGLIORATI	
12.1. Introduction	169
12.2. Flexible Dirichlet regression model	170
12.3. Inferential issues	172
12.4. Simulation studies	173
12.4.1. Simulation study 1: presence of outliers	174
12.4.2. Simulation study 2: generic mixture of two Dirichlet distributions	179
12.4.3. Simulation study 3: FD distribution	180
12.5. Discussion	182
12.6. References	183

Chapter 13. On Asymptotic Structure of the Critical Galton–Watson Branching Processes with Infinite Variance and Allowing Immigration	185
Azam A. IMOMOV and Erkin E. TUKHTAEV	
13.1. Introduction	185
13.2. Invariant measures of GW process	187
13.3. Invariant measures of GWPI	190
13.4. Conclusion	193
13.5. References	194
Chapter 14. Properties of the Extreme Points of the Joint Eigenvalue Probability Density Function of the Wishart Matrix	195
Asaph Keikara MUHUMUZA, Karl LUNDENGÅRD, Sergei SILVESTROV, John Magero MANGO and Godwin KAKUBA	
14.1. Introduction	195
14.2. Background	196
14.3. Polynomial factorization of the Vandermonde and Wishart matrices	197
14.4. Matrix norm of the Vandermonde and Wishart matrices	200
14.5. Condition number of the Vandermonde and Wishart matrices	203
14.6. Conclusion	206
14.7. Acknowledgments	206
14.8. References	207
Chapter 15. Forecast Uncertainty of the Weighted TAR Predictor	211
Francesco GIORDANO and Marcella NIGLIO	
15.1. Introduction	211
15.2. SETAR predictors and bootstrap prediction intervals	214
15.3. Monte Carlo simulation	218
15.4. References	222
Chapter 16. Revisiting Transitions Between Superstatistics	223
Petr JIZBA and Martin PROKŠ	
16.1. Introduction	223
16.2. From superstatistic to transition between superstatistics	224
16.3. Transition confirmation	225
16.4. Beck’s transition model	227
16.5. Conclusion	230
16.6. Acknowledgments	231
16.7. References	231

Chapter 17. Research on Retrial Queue with Two-Way Communication in a Diffusion Environment	233
Viacheslav VAVILOV	
17.1. Introduction	233
17.2. Mathematical model	234
17.3. Asymptotic average characteristics	236
17.4. Deviation of the number of applications in the system	241
17.5. Probability distribution density of device states	247
17.6. Conclusion	248
17.7. References	248
