| <b>Preface</b> . . . . .  | xi   |
| <b>Acknowledgments</b> . . . . .  | xv   |
| <b>List of Acronyms</b> . . . . .   | xvii |
| <b>Chapter 1. Classification of Civil, Industrial and Medical Nuclear Accidents</b> . . . . . | 1    |
| 1.1. Nuclear accident or radiological accident? . . . . .                                     | 2    |
| 1.2. Classification of nuclear accidents. Incident or accident? . . . . .                     | 3    |
| 1.2.1. Application of the INES in France . . . . .  | 5    |
| 1.2.2. Application of the INES at the international level. . . . .                            | 6    |
| 1.2.3. Other classifications of nuclear accidents. . . . .                                    | 6    |
| 1.2.4. The NAMS classification . . . . .  | 6    |
| 1.3. Classification of radiological accidents . . . . .                                       | 7    |
| 1.4. The typology of accidents . . . . .  | 9    |
| 1.4.1. Criticality accidents . . . . .  | 10   |
| 1.4.2. Accidents in nuclear power reactors . . . . .  | 11   |
| 1.4.3. Losses of radioactive sources . . . . .  | 11   |
| 1.4.4. Radiotherapy accidents . . . . .   | 12   |
| 1.4.5. Terrorist attacks . . . . .  | 12   |
| 1.5. What are the main nuclear accidents? . . . . .   | 12   |
| 1.6. Information on nuclear energy. . . . .   | 17   |
| <b>Chapter 2. Accidents Related to Nuclear Power Production</b> . . . . .                     | 19   |
| 2.1. Introduction. . . . .  | 19   |
| 2.2. Accidents in the nuclear fuel cycle . . . . .  | 19   |

---

|   |           |
|---|-----------|
| 2.2.1. Uranium mines . . . . .  | 20        |
| 2.2.2. Milling, conversion, enrichment and fuel manufacturing plants . . . . .  | 22        |
| 2.2.3. Nuclear reactors . . . . .   | 22        |
| 2.2.4. Spent fuel reprocessing plants . . . . .                                 | 29        |
| 2.3. Accidents in laboratories . . . . .  | 33        |
| 2.3.1. Chalk River laboratories . . . . .                                       | 33        |
| 2.3.2. French study centers . . . . .   | 34        |
| 2.4. Other accidents . . . . .  | 35        |
| 2.4.1. Accidents in civil engineering . . . . .                                 | 35        |
| 2.4.2. Accidents in nuclear propulsion . . . . .                                | 36        |
| 2.5. Waste management incidents . . . . .                                       | 36        |
| 2.6. Incidents in the transport of radioactive packages . . . . .               | 37        |
| 2.7. Environmental consequences . . . . .                                       | 38        |
| 2.7.1. Uranium mines . . . . .  | 38        |
| 2.7.2. Tokai-Mura . . . . .   | 39        |
| 2.7.3. Saint-Laurent-des-Eaux . . . . .   | 39        |
| 2.7.4. Three Mile Island . . . . .  | 40        |
| 2.7.5. Church Rock . . . . .  | 41        |
| 2.7.6. La Hague . . . . .   | 41        |
| 2.7.7. Chalk River . . . . .  | 41        |
| 2.7.8. Simi Valley . . . . .  | 42        |
| 2.8. Health consequences . . . . .  | 42        |
| 2.8.1. Uranium miners . . . . .   | 42        |
| 2.8.2. Workers in the nuclear industry . . . . .                                | 44        |
| 2.8.3. Simi Valley . . . . .  | 47        |
| 2.8.4. Tokai-Mura . . . . .   | 48        |
| 2.8.5. Lucens . . . . .   | 49        |
| 2.8.6. Three Mile Island . . . . .  | 49        |
| 2.8.7. Church Rock . . . . .  | 50        |
| 2.8.8. La Hague . . . . .   | 50        |
| 2.8.9. Chalk River . . . . .  | 51        |
| 2.8.10. Ruthenium 106 releases in Russia in September 2017 . . . . .            | 51        |
| 2.9. The cost of accidents . . . . .  | 52        |
| 2.11. Conclusions . . . . .   | 54        |
| <b>Chapter 3. The Extremely Serious Nuclear Accident at Chernobyl . . . . .</b> | <b>57</b> |
| 3.1. Introduction . . . . .   | 57        |
| 3.2. The facts . . . . .  | 58        |
| 3.2.1. The Chernobyl site and the nuclear power plant . . . . .                 | 58        |
| 3.2.2. The accident . . . . .   | 58        |
| 3.2.3. The core and the sarcophage . . . . .                                    | 59        |
| 3.2.4. Atmospheric emissions . . . . .  | 59        |

---

|   |            |
|---|------------|
| 3.2.5. The dispersion of radionuclides . . . . .                                | 60         |
| 3.2.6. Radioactive fallout . . . . .  | 61         |
| 3.2.7. Accident management . . . . .  | 64         |
| 3.2.8. Countermeasures carried out at Chernobyl . . . . .                       | 67         |
| 3.3. Spatial and environmental consequences . . . . .                           | 68         |
| 3.3.1. Atmospheric contamination . . . . .                                      | 68         |
| 3.3.2. Soil contamination . . . . .   | 69         |
| 3.3.3. Surface water contamination . . . . .                                    | 69         |
| 3.3.4. Groundwater contamination . . . . .                                      | 70         |
| 3.3.5. Forest contamination . . . . .   | 71         |
| 3.3.6. Contamination of the aquatic environment . . . . .                       | 74         |
| 3.3.7. Contamination of the marine environment . . . . .                        | 76         |
| 3.4. Ecological consequences of the Chernobyl accident. . . . .                 | 76         |
| 3.4.1. The three phases . . . . .   | 76         |
| 3.4.2. Effects at molecular level . . . . .                                     | 78         |
| 3.4.3. Genetic effects . . . . .  | 80         |
| 3.4.4. Morphological and physiological effects on individuals . . . . .         | 86         |
| 3.4.5. Effects on individual reproduction (sex, sex-ratio, fertility) . . . . . | 88         |
| 3.4.6. Effects on populations (age, abundance, longevity) . . . . .             | 89         |
| 3.4.7. Effects on ecosystem structure and functioning . . . . .                 | 92         |
| 3.4.8. Partial conclusion . . . . .   | 93         |
| 3.5. Health consequences . . . . .  | 94         |
| 3.5.1. Implications for large organisms . . . . .                               | 94         |
| 3.5.2. The main contributions to exposure . . . . .                             | 97         |
| 3.5.3. Population exposure . . . . .  | 97         |
| 3.5.4. Cancer pathologies . . . . .   | 100        |
| 3.5.5. Non-cancerous pathologies . . . . .                                      | 106        |
| 3.5.6. Mortalities resulting from the Chernobyl accident . . . . .              | 112        |
| 3.6. Social consequences. . . . .   | 115        |
| 3.6.1. Psychological disorders among liquidators. . . . .                       | 115        |
| 3.6.2. Psychological disorders in evacuated populations. . . . .                | 116        |
| 3.7. Consequences in Europe and France . . . . .                                | 119        |
| 3.7.1. The impact of Chernobyl in Europe . . . . .                              | 119        |
| 3.7.2. The impact of Chernobyl in France . . . . .                              | 123        |
| 3.7.3. Cases of thyroid cancer in France . . . . .                              | 128        |
| 3.8. Economic consequences . . . . .  | 130        |
| 3.9. Long-term management of the Chernobyl accident . . . . .                   | 131        |
| 3.10. Conclusion . . . . .  | 132        |
| <b>Chapter 4. Fukushima's Serious Nuclear Accidents . . . . .</b>               | <b>135</b> |
| 4.1. Introduction. . . . .  | 135        |
| 4.2. The course of the Fukushima accidents . . . . .                            | 136        |

|   |            |
|---|------------|
| 4.2.1. The facts . . . . .  | 136        |
| 4.2.2. Atmospheric emissions . . . . .  | 139        |
| 4.2.3. Marine discharges . . . . .  | 140        |
| 4.3. Actions taken by the Japanese authorities . . . . .  | 141        |
| 4.3.1. Evacuation of the populations . . . . .  | 141        |
| 4.3.2. Distribution of iodine tablets to children . . . . .   | 144        |
| 4.3.3. Exposure limits for nuclear workers and the public. . . . .  | 144        |
| 4.3.4. Regulatory values and food monitoring. . . . .   | 145        |
| 4.3.5. Decontamination tests of crop production . . . . .   | 147        |
| 4.3.6. Decontamination and waste management. . . . .  | 147        |
| 4.3.7. The restructuring of the Japanese nuclear industry . . . . .   | 149        |
| 4.3.8. Compensation of victims . . . . .  | 149        |
| 4.4. Environmental contamination . . . . .  | 150        |
| 4.4.1. Contamination of the atmosphere . . . . .  | 150        |
| 4.4.2. Contamination of the terrestrial environment . . . . .   | 152        |
| 4.4.3. Forest contamination . . . . .   | 155        |
| 4.4.4. Bird contamination . . . . .   | 158        |
| 4.4.5. Contamination of freshwater environments . . . . .   | 158        |
| 4.4.6. Contamination of the marine environment . . . . .  | 159        |
| 4.4.7. Contamination of agricultural products and foodstuffs. . . . .   | 165        |
| 4.5. Exposure and effects on flora and fauna . . . . .  | 170        |
| 4.5.1. Exposure and effects on forests. . . . .   | 171        |
| 4.5.2. Exposure and effects on birds. . . . .   | 172        |
| 4.5.3. Exposure and effects on other terrestrial organisms. . . . .   | 174        |
| 4.5.4. Exposure and effects on freshwater organisms . . . . .   | 175        |
| 4.5.5. Exposure and effects on marine organisms. . . . .  | 175        |
| 4.6. Health consequences . . . . .  | 177        |
| 4.6.1. Consequences for the local human population. . . . .   | 177        |
| 4.6.2. The consequences for nuclear workers . . . . .   | 184        |
| 4.6.3. Consequences on the world population (excluding Japan). . . . .  | 187        |
| 4.7. Economic consequences . . . . .  | 188        |
| 4.8. The situation in 2016 and 2017 . . . . .   | 189        |
| 4.8.1. The current situation of the Fukushima nuclear facilities . . . . .  | 189        |
| 4.8.2. The time course of freshwater contamination . . . . .  | 190        |
| 4.8.3. The first returns and return intentions of the evacuated populations following the accident at the Fukushima Daiichi power plant . . . . . | 192        |
| 4.9. Conclusions. . . . .   | 192        |
| <b>Chapter 5. Industrial and Medical Radiology Accidents . . . . .</b>  | <b>195</b> |
| 5.1 Introduction . . . . .  | 195        |
| 5.2. Industrial and medical applications. . . . .   | 196        |

---

|   |     |
|---|-----|
| 5.2.1. Non-destructive industrial testing . . . . .   | 196 |
| 5.2.2. Industrial synthesis reactions and mechanical and chemical transformations . . . . . | 197 |
| 5.2.3. Environmental remediation and waste treatment by irradiation . . . . .               | 198 |
| 5.2.4. Agri-food applications . . . . .   | 199 |
| 5.2.5. Medical applications . . . . .   | 200 |
| 5.3. Radiological criticality accidents . . . . .   | 202 |
| 5.4. Radiological accidents related to the loss of radioactive sources . . . . .            | 203 |
| 5.4.1. Loss of radioactive sources and public exposure . . . . .                            | 205 |
| 5.4.2. The main causes of loss of radioactive sources . . . . .                             | 211 |
| 5.4.3. Nuclear accidents related to the loss of radioactive sources . . . . .               | 212 |
| 5.5. Radiological accidents with radioactive sources and industrial accelerators . . . . .  | 215 |
| 5.6. Medical radiological accidents . . . . .   | 219 |
| 5.6.1. Historical accidents involving the use of radiotherapy . . . . .                     | 219 |
| 5.6.2. Radiological accidents with medicinal radioactive sources . . . . .                  | 220 |
| 5.6.3. Brachytherapy and brachytherapy accidents . . . . .                                  | 225 |
| 5.6.4. Interventional radiology by fluoroscopy . . . . .                                    | 226 |
| 5.6.5. Secondary cancers . . . . .  | 227 |
| 5.7. Conclusions. . . . .   | 227 |
| <b>Conclusion</b> . . . . .   | 229 |
| <b>Glossary</b> . . . . .   | 239 |
| <b>References</b> . . . . .   | 249 |
| <b>Index</b> . . . . .  | 309 |
