Introduction	xi
Dominique CARRÉ and Geneviève VIDAL	
Chapter 1. A Sociohistorical Approach: Moving Closer Together Through Detachment from Care Practices	1
Dominique CARRÉ	
1.1. The shift to ambulatory care: digitalized as a structuring framework	3
1.2. Innovation and technology: the position given to digital ICT	5
1.3. Distance and proximity: medical biology and medical imaging	7
1.4. Distance and proximity: development of remote health services between the pandemic and a shortage in care provision	9
1.5. Connected objects?	12
1.6. Connected objects at the frontiers of “well-being” and “healthcare”	14
1.7. Illustration of a “gray” zone	17
1.8. Arrival of new disruptive inputs in the healthcare field	19
1.9. Increase in data and data sovereignty in healthcare	23

1.10. Increase in sociotechnical mediations, strengthening a process of moving closer together through detachment and connected uses	25
1.11. References	28
Chapter 2. Connected Sleep: From Individualizing to Modeling the Doctor–Patient Relationship	31
Christian PAPILLOU, Geneviève VIDAL and Yanita ANDONOVA	
2.1. Methodology	33
2.2. Category A: practices and uses of digital devices and connected objects	34
2.2.1. Data as a tool for legitimization	35
2.2.2. Control as a way of guaranteeing legitimacy	38
2.2.3. Effectiveness of the technology	41
2.2.4. The horizon of developing technology	43
2.3. Category B: doctor–patient relationships mediated by technology	44
2.3.1. The doctor–patient relationship	45
2.3.2. Trust	47
2.3.3. Reticular extension of the doctor–patient relationship and involvement of the patient in their own treatment	49
2.3.4. Service providers and their technicians	50
2.4. Category C: challenges of automation in the doctor–patient relationship	51
2.4.1. The doctor–patient relationship faced with a sharp increase in technological devices	52
2.4.2. The evolution of available technology	55
2.4.3. The doctor’s responsibility	56
2.4.4. The daily influence of technology	57
2.5. Determining the legitimacy of monitoring technology	58
2.5.1. Specialization versus multitasking	61
2.5.2. Proximity of patients and delegation of the relationship	63
2.5.3. Responsibility	66
2.6. Discussion	68
2.7. Conclusion	72
2.8. References	73

Chapter 3. Digital Devices in Psychiatry and Mental Health	77
Étienne HIEN	
3.1. Mental health and psychiatry	81
3.2. Projects and technical devices in psychiatry and mental health	82
3.3. Innovations in health: the question of technical determinism	88
3.4. Innovations in health: between technical solutionism and social control?	91
3.5. Economic challenges and health data security	95
3.6. Conclusion.	96
3.7. References.	98
Chapter 4. Connected Devices in Health: Between Mobilization, Experimentation, Assessment and Data Protection	105
Sarah SANDRÉ	
4.1. The appeal of connected objects in the field of health.	107
4.1.1. An incentive-based policy concerning the deployment of connected objects in healthcare	108
4.1.2. “Intermediate” actors, relays of this doctrine?	112
4.1.3. Promises of connected objects for monitoring chronic illnesses	116
4.2. Complexity of rolling out connected objects	118
4.2.1. Evaluating connected objects in health: a precursor to legal risk management.	119
4.2.2. The imperative of protection of health data – law as an evaluation tool.	122
4.3. Prospects: the humanities and social sciences remain too absent from the assessment of connected devices in healthcare	127
4.4. References.	128

Chapter 5. Medical Care and Data: The Example of Nanomedicine in Europe	131
Christian PAPILLOUD	
5.1. Satellization or influence by alliance	133
5.2. Nanomedicine, the challenge of renewed influence	135
5.3. Doubts and decisions	138
5.4. From nanomedicine to precision medicine.	141
5.5. KETs, a new challenge for satellization	144
5.6. Conclusion	151
5.7. References	152
Chapter 6. Sociopolitical Challenges of Digital Uses.	159
Geneviève VIDAL	
6.1. The digitalization of society	161
6.2. Acceptability, ambivalence of uses.	175
6.3. Sociopolitical challenges of the relationship between healthcare and digital technology: conditional uses and the capacity to act	183
6.4. References	188
Conclusion	195
Dominique CARRÉ, Geneviève VIDAL, Christian PAPILLOUD, Yanita ANDONOVA, Étienne HIEN and Sarah SANDRÉ
