

# Contents

<b>Foreword</b> . . . . .	xiii
Samuel FOREST	
<b>Introduction</b> . . . . .	xvii
Emmanuel RICHAUD	
<b>Chapter 1. Mechanistic Investigations of the Photo- and Thermo-oxidation of Polyethylene</b> . . . . .	1
Sandrine THÉRIAS and Jean-Luc GARDETTE	
1.1. Introduction. . . . .	1
1.2. Oxidative degradation of PE. . . . .	2
1.2.1. Analytical methods for monitoring the oxidation process . . . . .	2
1.2.2. Photo-oxidation of PE . . . . .	5
1.2.3. Thermo-oxidation of polyethylene: comparison with photo-oxidation . . . . .	8
1.3. Effects of light intensity and temperature on the photodegradation . . . . .	11
1.4. Conclusion . . . . .	14
1.5. References . . . . .	15

<b>Chapter 2. Formulation and Aging of Plasticized PVC</b> . . . . .	21
Sophie CANTIN and Odile FICHET	
2.1. Polyvinyl chloride . . . . .	22
2.1.1. Molecular synthesis and structure . . . . .	23
2.1.2. Physical and chemical properties of PVC . . . . .	23
2.1.3. Formulation . . . . .	24
2.1.4. Nature and role of plasticizers . . . . .	24
2.2. Aging of PVC . . . . .	26
2.2.1. Chemical degradation . . . . .	26
2.2.2. Thermal degradation . . . . .	26
2.2.3. Oxidation . . . . .	27
2.2.4. Dehydrochlorination . . . . .	28
2.2.5. Stabilizers . . . . .	29
2.2.6. Correlation between different degradation processes . . . . .	30
2.2.7. Plasticizer migration . . . . .	31
2.2.8. Characterization of plasticizer loss . . . . .	31
2.2.9. Plasticizer migration mechanisms . . . . .	31
2.2.10. Factors influencing plasticizer loss . . . . .	33
2.3. Aging of PVC according to conditions of use: examples from everyday life . . . . .	34
2.3.1. PVC in medical devices . . . . .	34
2.3.2. PVC as an electrical insulator . . . . .	36
2.3.3. PVC in cultural heritage collections . . . . .	37
2.4. Conclusion . . . . .	39
2.5. References . . . . .	39
 <b>Chapter 3. Aging of Aliphatic Polyamides</b> . . . . .	 43
Frédérique PÉRY and François FERNAGUT	
3.1. Thermo-oxidation mechanism of aliphatic polyamides (PAs) . . . . .	43
3.1.1. Initiation/propagation of thermo-oxidation: the role of hydroperoxides . . . . .	44
3.1.2. Decomposition products: formation of carbonyl products and chain breaks . . . . .	46
3.1.3. PA post-polycondensation phenomenon . . . . .	51
3.2. Hydrolysis mechanism of aliphatic PAs . . . . .	52
3.3. Consequences for the macromolecular characteristics, crystalline morphology and mechanical properties of polyamides . . . . .	54
3.3.1. Evolution of crystallinity . . . . .	55
3.3.2. Molar mass trends . . . . .	56

---

3.3.3. Chain break modeling for hydrolysis . . . . .	59
3.3.4. Deterioration of mechanical properties . . . . .	59
3.4. Conclusion . . . . .	60
3.5. References . . . . .	61
<b>Chapter 4. Polychloroprene Degradation: From Chemistry to Mechanics . . . . .</b>	<b>63</b>
Pierre-Yves LE GAC, Maelelln LE GALL, Mael ARHANT and Peter DAVIES	
4.1. Introduction. . . . .	63
4.2. Chemical mechanism of polychloroprene degradation . . . . .	64
4.2.1. Chemical mechanisms . . . . .	64
4.2.2. Temporal aspects of degradation . . . . .	65
4.2.3. Spatial aspects of oxidation degradation . . . . .	66
4.3. Consequences of chemical degradation on the macromolecular network . . . . .	68
4.4. Impact of network modification on mechanical properties . . . . .	69
4.4.1. Quasi-static loading. . . . .	69
4.4.2. Dynamic loading . . . . .	73
4.5. Conclusion . . . . .	77
4.6. References . . . . .	78
<b>Chapter 5. Polyurethane: From Synthesis to Degradation . . . . .</b>	<b>81</b>
Élodie FROMENTIN and Muriel FERRY	
5.1. Introduction. . . . .	81
5.2. Polyurethane production process . . . . .	82
5.2.1. Synthesis reaction. . . . .	82
5.2.2. Nature of soft and hard segments with regard to desired functional properties . . . . .	82
5.2.3. Manufacturing processes . . . . .	84
5.3. Aging mechanisms . . . . .	85
5.3.1. Thermal degradation . . . . .	85
5.3.2. Photolytic and/or radiolytic degradation . . . . .	88
5.3.3. Hydrolytic degradation. . . . .	91
5.3.4. Combined effects . . . . .	93
5.4. Conclusion . . . . .	95
5.5. Acknowledgments. . . . .	95
5.6. References . . . . .	95

<b>Chapter 6. Marine (Bio)degradation of Polyhydroxyalkanoates and Polylactides</b> . . . . .	103
Morgan DEROINÉ, Antoine LE DUIGOU and Stéphane BRUZAUD	
6.1. Overview . . . . .	103
6.2. Chemical and physicochemical description of PHAs and PLAs. . . . .	104
6.2.1. Polyhydroxyalkanoates . . . . .	104
6.2.2. Polylactides . . . . .	105
6.3. Hydrolytic degradation of PHAs and PLAs. . . . .	106
6.3.1. Water absorption and diffusion . . . . .	107
6.3.2. Chain-cutting process . . . . .	109
6.3.3. The influence of the physicochemical characteristics of PLAs and PHAs . . . . .	111
6.4. Aging of PHAs and PLAs in seawater . . . . .	112
6.5. Biotic degradation of PHAs and PLAs. . . . .	115
6.5.1. Extrinsic factors . . . . .	115
6.6. Conclusion . . . . .	118
6.7. References . . . . .	119
<b>Chapter 7. Thermo-Oxidative Aging of Composite Materials for Aerospace Applications</b> . . . . .	123
Marco GIGLIOTTI, Yannick PANNIER and Jean-Claude GRANDIDIER	
7.1. Introduction. . . . .	123
7.2. Effects of thermo-oxidation on the mechanical behavior of organic resins . . . . .	125
7.2.1. Local mechanical behavior . . . . .	125
7.2.2. Failure properties . . . . .	129
7.3. Effects of thermo-oxidation on the mechanical behavior of composite materials . . . . .	131
7.3.1. Matrix shrinkage and damage initiation in UD composites . . . . .	131
7.3.2. Fatigue behavior of “cross-ply” composites [0/90]s. . . . .	134
7.4. Conclusions and outlook . . . . .	136
7.5. Acknowledgments. . . . .	137
7.6. References . . . . .	137
<b>Chapter 8. The Durability of Polysiloxanes</b> . . . . .	139
Florence DELOR JESTIN	
8.1. General information. . . . .	139
8.2. Physicochemical description of polysiloxanes . . . . .	141

---

8.2.1. Chain mobility and flexibility . . . . .	141
8.2.2. Thermal resistance and thermal stability . . . . .	141
8.2.3. Chemical stability . . . . .	141
8.2.4. Low surface tension and non-stick properties . . . . .	141
8.3. Thermal degradation of polysiloxanes . . . . .	142
8.3.1. Loop mechanism on one chain end . . . . .	143
8.3.2. Statistical loop mechanism . . . . .	143
8.3.3. Catalyzed degradation mechanism . . . . .	144
8.3.4. Mechanism of post-cross-linking or chain scission of cross-linked elastomers. . . . .	144
8.4. Photochemical degradation . . . . .	144
8.5. Specific aging in salt spray and under exposure to acid vapors . . . . .	146
8.6. Radiochemical aging . . . . .	147
8.7. Biodegradability . . . . .	147
8.8. Conclusion . . . . .	148
8.9. References . . . . .	149

## **Chapter 9. Water Behavior and Hydrolytic Aging of Thermosetting Resins . . . . .**

Stéphane MARAIS and Kateryna FATYHEYVA

9.1. Water absorption by resins. . . . .	152
9.1.1. Demonstrating the phenomenon . . . . .	152
9.1.2. Absorption mechanisms . . . . .	154
9.1.3. Diffusion aspect . . . . .	159
9.1.4. Factors influencing water absorption . . . . .	164
9.2. Hydrolytic degradation . . . . .	173
9.2.1. Changes in macroscopic characteristics. . . . .	173
9.2.2. Changes in structural and mechanical properties . . . . .	176
9.3. Factors influencing resistance to hydrolysis. . . . .	186
9.3.1. Resin composition . . . . .	186
9.3.2. Oligomer chain length and end groups . . . . .	189
9.3.3. Cross-linking density. . . . .	190
9.3.4. Reinforcements: fillers. . . . .	193
9.3.5. Immersion medium . . . . .	196
9.4. Conclusion . . . . .	199
9.5. References . . . . .	200

---

<b>Chapter 10. The Durability of Polymer Fibers</b> . . . . .	207
Peter DAVIES, Pierre-Yves LE GAC, Maelenn LE GALL and Mael ARHANT	
10.1. Introduction . . . . .	207
10.2. Polyamides . . . . .	209
10.2.1. Humidity . . . . .	209
10.2.2. Creep and fatigue . . . . .	210
10.2.3. Creep–humidity coupling . . . . .	212
10.3. Polyesters . . . . .	212
10.3.1. Humidity . . . . .	212
10.3.2. Creep and fatigue . . . . .	213
10.4. Polyolefins . . . . .	214
10.4.1. Humidity . . . . .	214
10.4.2. Creep and fatigue . . . . .	215
10.5. Aramids . . . . .	215
10.5.1. Humidity . . . . .	216
10.5.2. Creep and fatigue . . . . .	216
10.6. High-modulus polyethylenes . . . . .	217
10.6.1. Humidity . . . . .	217
10.6.2. Creep and fatigue . . . . .	218
10.7. Predicting long-term properties . . . . .	219
10.8. Conclusion . . . . .	220
10.9. Acknowledgments . . . . .	220
10.10. References . . . . .	221
<b>Chapter 11. Degradation of Multilayers: Infrared and Raman Microscopy Studies</b> . . . . .	225
Émilie PLANES, Florence DUBELLEY, Corine BAS and Lionel FLANDIN	
11.1. Introduction . . . . .	225
11.2. Introduction to analysis tools and techniques . . . . .	227
11.3. Study of a polymer/metal multilayer envelope used in VIPs . . . . .	228
11.4. Study of an encapsulation system for flexible PV panels . . . . .	237
11.5. Conclusion . . . . .	244
11.6. References . . . . .	244

---

<b>Chapter 12. Flame Retardants and Polymers: Functional Properties</b> . . . . .	247
Serge BOURBIGOT and Gaëlle FONTAINE	
12.1. Introduction . . . . .	247
12.2. Principles: polymer combustion . . . . .	249
12.3. Flame retardants and their mode of action . . . . .	251
12.3.1. Gas-phase poisoning . . . . .	251
12.3.2. Cooling and ceramization . . . . .	251
12.3.3. The concept of intumescence . . . . .	252
12.3.4. Nanocomposites . . . . .	253
12.4. Playing with fire: performance evaluation . . . . .	254
12.5. Flame retardancy of thermoplastics: a case study. . . . .	256
12.5.1. Intumescence for polyolefins . . . . .	256
12.5.2. Ceramization of polyamide 6 . . . . .	260
12.5.3. Gas-phase action in the PBT. . . . .	263
12.6. After production: aging of flame-retardant PLA . . . . .	265
12.7. Conclusion . . . . .	270
12.8. References. . . . .	271
<b>Chapter 13. Thermo-oxidative Behavior of Cyanate Ester Matrices.</b> . . . . .	275
Laurence BAILLY, Bouchra HASSOUNE-RHABBOUR and Valérie NASSIET	
13.1. Introduction . . . . .	275
13.2. Cyanate ester resins . . . . .	277
13.2.1. Introducing cyanate ester resins. . . . .	277
13.2.2. Phenolic-triazine resins. . . . .	280
13.3. Thermo-oxidative aging of PT resins . . . . .	286
13.3.1. Exposure conditions. . . . .	286
13.3.2. Effects on mass . . . . .	287
13.3.3. Effects on oxidation and cracking . . . . .	289
13.3.4. Discussion . . . . .	292
13.4. Conclusion . . . . .	293
13.5. References. . . . .	294
<b>List of Authors</b> . . . . .	299
<b>Index</b> . . . . .	303
