

# Contents

<b>Foreword</b> . . . . .	xi
Colette CAUVIN-REYMOND	
<b>Introduction. The Spatial Dimension of Digital Transformation</b> . . . . .	xvii
Thierry JOLIVEAU and Matthieu NOUCHER	
<b>Chapter 1. Understanding the Geospatial Factory</b> . . . . .	1
Thierry JOLIVEAU	
1.1. Introduction. . . . .	1
1.2. The making of the <i>geospatial factory</i> . . . . .	2
1.2.1. GIS . . . . .	2
1.2.2. Geoinformatics . . . . .	3
1.2.3. Geomatics . . . . .	4
1.2.4. Geoweb and neogeography . . . . .	4
1.2.5. Social (geo)media. . . . .	5
1.3. Geodigitalization as replication . . . . .	6
1.3.1. Replicating the physical world . . . . .	7
1.3.2. Georeferencing unmaterial and mental objects. . . . .	7
1.3.3. When cyberspace reverses itself . . . . .	8
1.3.4. Digital twins of territory . . . . .	9

1.4. Geodigitalization as an operating matrix. . . . .	10
1.4.1. Digital geolocation, from entertainment to control . . . . .	11
1.4.2. Material effects of geolocation in transportation. . . . .	14
1.4.3. The geospatial logic of local information. . . . .	17
1.5. Conclusion . . . . .	20
1.6. References . . . . .	21
<b>Chapter 2. Algorithmics at the Heart of Web-based Geographic Data Production . . . . .</b>	<b>27</b>
Teriitutea QUESNOT	
2.1. The genesis of geographic “data”. . . . .	27
2.2. Social web platforms and the proliferation of “capta”. . . . .	31
2.3. From geospatial footprints to geographic “quaesita” . . . . .	35
2.4. Deconstructing our (geo)digital footprints: pipe dreams and realities . . . . .	40
2.4.1. Geographic data: striving for ever greater accuracy. . . . .	41
2.4.2. The illusion of geographic capta . . . . .	43
2.4.3. Geographic quaesita and algorithmic spatialities . . . . .	45
2.5. Conclusion . . . . .	49
2.6. References . . . . .	50
<b>Chapter 3. From a Database to a Digital Commons: The OpenStreetMap Project . . . . .</b>	<b>55</b>
Boris MERICKSKAY	
3.1. Introduction. . . . .	55
3.2. The OSM project: its history and how it works. . . . .	57
3.2.1. A brief history of the OSM project. . . . .	57
3.2.2. A collaborative and open mapping project . . . . .	58
3.2.3. Mapping the world in OSM . . . . .	59
3.3. A decentralized, organized and diverse community . . . . .	62
3.3.1. OSM: an ecosystem of projects and initiatives. . . . .	62
3.3.2. A contributor-based community . . . . .	63
3.3.3. A community organized around a variety of tools. . . . .	64
3.3.4. A decentralized and multi-level project governance . . . . .	65
3.4. OSM and the professional sphere. . . . .	67
3.4.1. Forms of partnership between OSM and the public sector. . . . .	67
3.4.2. Forms of partnership between OSM and the industry sector. . . . .	70

3.5. Some major challenges for OSM in mapping and geomatics. . . . .	72
3.5.1. The quality of OSM data and map vandalism . . . . .	73
3.5.2. Toward convergence between 3D modeling and indoor mapping . . . . .	75
3.5.3. The OSM project as a digital (geo)commune? . . . . .	78
3.6. Conclusion . . . . .	81
3.7. References . . . . .	82
<b>Chapter 4. Maps and Geographic Information in Planning. . . . .</b>	<b>89</b>
Juliette DAVRET	
4.1. Introduction. . . . .	89
4.2. Impact of digitization on planning: a historical perspective . . . . .	91
4.2.1. Theoretical evolution in planning and the growing role of geographic information. . . . .	92
4.2.2. Planning: methods, objectives and geographic technologies. . . . .	93
4.3. Geographic information lifecycle in planning . . . . .	95
4.3.1. Application to marine spatial planning . . . . .	95
4.3.2. Sociotechnical network in planning . . . . .	98
4.4. Information and participation . . . . .	99
4.4.1. Understanding the space through geographic information . . . . .	99
4.4.2. Geographic information and participatory approach . . . . .	103
4.5. Digital planning: challenges and opportunities . . . . .	105
4.5.1. Rethinking planning by considering geographic information . . . . .	106
4.5.2. The digital turn in planning: a democratic illusion? . . . . .	107
4.5.3. Research agenda. . . . .	110
4.6. Conclusion . . . . .	110
4.7. References . . . . .	111
<b>Chapter 5. GIS Dissemination Facing Territorial Disparity. . . . .</b>	<b>117</b>
Grégoire FEYT	
5.1. Introduction. . . . .	117
5.2. From national puzzle to urban patchwork . . . . .	121
5.2.1. Major public works projects. . . . .	121
5.2.2. The mounting pressure from large communities. . . . .	122
5.2.3. The revealed complexity of geographic data . . . . .	123
5.2.4. Needs that are becoming more apparent, obstacles that are being removed... . . . .	125

5.2.5. ...and accelerators being placed . . . . .	126
5.2.6. Geographic information as a “public good” . . . . .	128
5.2.7. Conditions in place for widespread adoption of local GIS? . . . . .	129
5.3. Territories that are structurally unequal in their capacity for self-knowledge . . . . .	130
5.3.1. Disparities in territorial structure. . . . .	130
5.3.2. The implications in terms of capacity for action. . . . .	132
5.4. The dissemination and place of GIS within territories. . . . .	133
5.4.1. Sources of information. . . . .	134
5.4.2. The predominance of public affairs.... . . . .	135
5.4.3. ...and of geo-the-maticians . . . . .	135
5.4.4. Territorial disparities . . . . .	137
5.4.5. A “threshold effect” in the territorial diffusion of GIS? . . . . .	139
5.5. Territorial data: a new frontier for geomatics specialists? . . . . .	144
5.6. Conclusion: toward a convergence between geonumerical sciences and territorial sciences. . . . .	146
5.7. Acronyms . . . . .	149
5.8. References . . . . .	151

## **Chapter 6. On the Intersection of Geomatics and Digital Humanities. . . . .** 153

Juliette MOREL and Baptiste HAUTDIDIER

6.1. Introduction. . . . .	153
6.2. Digitally spatializing the humanities . . . . .	156
6.2.1. Archeology and geomatics . . . . .	157
6.2.2. Spatial analysis and GIS for historical, literary, cultural and heritage studies. . . . .	157
6.2.3. Cartographic visualization in the literary humanities . . . . .	160
6.3. Digitizing the humanities space . . . . .	162
6.3.1. Data extraction issues . . . . .	163
6.3.2. Data formalization issues . . . . .	164
6.3.3. Issues relating to data availability and dissemination . . . . .	166
6.3.4. What promises does big data hold for the humanities and social sciences? . . . . .	168
6.4. Humanizing the digital space . . . . .	169
6.4.1. Complexifying digital space: historicizing, critiquing, raising awareness and narrating space in GIS . . . . .	169
6.4.2. Deep mapping . . . . .	172
6.5. Conclusion . . . . .	174
6.6. References . . . . .	175

---

<b>Chapter 7. Uses and Unconsidered Aspects of Geographic Data in OSINT Investigations</b> . . . . .	181
Allan DENEUVILLE	
7.1. Introduction. . . . .	181
7.2. Investigations and maps . . . . .	184
7.2.1. The map as a tool for investigation. . . . .	184
7.2.2. The map as the basis for the investigation . . . . .	185
7.2.3. The map as an illustration of the investigation. . . . .	188
7.3. Truth regimes and maps . . . . .	190
7.3.1. Truth and journalism . . . . .	190
7.3.2. Legal truth . . . . .	191
7.3.3. Visual grammar of veridiction . . . . .	192
7.4. The risk of technological and political determinism . . . . .	194
7.4.1. Misinterpreting the map . . . . .	194
7.4.2. Technological determinism . . . . .	195
7.4.3. A vision of power encoded in the map . . . . .	196
7.5. Conclusion . . . . .	197
7.6. References . . . . .	197
<b>Chapter 8. Exploring Geospatial Technology Imaginaries</b> . . . . .	201
Thierry JOLIVEAU	
8.1. Introduction. . . . .	201
8.2. From sociotechnical imaginaries to a geo-technical imaginary . . . . .	202
8.2.1. In search of a geospatial technological imaginary . . . . .	203
8.2.2. The different forges of sociotechnical imaginaries . . . . .	205
8.3. Inventorying fictional imagery of geospatial technologies . . . . .	207
8.3.1. A corpus of recurrent spatial narrative patterns in fiction . . . . .	207
8.3.2. Inventories of geospatial apparatus in works of fiction . . . . .	208
8.3.3. The (e)space&fiction website. . . . .	209
8.3.4. From “presage” to usage: geospatial apparatus in cinema . . . . .	211
8.4. Several facets of the fictional imaginary of geospatial technologies. . . . .	212
8.4.1. Geographic coordinates in fiction before and after GPS . . . . .	213
8.4.2. The errancies of digital navigation in fiction . . . . .	215
8.4.3. Jack Bauer, the tragic dimension of the geospatial hero . . . . .	220
8.4.4. Trapped by geolocation . . . . .	222

8.5. Findings, limitations, outlook and conclusion . . . . .	224
8.5.1. Key findings . . . . .	224
8.5.2. Limitations and prospects . . . . .	228
8.5.3. Conclusion . . . . .	231
8.6. Acknowledgments . . . . .	231
8.7. References . . . . .	232
8.8. Works analyzed or mentioned . . . . .	235
<b>Conclusion. Escaping Geospatial Somnambulism Through Criticism . . . . .</b>	<b>237</b>
Thierry JOLIVEAU and Matthieu NOUCHER	
<b>List of Authors . . . . .</b>	<b>245</b>
<b>Index . . . . .</b>	<b>247</b>
