<b>Preface</b> . . . . .	xi
Anne DAMBRICOURT MALASSÉ, Bernard AUTET, Sandra JOFFROY and Djillali HADJOUIS	
<b>Acknowledgments</b> . . . . .	xix
<b>Introduction</b> . . . . .	xxi
Anne DAMBRICOURT MALASSÉ, Bernard AUTET, Sandra JOFFROY and Djillali HADJOUIS	
<b>Part 1. Paleontological Perspectives</b> . . . . .	1
<b>Chapter 1. The Future of <i>Sapiens</i>: A Question of Verticality, Proof by Neanderthal Man.</b> . . . . .	3
Anne DAMBRICOURT MALASSÉ, Djillali HADJOUIS, Sandra JOFFROY and Bernard AUTET	
1.1. At the origins of straightening: the embryo, not locomotion . . . . .	3
1.2. Human embryogenesis . . . . .	6
1.2.1. Correlations of cellular movements of the neural tube and cartilage tissues of the base . . . . .	6
1.2.2. Tissue forces of embryonic verticalization . . . . .	8
1.2.3. Primitive meninx . . . . .	12
1.2.4. The holistic concepts of osteopathy . . . . .	13
1.3. Current non-human primates . . . . .	14
1.3.1. Embryogenesis . . . . .	14
1.3.2. Dynamic relationships between the skull base, occlusion and posture of great apes . . . . .	15

1.4. Occluso-postural balance of <i>Homo sapiens</i> : the contribution of dento-facial orthopedics and the examples studied . . . . .	18
1.4.1. Contemporary sapiens: occluso-postural imbalances . . . . .	19
1.4.2. Loss of incisal end-to-end occlusion over the course of evolution . . . . .	20
1.5. The skeleton of <i>Homo neanderthalensis</i> . . . . .	22
1.5.1. The head: occlusal-postural balance. . . . .	23
1.5.2. Craniospinal balance: absence of lordosis and knees in flexion . . . . .	27
1.5.3. Embryonic dynamics, homeotic genes and craniosacral reciprocal tension membranes in the Neanderthal. . . . .	30
1.6. Conclusion . . . . .	34
1.7. References . . . . .	37
<b>Chapter 2. Middle Meningeal Vascularization in Neanderthals, and Their Cardiovascular System.</b> . . . . .	47
Sandra JOFFROY, Anne DAMBRICOURT MALASSÉ and Djillali HADJOUIS	
2.1. Introduction . . . . .	47
2.2. Bone anatomies of the Neanderthal compared to modern anatomy and the extinct taxa of the genus <i>Homo</i> : the skull . . . . .	48
2.2.1. The venous network of the meninges . . . . .	48
2.2.2. The diploic and emissary venous system . . . . .	53
2.3. The state of current knowledge versus archaic, and vice versa . . . . .	55
2.4. Current data versus postnatal development and aging . . . . .	57
2.4.1. The cardiovascular system and postural development of the Neanderthal . . . . .	59
2.4.2. Embryogenesis of the cardiovascular system and acquisition of axial verticality of the embryo . . . . .	62
2.5. Conclusion . . . . .	64
2.6. References . . . . .	65
<b>Chapter 3. Virtual Reconstruction of the Skull Base of <i>Sinanthropus (Homo erectus pekinensis)</i></b> . . . . .	71
Tan-Nhu NGUYEN, Anne DAMBRICOURT MALASSÉ, Marie-Christine HO BA THO, Fabienne LALLOUET and Tien-Tuan DAO	
3.1. Introduction . . . . .	71
3.2. Materials and methods . . . . .	74
3.2.1. Materials. . . . .	74
3.2.2. Meshing of the virtual images . . . . .	76
3.3. Reconstruction of the three basioccipital fossae of <i>Sinanthropus</i> III . . . . .	78
3.3.1. The upper fossa . . . . .	78
3.3.2. Middle and posterior (or cerebellar) fossae. . . . .	78

3.4. Validation . . . . .	80
3.5. The sphenoid angle: discussion. . . . .	82
3.6. Conclusion . . . . .	83
3.7. Acknowledgments . . . . .	83
3.8. References . . . . .	83
<b>Chapter 4. Characterization and Modeling of Morphological Evolutions in Bones.</b> . . . . .	87
Marie-Christine HO BA THO	
4.1. Introduction . . . . .	87
4.2. Methodology . . . . .	88
4.2.1. Geometric reconstruction. . . . .	88
4.2.2. Mechanical properties of human bone tissue . . . . .	89
4.2.3. Models with individualized geometric and mechanical properties . . . . .	89
4.3. Clinical applications. . . . .	89
4.4. Conclusion . . . . .	90
4.5. References . . . . .	90
<b>Part 2. Current Perspectives: From the Fetus to Life in Space</b> . . . . .	93
<b>Chapter 5. Pre- and Postnatal Haptonomy: An Early Humanization.</b> . . . . .	95
Catherine DOLTO	
5.1. Introduction . . . . .	95
5.2. Haptonomy . . . . .	96
5.3. Haptonomic pre- and postnatal accompaniment, or preparation of verticality during prenatal life . . . . .	99
5.3.1. Clinical work . . . . .	100
5.4. The endomesoblast: the embryological foundation of verticality . . . . .	104
5.5. Epigenetics and neural plasticity . . . . .	108
5.6. The two axes of humanity. . . . .	108
5.7. Another to stand up straight. . . . .	110
5.8. Verticalization and postnatal work . . . . .	110
5.9. Conclusion . . . . .	112
5.10. References . . . . .	114
<b>Chapter 6. New Paradigm for Human Parturition</b> . . . . .	115
July BOUHALLIER	
6.1. Introduction . . . . .	115
6.2. The pelvis and obstetric function. . . . .	117

6.2.1. The human pelvis . . . . .	117
6.2.2. Birth in non-human primates. . . . .	122
6.3. Human maternal mortality . . . . .	123
6.4. Maternal mortality due to dystocia . . . . .	127
6.5. The dilemma: paradigm of human parturition. . . . .	128
6.5.1. The obstetrical dilemma according to Washburn. . . . .	128
6.5.2. Reinterpretations and criticisms . . . . .	129
6.6. Evolution and the midwife . . . . .	130
6.7. Recent hypotheses and new perspectives . . . . .	131
6.8. Prolapse and large babies . . . . .	132
6.8.1. Stressed motherhood . . . . .	132
6.8.2. Stressed motherhood in humans . . . . .	133
6.8.3. And in non-human primates? . . . . .	134
6.9. Conclusion . . . . .	134
6.10. References . . . . .	136
<b>Chapter 7. How Upright Posture Endures Despite Deficits in Core Postural Motor Control . . . . .</b>	<b>145</b>
Véronique LEROY-MALHERBE, Élise PINEAU and Virginie PINEAU	
7.1. Introduction . . . . .	145
7.2. Report of two clinical cases. . . . .	146
7.2.1. First clinical case: Jeremy, affected with cerebral palsy. . . . .	146
7.2.2. Second clinical case: Lisa, affected with Friedreich's ataxia with posterior cord bundle dysfunction. . . . .	147
7.3. Discussion . . . . .	149
7.3.1. Two fundamental neurological systems in walking . . . . .	149
7.3.2. What resource factors despite these two fundamental neurological deficits? . . . . .	152
7.4. Integrative factors affecting posture . . . . .	159
7.4.1. The tonic-emotional body . . . . .	160
7.4.2. The social body . . . . .	162
7.5. Conclusion . . . . .	163
7.6. Acknowledgments . . . . .	164
7.7. References . . . . .	164
<b>Chapter 8. Contribution to the Study of the Postural Evolution of Patients in a Dental Office . . . . .</b>	<b>171</b>
Michel CLAUZADE and Numa CLAUZADE	
8.1. Introduction . . . . .	171
8.2. The trigeminal nerve: neuro-matrix axis of the face . . . . .	172
8.2.1. Statistical study . . . . .	175
8.3. Oral and clavicular ventilation . . . . .	178

8.4. The skeletal classes . . . . .	181
8.4.1. Skeletal class I. . . . .	181
8.4.2. Skeletal class II . . . . .	181
8.4.3. Skeletal class III. . . . .	183
8.4.4. Age distribution. . . . .	183
8.5. Conclusion . . . . .	184
8.6. References . . . . .	184
<b>Chapter 9. <i>Homo sapiens</i> and Verticality: The Contribution of Research in Space Medicine and Posturology.</b> . . . . .	187
Denis DUCOMMUN and Loïc TREFFEL	
9.1. Introduction . . . . .	187
9.2. Control of upright posture in <i>Homo sapiens</i> . . . . .	188
9.2.1. Construction of the representation of verticality . . . . .	188
9.2.2. The geocentric reference frame . . . . .	190
9.2.3. Egocentric reference frame: proprioception . . . . .	190
9.2.4. The allosteric reference frame . . . . .	192
9.2.5. Maturation of the postural system . . . . .	193
9.2.6. Aging of the postural and motor system . . . . .	193
9.3. Effects of microgravity on human physiology: deconditioning . . . . .	194
9.3.1. Description of several systems affected by exposure to microgravity . . . . .	195
9.4. Countermeasures to deconditioning . . . . .	198
9.5. Parallel between a stay in space and aging . . . . .	200
9.6. Spaceflight and disruptions of postural inputs. . . . .	201
9.7. Avenues for reflection and application in current clinical practice . . . . .	202
9.8. Practical consequences . . . . .	203
9.9. Conclusion . . . . .	205
9.10. Acknowledgments . . . . .	206
9.11. References . . . . .	206
<b>Conclusion</b> . . . . .	215
Anne DAMBRICOURT MALASSÉ, Sandra JOFFROY, Djillali HADJOUIS and Bernard AUTET	
<b>List of Authors</b> . . . . .	221
<b>Index.</b> . . . . .	223
