<b>Preface</b> . . . . .	xi
Yajing YAN	
<b>Part 1. Data Assimilation</b> . . . . .	1
<b>Chapter 1. Methods for Assimilation of Observations: Application to Numerical Weather Prediction</b> . . . . .	3
Olivier TALAGRAND	
1.1. Introduction . . . . .	3
1.2. The linear and Gaussian case . . . . .	6
1.2.1. Variational form . . . . .	8
1.3. Optimal interpolation – three-dimensional variational assimilation . . . . .	10
1.4. Taking the dynamics of the flow into account . . . . .	12
1.4.1. The Kalman Filter . . . . .	16
1.4.2. Four-dimensional variational assimilation . . . . .	22
1.4.3. Ensemble methods . . . . .	27
1.4.4. Stability and instability . . . . .	29
1.5. Particle filters . . . . .	30
1.6. Artificial intelligence . . . . .	32
1.7. Extensions and applications . . . . .	33
1.8. References . . . . .	34
<b>Chapter 2. Ensemble Data Assimilation in Volcanology</b> . . . . .	39
Mary Grace BATO, Virginie PINEL and Yajing YAN	
2.1. Volcano monitoring and eruption forecasting . . . . .	39
2.2. Ensemble data assimilation . . . . .	42
2.2.1. Volcanic data assimilation using the ensemble Kalman filter . . . . .	43

2.2.2. The dynamic model . . . . .	44
2.2.3. Data observations . . . . .	47
2.3. Potentiality assessment of volcanic data assimilation for eruption forecasting based on synthetic simulations . . . . .	50
2.3.1. EnKF formulation . . . . .	51
2.3.2. Synthetic observations . . . . .	52
2.3.3. Experiment setup . . . . .	53
2.3.4. Results and discussions . . . . .	55
2.3.5. Implications to real-time volcano monitoring . . . . .	61
2.4. Application: The 2004–2014 inter-eruptive activity at Grímsvötn volcano, Iceland . . . . .	62
2.4.1. Implications of the change in magma supply rate at Grímsvötn . . . . .	64
2.5. Conclusions and outlook . . . . .	65
2.6. Acknowledgments . . . . .	66
2.7. References . . . . .	66
<b>Chapter 3. Data Assimilation in Glaciology . . . . .</b>	<b>71</b>
Fabien GILLET-CHAULET	
3.1. Introduction . . . . .	71
3.2. Predicting a paradigm shift for polar ice-sheet models . . . . .	73
3.3. Principles of ice sheet dynamics . . . . .	75
3.4. Parameter estimation . . . . .	78
3.4.1. Variational methods . . . . .	79
3.4.2. Bayesian methods . . . . .	85
3.4.3. Classical inversion problems . . . . .	85
3.5. State and parameter estimation . . . . .	90
3.6. Conclusions and outlook . . . . .	92
3.7. References . . . . .	93
<b>Part 2. Inversion . . . . .</b>	<b>103</b>
<b>Chapter 4. Probabilistic Inversion Methods . . . . .</b>	<b>105</b>
Alexandrine GESRET	
4.1. Local methods versus global methods . . . . .	105
4.2. Bayesian formalism . . . . .	107
4.3. Model parameterization . . . . .	111
4.3.1. Layered models . . . . .	112
4.3.2. Wavelets . . . . .	113
4.3.3. Voronoi tessellation . . . . .	115
4.3.4. The Johnson Mehl tessellation . . . . .	116

4.4. Markov chain Monte Carlo-based sampling algorithms . . . . .	118
4.4.1. The Metropolis-Hastings algorithm . . . . .	121
4.4.2. Simulated annealing . . . . .	123
4.4.3. Interacting Markov chains . . . . .	125
4.4.4. The reversible jump Metropolis-Hastings algorithm . . . . .	129
4.5. Conclusions and outlook . . . . .	132
4.6. References . . . . .	134
<b>Chapter 5. Modeling Radar Backscattering from Forests: A First Step to Inversion . . . . .</b>	<b>139</b>
Elise COLIN and Laetitia THIRION-LEFEVRE	
5.1. Introduction . . . . .	139
5.2. Vegetation model historical background . . . . .	141
5.2.1. Evolution of measurements and their understanding . . . . .	142
5.2.2. What should be remembered? And what prospects? . . . . .	145
5.3. How to choose a model for inversion? . . . . .	146
5.3.1. Different inversion approaches . . . . .	146
5.3.2. Choosing according to the intended purpose . . . . .	148
5.3.3. Validity and validation domain . . . . .	152
5.3.4. Summarizing the choice of model . . . . .	153
5.4. Biomass inversion . . . . .	154
5.4.1. Challenges . . . . .	154
5.4.2. Regression of backscatter coefficient curves . . . . .	155
5.4.3. RVoG model in PolInSAR . . . . .	156
5.4.4. Approximate model inversion . . . . .	158
5.4.5. Metamodels . . . . .	159
5.4.6. What should be remembered and expected? . . . . .	160
5.5. Conclusions and outlook . . . . .	160
5.6. References . . . . .	163
<b>Chapter 6. Radiative Transfer Model Inversion and Application to Coastal Observation . . . . .</b>	<b>169</b>
Touria BAJJOUK, Audrey MINGHELLI, Malik CHAMI and Tristan PETIT	
6.1. Introduction . . . . .	169
6.2. Principle and treatment method . . . . .	170
6.2.1. Inherent optical water properties . . . . .	170
6.2.2. Apparent optical properties of water . . . . .	171
6.3. Biophysical model of radiative transfer . . . . .	172
6.3.1. Data and preprocessing . . . . .	173
6.3.2. Estimation and inversion methods . . . . .	176

6.3.3. Validation methods for inversion products . . . . .	177
6.3.4. Uncertainty about inversion-estimated parameters . . . . .	180
6.4. Examples of applications in coastal areas . . . . .	182
6.4.1. SPM/CHL estimate . . . . .	182
6.4.2. Bathymetry estimation . . . . .	184
6.4.3. Spatial characterization of the seabed . . . . .	187
6.5. Conclusions and outlook . . . . .	190
6.6. References . . . . .	193

## **Chapter 7. Deep-learning Analysis of Cherenkov Telescope**

<b>Array Images</b> . . . . .	201
-------------------------------	-----

Mikaël JACQUEMONT, Thomas VUILLAUME, Alexandre BENOIT,  
Gilles MAURIN and Patrick LAMBERT

7.1. Gamma astronomy . . . . .	201
7.1.1. Gamma radiation and observation method . . . . .	201
7.1.2. Analysis methods for Cherenkov images . . . . .	204
7.2. Deep neural networks . . . . .	205
7.2.1. Deep learning for gamma astronomy . . . . .	206
7.2.2. Multitasking learning . . . . .	207
7.2.3. Attention mechanisms . . . . .	209
7.2.4. Explainability of neural networks . . . . .	211
7.3. $\gamma$ -PhysNet: a multitasking architecture for the complete reconstruction of gamma events . . . . .	212
7.3.1. Encoder . . . . .	212
7.3.2. Multitasking block . . . . .	213
7.3.3. Improving the encoder with attention . . . . .	214
7.4. Performance evaluation . . . . .	215
7.4.1. Dataset . . . . .	215
7.4.2. Data selection and preparation . . . . .	217
7.4.3. Model training . . . . .	217
7.4.4. Performance evaluation methodology . . . . .	218
7.4.5. Interest of multitasking and comparison with the standard method . . . . .	219
7.4.6. Energy regression . . . . .	220
7.4.7. Direction regression . . . . .	221
7.4.8. Impact of attention . . . . .	222
7.4.9. Understanding the effect of attention on robustness . . . . .	223
7.5. Conclusions and outlook . . . . .	226

7.6. Acknowledgments . . . . .	227
7.7. References . . . . .	227
<b>List of Authors</b> . . . . .	233
<b>Index</b> . . . . .	235
