| Chapter 1. Organic Sonochemistry: Ultrasound in Green Organic Synthesis | 1 |
| Micheline DRAYE, Julien ESTAGER and Nathalie KARDOS | |
| 1.1. Introduction: history of ultrasound, organic sonochemistry and early work | 2 |
| 1.1.1. The history of ultrasound and organic sonochemistry | 2 |
| 1.1.2. Pioneering work in organic sonochemistry | 4 |
| 1.2. Some elements of ultrasound theory. | 14 |
| 1.2.1. Bubble dynamics. | 17 |
| 1.2.2. Factors affecting cavitation. | 21 |
| 1.2.3. Estimation of ultrasonic parameters | 23 |
| 1.3. Laboratory and industrial equipment | 28 |
| 1.3.1. Ultrasonic bath | 29 |
| 1.3.2. Ultrasonic probes | 31 |
| 1.3.3. High frequency reactors. | 32 |
| 1.3.4. Cup-horn reactors | 32 |
| 1.3.5. Continuous reactors | 33 |
| 1.4. Green organic sonochemistry. | 34 |
| 1.4.1. True and false sonochemistry | 34 |
| 1.4.2. Synthesis in a homogeneous and heterogeneous system | 35 |
| 1.4.3. Synthesis in a heterogeneous system | 37 |
| 1.5. Sonochemistry in unconventional environments | 53 |
| 1.5.1. Physical activator | 53 |
| 1.5.2. Solvent-free chemistry | 54 |
| 1.5.3. Ionic liquids and ultrasound | 55 |
| 1.5.4. Sonochemistry in water. | 60 |
| 1.5.5. Sonochemistry in glycerol | 64 |

| | |
|--|------------|
| 1.5.6. Enzymatic chemistry under ultrasound | 66 |
| 1.5.7. Sonoelectrosynthesis | 74 |
| 1.6. Conclusion | 74 |
| 1.7. References | 76 |
| Chapter 2. High-Pressure Synthesis: An Eco-friendly Chemistry | 95 |
| Isabelle CHATAIGNER and Jacques MADDALUNO | |
| 2.1. High pressures in synthetic chemistry | 95 |
| 2.2. Important concepts | 97 |
| 2.2.1. Physicochemistry of high pressures | 97 |
| 2.2.2. Activation volume | 101 |
| 2.2.3. Effect of high pressures on the solvent | 104 |
| 2.3. Instrumentation. | 105 |
| 2.3.1. How can we generate high pressures? | 105 |
| 2.3.2. Choice of equipment | 108 |
| 2.3.3. Safety of the installations | 112 |
| 2.4. Applications | 114 |
| 2.4.1. Cycloaddition and annulation reactions | 114 |
| 2.4.2. Nucleophilic addition reactions. | 125 |
| 2.4.3. Substitution reactions. | 136 |
| 2.4.4. Metallocatalyzed reactions | 138 |
| 2.5. Conclusion | 139 |
| 2.6. References | 140 |
| List of Authors | 151 |
| Index | 153 |
