Foreword	xi
Preface	xiii
Introduction	xv
Part 1. The Region, a Complex Concept Applied to Tourism	1
Introduction to Part 1	3
Chapter 1. Tourist Places, with their Foundations in the Tourist Region	5
1.1. The tourist place, a locality chosen in spatial tourism practices	5
1.2. Diversity of tourist places according to practices	10
1.3. Basic tourist places at the local level	11
1.3.1. Places dominated by tourism	11
1.3.2. Places not dominated by tourism	15
1.4. Tourist places on a regional scale	16
1.5. Conclusion	20
Chapter 2. The Tourist Region, a Localized Area and Localizer	23
2.1. How to define the tourist region?	24
2.1.1. The region in geography	24
2.1.2. The tourist region	26
2.2. Regional spatializations of the tourism phenomenon	28
2.2.1. The world's major tourist regions	28
2.2.2. Regional approaches to tourism within a country	30
2.2.3. Localized regional tourist areas	33

2.3. Construction of a regional tourism area	36
2.4. Conclusion	40
Chapter 3. Geographical Approaches of the Tourist Region	41
3.1. A regional geography of tourism	41
3.1.1. Example of the analysis of the tourism phenomenon in the Saint-Malo region (France)	42
3.1.2. Example of the analysis of tourism in the province of Quebec (Canada)	44
3.2. The functional region of tourism	45
3.2.1. The use of the center–periphery model to explain the tourism region in French-language literature	46
3.2.2. The use of the center–periphery model to explain the tourist region in English literature.	51
3.3. The tourist region, a lived space.	54
3.3.1. The region as a lived space	54
3.3.2. Representations as a tool to define the tourist region as experienced.	56
3.4. Tourist places and mobility in a regional dimension.	57
3.5. Conclusion	61
Part 2. Stakeholder Logics in the Practice of a Tourist Destination in a Regional Dimension	63
Introduction to Part 2.	65
Chapter 4. Tourists and their Territories Practices in a Regional Dimension	67
4.1. Spatial skills linked to tourist mobilities within a space of regional dimension.	68
4.2. Itineraries and routes according to tourist mobilities on a regional scale	74
4.3. Reading tourist mobilities to understand spatial practices with a regional dimension.	76
4.3.1. A space laboratory: the Lake Geneva Region, a diversity of tourist places in a homogeneous lake landscape	76
4.3.2. A methodology: spatialization of a life story and representation by schematic maps	80
4.3.3. One observation: an insertion of places into networks of more or less important spatial dimension according to tourist mobilities.	81
4.4. Conclusion	87

Chapter 5. Investors and their Structuring of Regional Tourist Territories	89
5.1. The private investor and their creation of regional tourism territories	89
5.1.1. From the creation of equipment to the multiplication of tourist places	89
5.1.2. Organization of a regional tourism offer	93
5.2. The public investor and its regional spatial planning through tourism	94
5.2.1. Government investment for tourism diffusion	94
5.2.2. Tourism planning in a regional dimension by public institutions.	97
5.2.3. Intervention of public actors in the creation of tourist places for regional diffusion of tourism.	101
5.3. Conclusion	106
Chapter 6. Developers and Local Actors Mobilization for Promotion of their Regional Territories	107
6.1. Public actors and the collective interest of a territory in a regional dimension	107
6.1.1. The case of the urban tourism development of Nantes (France) and its regional extension	108
6.1.2. The case of natural parks, creation of a territory of regional dimension with a view to developing tourism through a landscape	111
6.2. Private actors and their territorial valuations in the interest of their companies.	112
6.2.1. The case of the Cognac vineyard (France) in the mobilization of spirits and tourism stakeholders to promote a region in a regional dimension.	113
6.2.2. The case of the Santa Claus region (Lapland) in the exploitation of an imagination for a regional tourism development.	115
6.3. Make the territory a shared brand to develop a regional tourist destination	116
6.3.1. “Loire Valley”, a brand that promotes a regional tourist destination	117
6.3.2. Brittany, between cultural territory and administrative territory, as a tourist brand?	119
6.4. Conclusion	120

Chapter 7. The Prescribers and the Encouragement of Regional Practices	121
7.1. The prescription to guide tourists in their choice of places	122
7.2. The prescription of the local advisors to select the places	126
7.3. The prescription for a regional experience	129
7.4. Conclusion	135
Part 3. Reading the Tourist Region Using Networks of Places Analysis	137
Introduction to Part 3	139
Chapter 8. Regional Tourism Distribution in Networks of Places	141
8.1. Translating tourist mobilities, according to stories, into graphs and matrices	142
8.2. Neighborhood relationships to analyze the regional dimension of networks	144
8.2.1. Neighborhood relationships of valued graphs as a measure of the gap between places within the same network	145
8.2.2. Neighborhood relationships of directed graphs as a measure of the way in which places are connected within the same network	148
8.3. Multi-level regional networks of tourist places according to mobilities.	153
8.3.1. The regional hub and the regional multi-hub: nodes linked from the core(s).	154
8.3.2. The regional agglomerate based on diffusion and continuous mobilities.	157
8.3.3. The regional continuum structured by continuous mobilities	158
8.4. Conclusion	160
Chapter 9. Definition of Regional Tourist Functions of Places	161
9.1. The recreational functions of places according to tourist practices	162
9.2. The regional tourism function of places according to recreational functions.	165
9.2.1. Types of regional tourism functions	165
9.2.2. Calculation of the specialization index to measure the regional tourism function of places	166

9.2.3. Some results of the regional tourism function of the Lake Geneva region places	167
9.3. Evolution of a place to develop the regional tourist function.	170
9.4. Conclusion	171
Chapter 10. Place Positions in the Tourist Region	173
10.1. The inclusion of places in the networks of tourist places according to mobilities.	173
10.1.1. The connectedness index to better understand the inclusion of places according to the complexity of the networks.	174
10.1.2. Some results of network connectedness and place integration in the Lake Geneva region	175
10.1.3. The connectivity index to better understand the connection density of places in networks	176
10.1.4. Some results of the network connectivity and the inclusion of places within the Lake Geneva region.	177
10.2. Developers are involved in positioning the place to be integrated into tourists' spatial practices	178
10.2.1. The case of Franco-Swiss cross-border cooperation to promote the practice of tourist places around Lake Geneva	178
10.2.2. The case of a redistribution of regional tourist destinations to adapt to the practices of tourist places in Brittany	181
10.3. Conclusion	184
Chapter 11. Connection of Tourist Places in Networks via Tourist Mobilities	187
11.1. Measurement of the nodality degree of tourist places in networks	188
11.2. Some results of the nodal function of the tourist places within the Lake Geneva region	189
11.3. Suggesting the connection of tourist places and changing nodality.	191
11.4. Conclusion	195
Conclusion	197
