| General Introduction: Systemic Innovations and Transformation of Organizational Models | xi |
| Dimitri UZUNIDIS | |
| Chapter 1. Enterprise Through the Lens of Agility, Creativity and Monitoring Method Combinations | 1 |
| Stéphane GORIA | |
| 1.1. Introduction | 1 |
| 1.2. Agility and its manifesto | 2 |
| 1.3. Agility and the design process | 4 |
| 1.4. Agility and creativity | 7 |
| 1.5. Agility and decision-making | 9 |
| 1.6. Innovation-oriented agile monitoring | 12 |
| 1.7. Conclusion | 14 |
| 1.8. References | 15 |
| Chapter 2. Science Fiction: A Strategic Approach for Innovative Organizations | 19 |
| Thomas MICHAUD | |
| 2.1. Introduction | 19 |
| 2.2. Science fiction, a futuristic fantasy for engineers and innovators | 21 |
| 2.2.1. The scientific imagination behind major discoveries | 21 |
| 2.2.2. Examples: virtual reality and the conquest of Mars | 22 |
| 2.3. Science fiction and creativity: new approaches | 25 |
| 2.3.1. Design fiction, a method for stimulating creativity | 25 |
| 2.3.2. Science fiction prototyping. | 27 |

| | |
|---|-----------|
| 2.4. Towards a theory of technotypes | 27 |
| 2.4.1. Utopian technologies and the technological utopianism of American culture | 28 |
| 2.4.2. Technotypes, structures of the technical imaginary | 31 |
| 2.5. Conclusion | 33 |
| 2.6. References | 34 |
| | |
| Chapter 3. The Management of Inventive Knowledge: From Inventive Intellectual Corpus to Innovation | 37 |
| Pierre SAULAIS and Jean-Louis ERMINE | |
| 3.1. Introduction | 37 |
| 3.2. From knowledge capital to knowledge management | 38 |
| 3.3. Knowledge-based knowledge management | 40 |
| 3.4. The knowledge capital and the inventive intellectual corpus | 42 |
| 3.4.1. Knowledge capital | 42 |
| 3.4.2. The inventive intellectual corpus and the dematerialized knowledge object | 43 |
| 3.4.3. The inventive intellectual corpus at the heart of innovation. | 43 |
| 3.5. The virtuous cycle of knowledge management | 45 |
| 3.6. The MASK method | 46 |
| 3.6.1. MASK II: Analysis of knowledge capital. | 47 |
| 3.6.2. MASK I: Capitalization of knowledge capital | 48 |
| 3.6.3. MASK III: Sharing the knowledge capital | 48 |
| 3.6.4. MASK IV: Evolution of the knowledge capital | 49 |
| 3.7. Illustrations with real cases from “economic reality”. | 50 |
| 3.7.1. Strategic analysis and capitalization: the case of IRSN | 50 |
| 3.7.2. Transfer: the case of Sonatrach | 53 |
| 3.7.3. Innovation: the case of ONERA | 58 |
| 3.8. Conclusion | 62 |
| 3.9. References | 63 |
| | |
| Chapter 4. Evolution of Firms Trajectories and Innovation: Knowledge Capital and Financial Opportunities | 67 |
| Blandine LAPERCHE | |
| 4.1. Introduction | 67 |
| 4.2. Technological and firms trajectories | 68 |
| 4.2.1. Technological paradigms and trajectories: first definitions | 68 |
| 4.2.2. Paradigms, regimes and trajectories: empirical studies | 69 |
| 4.2.3. The firm’s trajectory or evolutionary path | 71 |

| | |
|--|------------|
| 4.3. The formation of trajectories: knowledge capital and financial opportunities | 73 |
| 4.3.1. Dynamic capabilities and knowledge capital | 73 |
| 4.3.2. The collective dimension of trajectories and its consequences | 75 |
| 4.3.3. Financial opportunities, firm evolution and technical change. | 77 |
| 4.4. Conclusion | 79 |
| 4.5. References | 79 |
| Chapter 5. From Shared Inventions to Competitive Innovations: Networks and Enterprise Automation Strategies | 85 |
| Michel VIGEZZI and Dimitri UZUNIDIS | |
| 5.1. Introduction | 85 |
| 5.2. Applications of recent concepts in automation: social dynamics, shared inventions and competitive innovations | 87 |
| 5.2.1. Shared inventions... | 87 |
| 5.2.2. Competitive innovations | 90 |
| 5.2.3. Social dynamics. | 93 |
| 5.2.4. What coherences are there between shared inventions and competitive innovations?. | 94 |
| 5.3. “Phase 1” automation: machine inventions, networks of inventors and jobs | 94 |
| 5.3.1. The discoveries of these shared inventions | 95 |
| 5.3.2. Networks and shared inventions | 96 |
| 5.4. Phase 2 automation: innovations and sets of machines, networks and work dimensions | 100 |
| 5.4.1. Automation and changes in work | 100 |
| 5.5. Conclusion | 105 |
| 5.6. References | 106 |
| Chapter 6. Technologies and Inter-industrial Collaborations: A Patent Analysis | 111 |
| Didier LEBERT and François-Xavier MEUNIER | |
| 6.1. Introduction | 111 |
| 6.2. Method: the co-patent multigraph | 112 |
| 6.3. Data and descriptive statistics | 116 |
| 6.4. A structural look at R&D cooperation: results and discussion. | 124 |
| 6.5. Conclusion | 133 |
| 6.6. Appendix | 135 |
| 6.7. References | 141 |

| | |
|---|---------|
| Chapter 7. Technological Change and Environmental Transition: Lessons from the Case of the Automobile | 143 |
| Smaïl AÏT-EL-HADJ | |
| 7.1. Introduction | 143 |
| 7.2. Encountering a major technological limit: the environmental limitation | 144 |
| 7.2.1. Technological system dynamics | 144 |
| 7.2.2. Nature and forms of the environmental limit | 145 |
| 7.3. The irruption of the environmental limit as a determining/dominant factor in technological change: the case of automotive system technology | 146 |
| 7.3.1. The environmental limit of the automotive system | 147 |
| 7.3.2. Corrective action of a social, fiscal and regulatory nature | 149 |
| 7.3.3. Forms and stages of technological change in road transport | 153 |
| 7.4. The environmental limit as a factor of a major technological change | 157 |
| 7.4.1. Nature and actions of environmental limits | 157 |
| 7.4.2. Generation of a new change regime | 158 |
| 7.5. Conclusion | 160 |
| 7.6. References | 161 |
| Chapter 8. The Transformation of Defense Innovation Systems: Knowledge Bases, Disruptive Technologies and Operational Capabilities | 163 |
| Pierre BARBAROUX | |
| 8.1. Introduction | 163 |
| 8.2. The evolution of knowledge bases: duality and complexity | 165 |
| 8.2.1. Dual-use technology | 165 |
| 8.2.2. Knowledge complexity and scientific intensity | 168 |
| 8.3. The disruptive impact of technology: artificial intelligence and autonomous systems | 169 |
| 8.3.1. AI: definitions and sources of legitimacy | 170 |
| 8.4. The transformation of military capabilities: network-centric warfare and multi-domain C2 | 174 |
| 8.4.1. First step: network-centric warfare (NCW) | 174 |
| 8.4.2. Second step: multi-domain command and control (MDC2) | 176 |
| 8.5. Conclusion | 178 |
| 8.6. References | 178 |

| | |
|---|-----|
| Chapter 9. Nanotechnologies and Business Intelligence: Challenges of Information Valorization and Knowledge Creation | 183 |
| Jean-Louis MONINO | |
| 9.1. Introduction | 183 |
| 9.2. Overview of nanotechnology and its economic and technical potential. | 184 |
| 9.2.1. Understanding nanotechnology | 185 |
| 9.2.2. The challenges of nanotechnology | 188 |
| 9.2.3. The limits of nanotechnology | 190 |
| 9.3. Business intelligence | 192 |
| 9.3.1. History and definition of business intelligence. | 192 |
| 9.3.2. Information at the heart of business intelligence. | 193 |
| 9.4. Business intelligence and nanotechnology | 195 |
| 9.4.1. Examples: quantum computers, RFID chips | 196 |
| 9.4.2. Nanotechnology in industry | 197 |
| 9.4.3. What are the limits and stakes? | 199 |
| 9.5. Conclusion | 200 |
| 9.6. References | 201 |
| | |
| Chapter 10. When Innovation Innovates: How Artificial Intelligence Challenges the Patent System | 205 |
| Marc BAUDRY and Beatrice DUMONT | |
| 10.1. Introduction. | 205 |
| 10.2. Definitions and evolution over time of AI technologies | 207 |
| 10.3. The difficult issue of the patentability of AI | 209 |
| 10.3.1. The patent subject-matter eligibility of AI technologies | 209 |
| 10.3.2. Who should be listed as the inventor? | 213 |
| 10.3.3. Liability for patent infringement by AI | 215 |
| 10.4. AI patents in light of economic theory | 216 |
| 10.4.1. The rationale for granting patents | 216 |
| 10.4.2. AI patents, incremental inventions and legal implications | 218 |
| 10.5. Conclusion | 220 |
| 10.6. References | 221 |
| | |
| Chapter 11. Conflicting Standards and Innovation in Energy Transition | 223 |
| Stéphane CALLENS | |
| 11.1. Introduction: a change of culture | 223 |
| 11.2. Green innovations and standardization | 225 |
| 11.2.1. Regulatory quality defined on the basis of a relationship between standards and innovation | 228 |
| 11.2.2. Another multi-level management: sovereignty and innovation | 230 |

| | |
|---|-----|
| 11.3. The conflict of standards: globalization, sovereignty and democracy | 232 |
| 11.3.1. Acting solely through taxation? | 232 |
| 11.3.2. Acting solely through local and regional authorities? | 234 |
| 11.3.3. The conflict of standards: Europe and the United States | 235 |
| 11.4. The energy transition: a natural experiment | 240 |
| 11.5. Conclusion | 241 |
| 11.6. References | 242 |
