<b>Forewords</b> . . . . .	xi
<b>Introduction</b> . . . . .	xv
<b>About the Authors</b> . . . . .	xvii
<b>Acknowledgements</b> . . . . .	xix
<b>Chapter 1. With the Internet of Augmented Me, a New Wave of Innovation is Coming, Which Will Change Everything</b> . . . . .	1
1.1. The Internet of Augmented Me: new technologies, new jobs, new business . . . . .	1
1.2. Characteristics of the Internet of Augmented Me . . . . .	7
1.2.1. Building trust and autonomy . . . . .	8
1.2.2. The digital twin . . . . .	11
1.2.3. The interaction with objects, ATAWAD (AnyTime, AnyWhere, Any Device) . . . . .	12
1.2.4. Massive decentralization of everything . . . . .	13
1.2.5. Unimedia and open marketing . . . . .	13
1.2.6. The robot coach . . . . .	15
1.2.7. The unification of communities . . . . .	18
1.2.8. Anonymous personalization. . . . .	19
1.3. Towards business platforms and subscriptions . . . . .	19
1.4. Examples of business sectors that will be impacted by IAM . . . . .	20
1.5. Business model of the Internet of Augmented Me . . . . .	24
1.5.1. Reminder of the definition of a business model . . . . .	24
1.5.2. Main features of the business model of IAM . . . . .	25

1.5.3. Customer segmentation . . . . .	29
1.5.4. Relationship with company customers . . . . .	29
1.5.5. Distribution channels of supply, products and services. . . . .	29
1.5.6. Customer adherence to company values and brand . . . . .	30
1.5.7. Value proposal . . . . .	30
1.5.8. Main company partners . . . . .	31
1.5.9. Key company resources . . . . .	31
1.5.10. Business cost structure . . . . .	32
1.5.11. Company income . . . . .	32
1.6. Glossary . . . . .	34
<b>Chapter 2. The Patterns of the Internet of Augmented Me . . . . .</b>	<b>37</b>
2.1. Why patterns? . . . . .	37
2.2. “Zero everything economy” . . . . .	38
2.2.1. The problem . . . . .	38
2.2.2. The solution . . . . .	39
2.2.3. Consumer advantages . . . . .	43
2.3. “Shazamization of everything” . . . . .	43
2.3.1. The problem . . . . .	43
2.3.2. The solution . . . . .	44
2.3.3. Consumer advantages . . . . .	45
2.4. Consumerization of everything . . . . .	46
2.4.1. The problem . . . . .	46
2.4.2. The solution . . . . .	47
2.4.3. Consumers’ advantages . . . . .	47
2.5. Business as a Game . . . . .	48
2.5.1. The problem . . . . .	48
2.5.2. The solution . . . . .	48
2.5.3. Consumer advantages . . . . .	50
2.6. Virtualization of everything, the era of digital twins. . . . .	50
2.6.1. The problem . . . . .	50
2.6.2. The solution . . . . .	51
2.6.3. Consumer advantages . . . . .	52
2.7. The technology disappears. . . . .	52
2.7.1. The problem . . . . .	52
2.7.2. The solution . . . . .	53
2.7.3. Consumer advantages . . . . .	54
2.8. Nature as a source of inspiration . . . . .	54
2.8.1. The problem . . . . .	54
2.8.2. The solution . . . . .	55
2.8.3. Consumer advantages . . . . .	61

2.9. BOTization of Everything, “Build to Order for Me” . . . . .	61
2.9.1. The problem . . . . .	61
2.9.2. The solution . . . . .	62
2.9.3. Customer advantages. . . . .	62
2.10. Decentralization of everything. . . . .	63
2.10.1. The problem . . . . .	63
2.10.2. The solution . . . . .	63
2.10.3. Consumer advantages . . . . .	66
2.11. Automation of everything . . . . .	66
2.11.1. The problem . . . . .	66
2.11.2. The solution . . . . .	66
2.11.3. Consumer advantages . . . . .	70
2.12. Patterns are linked together, they are design compasses of the Internet of Augmented Me . . . . .	71
<b>Chapter 3. Edge Computing for Processing and Connectivity in the World of Internet of Augmented Me . . . . .</b>	<b>73</b>
3.1. Edge computing . . . . .	73
3.1.1. Summary . . . . .	73
3.1.2. Edge computing is a fundamental non-visible part of online services. . . . .	74
3.1.3. From the past to now, edge computing is a natural evolution . . . . .	75
3.1.4. Do you need a killer service to demonstrate edge computing’s reality and benefits? . . . . .	76
3.1.5. Purpose of this chapter. . . . .	78
3.2. What is edge computing? Edge of what? . . . . .	78
3.2.1. Edge of what? . . . . .	78
3.2.2. Is it a set of isolated local devices connected to the cloud? . . . . .	80
3.3. Why is edge computing so important? What are the main benefits? . . . . .	83
3.3.1. Seamless in mobility situations. . . . .	83
3.3.2. Best reaction as quickly as possible, in real time . . . . .	84
3.3.3. Crucial component in privacy protection . . . . .	84
3.3.4. Scalability to address volume and usage continuity. . . . .	85
3.4. Edge computing, a question of architecture and implementation models . . . . .	86
3.4.1. Implementation models introduction . . . . .	87
3.4.2. Fog computing model . . . . .	87
3.4.3. Cloudlet model . . . . .	88
3.4.4. Mobile edge computing model . . . . .	89

3.5. Edge computing, major technical concerns . . . . .	89
3.5.1. Networks . . . . .	89
3.5.2. Security . . . . .	90
3.5.3. Energy management . . . . .	91
3.5.4. Combining technologies to react at the right speed . . . . .	92
3.5.5. Artificial intelligence integration . . . . .	93
3.5.6. Software development practices . . . . .	94
3.6. What about usages? . . . . .	95
3.6.1. Smartphones . . . . .	96
3.6.2. Internet of Things (IoT) . . . . .	97
3.6.3. Mobility: autonomous cars and vehicles . . . . .	98
3.6.4. Smart building, Smart city, Smart home means Smart everything . . . . .	100
3.6.5. Industry . . . . .	102
3.7. Takeaways . . . . .	103
3.7.1. Main definitions . . . . .	103
3.7.2. Edge computing key performance indicators (KPIs) . . . . .	107
3.7.3. Edge computing – main figures . . . . .	109
3.8. Glossary . . . . .	110
<b>Chapter 4. Blockchain for New Flows of Value and the Empowerment of Me . . . . .</b>	<b>113</b>
4.1. Introduction . . . . .	113
4.1.1. Bitcoin, the mother of blockchains . . . . .	113
4.1.2. The consequences of Bitcoin or the Internet of Value . . . . .	114
4.1.3. From Bitcoin to blockchain(s) . . . . .	115
4.2. The six characteristics of blockchains . . . . .	116
4.2.1. Identification . . . . .	117
4.2.2. Money . . . . .	117
4.2.3. Proof . . . . .	117
4.2.4. Autonomy . . . . .	117
4.2.5. Contract . . . . .	118
4.2.6. Traceability . . . . .	118
4.3. The empowerments of ME . . . . .	118
4.3.1. The Decentralized Finance (DeFi) movement – financial empowerment . . . . .	118
4.3.2. Decentralized computing . . . . .	127
4.3.3. Energy . . . . .	128
4.3.4. Booking services . . . . .	130
4.4. Glossary . . . . .	133

<b>Chapter 5. Internet of Augmented Industry</b> . . . . .	135
5.1. Formation of a systematic approach to implement digitalization in production . . . . .	135
5.1.1. Organizational foundation. . . . .	135
5.1.2. Selection of digital initiatives. . . . .	136
5.1.3. Implementation of digital initiatives. . . . .	137
5.1.4. Selected digital initiatives. . . . .	137
5.2. Digital planning and controlling of production. . . . .	137
5.2.1. Digital planning preparation . . . . .	139
5.2.2. Digital production planning execution . . . . .	141
5.2.3. Digital controlling of production. . . . .	144
5.3. Robotics. . . . .	146
5.3.1. Pin milling robot for Jo bolt rivets . . . . .	147
5.4. Virtual and augmented reality use cases . . . . .	150
5.4.1. Digital work order . . . . .	151
5.4.2. Remote assistance . . . . .	153
5.4.3. Virtual reality for inspection . . . . .	154
5.4.4. Augmented reality (AR) for harness manufacturing . . . . .	156
5.4.5. Augmented reality (AR) for assembly. . . . .	157
5.5. Glossary and acronyms . . . . .	161
<b>Chapter 6. The “AugmentChain”: Sustainable Augmentation Value Chain for Intangible Assets</b> . . . . .	163
6.1. Are intangible assets the 21st Century’s key value drivers? . . . . .	163
6.2. What are intangible asset value locks? . . . . .	165
6.3. Can blockchain unleash the full value of intangible assets? . . . . .	166
6.3.1. Blockchain: the “trust machine” to neutralize human corruptibility. . . . .	166
6.3.2. A hybrid human–machine trust protocol . . . . .	167
6.3.3. EOS, a path to solve some systemic blockchain issues. . . . .	169
6.3.4. In spite of massive R&D worldwide and an explosion in use-cases, blockchain is still – after 10 years of existence – Tech4Geeks4Speculation! . . . . .	170
6.3.5. Towards GreenTouch4Good and a sustainable digital: the “Internet of Augmented Me, IAM”! . . . . .	170
6.3.6. Emergence of “empowerment driven” blockchain protocols and usage . . . . .	171
6.3.7. Blockchain map . . . . .	172
6.4. What is the intangible asset AugmentChain? . . . . .	173
6.4.1. Continuum of three worlds: physical, digital and biological. . . . .	173

6.4.2. The AugmentChain is propelled by three “pyramidal” engines . . . . .	175
6.4.3. The outcome pyramidal engine. . . . .	176
6.4.4. The AugmentChain enabler’s pyramidal engine. . . . .	179
6.4.5. The AugmentChain catalyst’s pyramidal engine . . . . .	191
6.5. Conclusion and takeaways . . . . .	199
6.6. List of acronyms . . . . .	200
<b>References</b> . . . . .	203
<b>Index</b> . . . . .	205
