Introduction	xi
Irene G. CURULLI, Deniz IKIZ KAYA and Arghavan KHAEFI	
Part 1. Heritage Education Pedagogies and Approaches for Climate Action	1
Chapter 1. Cross-Disciplinary Pedagogies: Education on Heritage and Climate Change in Europe	3
Pelin GÜROL-ÖNGÖREN, Sibel ACAR, Asli ÖZBEK and Burçin YILMAZ	
1.1. Introduction	3
1.2. Climate change and heritage education	4
1.3. Research and analysis	6
1.4. Conclusion	14
1.5. References	14
Chapter 2. Designing “Climatic Constructal Heterotopias” Using Constructal Thermodynamics: Connecting Theories on Architecture and Thermodynamics	17
Lazaros MAVROMATIDIS	
2.1. Introduction and general context	17
2.2. Indeterminacy, autonomy, thermodynamics: the concept of constructal “ <i>climatic heterotopias</i> ”	19
2.3. Macroscopic and microscopic thermodynamics of architectural conception: entropy and evolution	23

2.4. Conclusion	25
2.5. References	28
Chapter 3. Training for Cultural Heritage Protection: The STRENCH Summer Schools.	31
Anna KAISER	
3.1. The STRENCH project	32
3.2. The STRENCH online summer schools (2020 and 2021)	33
3.3. On-site follow up exercises – the example of “TRITOLIA18”	36
3.3. References	39
Chapter 4. Pedagogical Aspects of Conservation-Restoration Practice in the Protection of Architectural Heritage	41
Yavor DANKOV, Yakim DEYKOV and Andjela DANKOVA	
4.1. Introduction.	41
4.2. Application of didactic principles in different target groups	43
4.2.1. Target group 1 – children and young people	43
4.2.2. Target group 2 – students whose disciplinary expertise directly corresponds to the CH issues	44
4.2.3. Target group 3 – students whose disciplinary expertise does not directly correspond to the CH issues	46
4.2.4. Target group 4 – citizens with extracurricular status	46
4.3. Architecture and CH	46
4.4. The role of didactic games in forming knowledge and attitude toward the CH issues	47
4.5. Conclusion	49
4.6. References	49
Chapter 5. Educational Video Games on Climate Resilience of Built Cultural Heritage	53
Boyan BONTCHEV, Valentina TERZIEVA, Albena ANTONOVA, Yavor DANKOV and Dessislava VASSILEVA	
5.1. Introduction.	53
5.2. e-CREHA video games for climate resilience and built heritage	55
5.3. APOGEE approach for generation of enhanced maze video games.	55
5.4. Results from two maze video games about resilience and vulnerability of built heritage	57
5.5. Conclusion	60
5.6. References	61

Chapter 6. Heritage Education for Climate Justice and Adaptation	65
Susan ROSS	
6.1. <i>Just Transitions: Heritage Education for Climate Adaptation</i>	65
6.2. ICOMOS University Forum – June 3–4, 2022	67
6.3. Knowledge areas for heritage education: panel theme overviews	69
6.4. Land acknowledgement(s) and climate heritage education	71
6.5. Outputs and dissemination	72
6.6. References	73
Chapter 7. Education for Climate Resilient Architectural Heritage (e-CREHA): Multidisciplinary Blended Learning for Climate Resilient Heritage	75
Irene G. CURULLI, Deniz IKIZ KAYA, Rossella NOCERA and Luciano DE BONIS	
7.1. Introduction.	75
7.2. Objectives and methodology.	77
7.3. Course assessment activities.	79
7.4. ISPs-design workshops 1 and 2	80
7.5. Lesson learned: advancing heritage critical thinking through interdisciplinary teaching	89
7.6. Acknowledgments.	90
7.7. References	90
Part 2. Training on Heritage Vulnerability and Risk Assessment	93
Chapter 8. Re-enabling Co-evolutionary Patterns to Reduce Landscape Vulnerability	95
Luciano DE BONIS, Rossella NOCERA and Giovanni OTTAVIANO	
8.1. Resilience and vulnerability	95
8.2. Flexibility and “resiliency vulnerability”	97
8.3. Vulnerability of the Built Environment as natural/human system	100
8.4. Vulnerability of the BCE as vulnerability of landscape heritage.	100
8.5. Climate resilient self-sustainable local developments	102
8.6. Fundamentals of climate resilient territorial project	106
8.7. A case study from the Molise region, Italy	108
8.7. References	112

Chapter 9. Lebanon: Landscape at Risk	115
Maria Gabriella TROVATO	
9.1. Introduction.	115
9.2. The Landscape	116
9.3. Lebanon	117
9.4. Heritage, climate change and the landscapes at risk	120
9.5. Method	121
9.5.1. Case study	122
9.6. Discussion	125
9.7. Conclusion	131
9.8. Acknowledgments	132
9.9. References	132
Chapter 10. Cultural Resilience of the Oploo Watermill	139
Eva STARK and Lina BEKKER	
10.1. Methodology	140
10.2. History of the Oploo watermill	140
10.3. The Sint Matthias Guild.	143
10.4. Heritage used for climate resilience.	144
10.5. Survey results.	146
10.6. Conclusion	146
10.7. References.	148
Part 3. Education on Climate Adaptation of Heritage	151
Chapter 11. Case-Based Teaching for Climate Heritage Education: Climate Adaptation of Historic Watermill Landscapes as a Case Study	153
Deniz IKIZ KAYA and Irene G. CURULLI	
11.1. Introduction	153
11.2. Case study.	155
11.3. The educational activities.	156
11.4. Discussion: design-oriented pedagogical approaches for climate heritage education.	159
11.5. Acknowledgments	160
11.6. References.	160

Chapter 12. Increasing Climate Change Resilience by Adapting 20th Century Built Heritage	161
Nihan BULUT	
12.1. Introduction	162
12.1.1. Problem definition	162
12.1.2. Research aim	163
12.2. Adaptation of 20th century built heritage and its methodology.	163
12.2.1. Understanding the context	163
12.2.2. Significance of the 20th century built heritage for adaptation	165
12.2.3. Methodology of interventions	166
12.2.4. Development of the framework	168
12.3. Expected results and discussion	171
12.3.1. Evaluation of the process	171
12.3.2. Integration of the outcomes into heritage education	172
12.4. Conclusion and further research topics	173
12.5. References.	174
Chapter 13. A Transformative Approach to Cultural Heritage Education for Climate Action	177
Paloma GUZMAN and Jelle BUIJS	
13.1. Introduction	177
13.2. Cultural heritage perspectives for integrative climate planning	179
13.3. A case study of transformative approaches in higher education	182
13.4. The role of architecture and planning education in fostering transformation towards sustainability?	185
13.5. References.	187
Chapter 14. Recalibrating Seasonal Cultures with Communities	191
Scott BREMER	
14.1. Seasonal cultures as intangible heritage for climate adaptation	191
14.2. Co-producing seasonal cultures within institutions.	193
14.3. Mixed methods for studying and changing seasonal cultures.	195
14.3.1. Critical ethnography	195
14.3.2. Workshops and walkshops.	196
14.3.3. Art-science collaboration	197
14.4. Affecting adaptation through seasonal cultures	198
14.5. Acknowledgments	199
14.6. References.	199

Chapter 15. Integrating Climate Change Concerns in Capacity Building for World Heritage	203
Maya ISHIZAWA ESCUDERO, Eugene JO and Rohit JIGYASU	
15.1. Climate change concerns in the World Heritage system.	204
15.2. Shifting approaches to World Heritage Capacity Building	206
15.2.1. From training to capacity building	206
15.2.2. The heritage place approach.	207
15.2.3. Nature and culture.	207
15.2.4. Practice–Research–Policy Nexus.	209
15.2.5. Resilience and disaster risk management	210
15.3. Conclusion: a way forward.	211
15.4. References.	212
Appendices. Reflections on the Future of Heritage Education	217
Appendix 1. Heritage as a Discipline in the French Schools of Architecture	219
Lazaros MAVROMATIDIS	
Appendix 2. Climate, Heritage, Resilience	229
Irene G. CURULLI and Deniz IKIZ KAYA	
Appendix 3. Reflection Paper on Degree and Master’s Programs on Heritage and Resilience	231
Rossella NOCERA, Luciano DE BONIS and Giovanni PARISANI	
Appendix 4. Climate Change and Heritage Issues in Architecture Curricula: The Cases of Turkey, Finland, Denmark and MOOCs	235
Pelin GÜROL-ÖNGÖREN, Sibel ACAR, Aslı ÖZBEK, Burçin YILMAZ and Irem KÜÇÜK	
List of Authors	239
