Foreword: Additive Manufacturing: From 3D Printing to Bio-printing	vii
Preface	xi
Introduction	xxxv
Chapter 1. Invention: Creativity to Proof of Concept	1
1.1. Introduction: concepts and the innovation “valleys of death”	1
1.1.1. A look back at creativity.	8
1.1.2. Creativity, disruption and crisis	10
1.1.3. Methods for developing creativity	23
1.1.4. Estimating creativity	25
1.2. Proof of concept	27
1.2.1. Integrating an idea into a (hopefully) rational framework	28
1.2.2. A transition to POC.	33
1.2.3. Basis for building a POC	39
1.3. Interdisciplinarity and heuristic approach	47
1.3.1. Theoretical considerations.	49
1.3.2. Heuristics and interdisciplinarity.	53
1.3.3. Some constraints to overcome	56
1.3.4. In practice	59
1.4. Conclusion	63
1.5. References	65

Chapter 2. From Invention to Innovation	85
2.1. Preamble	85
2.2. Introduction.	91
2.3. Methodologies to be put in place	98
2.4. Innovation policies	103
2.4.1. An ambiguous situation	106
2.4.2. Technological paradigms	110
2.4.3. Innovation ecosystems.	113
2.4.4. Innovation accelerators	116
2.5. Innovation models.	117
2.5.1. Open innovation	120
2.5.2. Knowledge management	122
2.5.3. Research versus industry	125
2.5.4. Design-thinking	127
2.5.5. Fab-Labs	131
2.6. Inventing/innovating	134
2.6.1. General framework	135
2.6.2. Innovation and responsiveness	142
2.6.3. Innovation programming	149
2.6.4. Innovation positioning	151
2.7. Standards, standardization, various filters	152
2.7.1. Norms and standards	153
2.8. The question of industrial disruption	155
2.8.1. Disruption conditions	157
2.8.2. Local changes, systemic changes	158
2.8.3. Convinced?	161
2.9. References	164
Conclusion of Volume 1.	185
Index	187
