<b>Preface</b> . . . . .	xiii
Michele FARISCO	
<b>Part 1. Neuroethics as a Field</b> . . . . .	1
<b>Chapter 1. Examining the Ethics of Neuroscience in Contemporary Neuroethics</b> . . . . .	3
Cynthia FORLINI	
1.1. Introduction . . . . .	3
1.2. A brief history of neuroethics . . . . .	4
1.2.1. Pluralism in the definitions of neuroethics . . . . .	5
1.2.2. A fundamental distinction in neuroethics inquiry . . . . .	6
1.2.3. Technology and healthcare as drivers of the ethics of neuroscience . . . . .	7
1.3. Critiques of the ethics of neuroscience. . . . .	9
1.3.1. Critique 1: reinventing the bioethics wheel. . . . .	9
1.3.2. Critique 2: a dose of “neuroskepticism” . . . . .	11
1.4. Responses to critiques of the ethics of neuroscience . . . . .	12
1.5. Blind spots in the ethics of neuroscience are opportunities for engagement . . . . .	14
1.6. Conclusion . . . . .	16
1.7. References . . . . .	16
<b>Chapter 2. Neuroscience of Ethics</b> . . . . .	21
Georg NORTHOFF	
2.1. Introduction . . . . .	21
2.2. Example I: a non-reductionistic and neuro-ecological model of brains . . . . .	22
2.2.1. History of neuroscience – passive versus active models of brains . . . . .	22
2.2.2. Neuroscience – passive versus active models of the brain . . . . .	24
2.2.3. A spectrum model – the hybrid nature of the brain’s activity . . . . .	24
2.2.4. The brain’s spontaneous activity – constitution of its own spatio-temporal structure on a functional level . . . . .	25

2.2.5. Spontaneous activity and mental features – neuro-ecological rather than neuronal . . . . .	26
2.2.6. Psychiatric disorders – “spatio-temporal psychopathology” . . . . .	26
2.3. Example II: from the neural basis of sense of self to relational agency . . . . .	27
2.3.1. Neuroscience of the self – mapping distinct aspects of the self onto different brain regions . . . . .	27
2.3.2. Self and brain – agency is ecological and relational . . . . .	29
2.4. Example III: enhancement of self – deep brain stimulation . . . . .	30
2.4.1. Deep brain stimulation – its application in bipolar disorder . . . . .	30
2.4.2. Effects of DBS on the self – a quest for neuronal mechanisms . . . . .	31
2.5. Conclusion . . . . .	32
2.6. References . . . . .	33
<b>Chapter 3. Fundamental Neuroethics</b> . . . . .	37
Kathinka EVERS	
3.1. Science and ethics . . . . .	37
3.2. Neuroethics. . . . .	39
3.3. Fundamental versus applied neuroethics. . . . .	40
3.4. Fundamental neuroethics as a key component of European research and innovation in the area of neuroscience . . . . .	41
3.5. Conceptual analysis in fundamental neuroethics methodology . . . . .	44
3.6. Fundamental neuroethics connecting neuroscience with “free will” and social structures . . . . .	48
3.7. Conclusion . . . . .	51
3.8. Acknowledgments . . . . .	51
3.9. References . . . . .	52
<b>Chapter 4. Diversity in Neuroethics: Which Diversity and Why it Matters?</b> . . . . .	55
Eric RACINE and Abdou Simon SENGHOR	
4.1. Background. . . . .	55
4.2. Diversity and cultural diversity. . . . .	57
4.3. Diversity, ethics and neuroethics’ uneasy relationship with diversity. . . . .	59
4.4. Should neuroethics take cultural diversity into account, and why? . . . . .	65
4.5. Conclusion . . . . .	68
4.6. References . . . . .	70
<b>Chapter 5. Neurofeminism in BCI and BBI Ethics as a Prelude to Political Neuroethics</b> . . . . .	77
Mai IBRAHIM and Veljko DUBLJEVIĆ	
5.1. Introduction . . . . .	78
5.2. Brain-to-brain interfaces . . . . .	79

5.3. Neurosexism . . . . .	81
5.4. Agential realism . . . . .	85
5.5. Political perspective in neuroethics . . . . .	89
5.6. Conclusion . . . . .	91
5.7. References . . . . .	91
<b>Chapter 6. Neuroethics as an Anthropological Project . . . . .</b>	<b>95</b>
Fabrice JOTTERAND	
6.1. Introduction . . . . .	95
6.2. The nature of neuroethics . . . . .	96
6.2.1. Neuroethics as a second-order discipline . . . . .	96
6.2.2. Neuroethics, neurology and brain research . . . . .	97
6.3. Neuroethics as an anthropological project . . . . .	100
6.4. Protecting the brain and the mind . . . . .	102
6.4.1. Neuroessentialism and neuroexceptionalism . . . . .	102
6.4.2. Identity integrity: protecting brain and mind . . . . .	103
6.5. Concluding remarks . . . . .	104
6.6. References . . . . .	104
<b>Part 2. Cultural Influences on Neuroethics . . . . .</b>	<b>107</b>
<b>Chapter 7. Neuroethics and Culture . . . . .</b>	<b>109</b>
Arleen SALLES	
7.1. Introduction . . . . .	109
7.2. Neuroethics and the challenge of cultural diversity . . . . .	111
7.2.1. International neuroethics . . . . .	111
7.2.2. Culturally aware/engaged neuroethics . . . . .	112
7.2.3. Towards a global neuroethics . . . . .	113
7.3. Can neuroethics contribute to the discussion? . . . . .	114
7.3.1. The brain on culture . . . . .	114
7.3.2. Culture and the brain: some challenges . . . . .	116
7.3.3. Is there a role for neuroethics? . . . . .	118
7.4. Concluding remarks and the way forward . . . . .	119
7.5. Acknowledgments . . . . .	120
7.6. References . . . . .	120
<b>Chapter 8. Globalization of Neuroethics: Rethinking the Brain and Mind “Global Market” . . . . .</b>	<b>125</b>
Karen HERRERA-FERRÁ	
8.1. Introduction . . . . .	125
8.2. Neuroethics within the global market: the “normality” problem . . . . .	128

---

8.2.1. The neuroethical gap: cultural – beliefs and perspectives of the brain and mind . . . . .	131
8.3. Neuroethics in a consumer country: a narrative from Mexico . . . . .	132
8.4. Conclusion and future directions . . . . .	136
8.5. References . . . . .	137
<b>Chapter 9. The Dilemma of Cross-Cultural Neuroethics . . . . .</b>	<b>143</b>
Laura SPECKER SULLIVAN and Karen S. ROMMELFANGER	
9.1. Framing . . . . .	143
9.1.1. Neuroscience and culture? . . . . .	143
9.1.2. State of the art of cross-cultural neuroethics . . . . .	145
9.2. Benefits and aims of cross-cultural neuroethics . . . . .	146
9.2.1. Intercultural understanding . . . . .	147
9.2.2. Self-awareness . . . . .	147
9.2.3. Mutual interest and cooperation . . . . .	148
9.2.4. Intracultural creativity . . . . .	148
9.3. Potential forms of cross-cultural neuroethics . . . . .	148
9.3.1. Summits and international meetings . . . . .	149
9.3.2. Historical, sociological and anthropological research . . . . .	149
9.3.3. Community-based participatory research (CBPR) . . . . .	150
9.3.4. Cultural competency/critical theory/DEI . . . . .	150
9.4. Challenges in cross-cultural neuroethics . . . . .	151
9.4.1. Intracultural diversity . . . . .	151
9.4.2. Domestic politics and power . . . . .	152
9.4.3. International politics and power . . . . .	152
9.4.4. The dilemma of cross-cultural neuroethics . . . . .	153
9.5. Conclusion . . . . .	154
9.6. References . . . . .	155
<b>Chapter 10. Neuroethics in Religion and Science: Hume’s Law and Bodily Value . . . . .</b>	<b>159</b>
Denis LARRIVÉE	
10.1. Introduction . . . . .	159
10.2. Contingency, autonomy and bodily value . . . . .	165
10.2.1. Identifying in human freedom bodily value: Newtonian regularity and quantum chaos . . . . .	165
10.2.2. Biological autonomy and physical contingency – the organism . . . . .	167
10.3. Autonomy as a constituent ground of nature: a metaphysical composition . . . . .	169
10.3.1. Substances and bodily unification . . . . .	169
10.3.2. Ontological subsistence: the personal subject as a causal origin . . . . .	171

10.3.3. Newtonian determinism and organismal autonomy: from an extrinsic to an intrinsic causal order . . . . .	171
10.4. The personal subject and intrinsic corporal value . . . . .	173
10.4.1. Wojtyła's metaphysical subject . . . . .	173
10.4.2. Kant, intrinsic value and the categorical imperative . . . . .	174
10.5. Conclusion . . . . .	175
10.6. References . . . . .	175
<b>Chapter 11. How Would Neo-Confucians Value Moral Neuroenhancement?</b> . . . . .	179
Jie YIN	
11.1. Moral neuroenhancement: the scenario and the conceptual challenge. . . . .	180
11.2. How would neo-Confucians value moral neuroenhancement? . . . . .	184
11.3. Concluding remarks: the complementary role of Chinese philosophy in applied ethics. . . . .	190
11.4. References . . . . .	191
<b>Part 3. Illustrative Cases</b> . . . . .	193
<b>Chapter 12. How Do Arabic Cultural and Ethical Perspectives Engage with New Neuro-technologies? A Scoping Review.</b> . . . . .	195
Amal MATAR	
12.1. Background . . . . .	195
12.2. Methods . . . . .	196
12.3. Results. . . . .	197
12.3.1. Culture . . . . .	198
12.3.2. Ethics literature . . . . .	202
12.4. Discussion. . . . .	204
12.5. Conclusion . . . . .	206
12.6. Acknowledgments . . . . .	207
12.7. Appendix . . . . .	207
12.8. References . . . . .	212
<b>Chapter 13. The Binary Illusion</b> . . . . .	217
Karin GRASENICK	
13.1. A brain is still a brain . . . . .	217
13.2. Imagine all the people living life in vain . . . . .	218
13.3. This land is my land, from the asylum to the last island . . . . .	219
13.4. Little bits of history repeating . . . . .	221
13.5. What's good for me is good enough for you . . . . .	222
13.6. They keep saying they have something for you . . . . .	223
13.7. Sign of the times . . . . .	226

13.8. Just microscopic cogs for a neuroethics plan (conclusion) . . . . .	228
13.9. References . . . . .	229
<b>Chapter 14. What's Next? The Chilean Neuroprotection Initiative, in Light of the Historical Dynamics of Human Rights . . . . .</b>	<b>235</b>
Manuel GUERRERO	
14.1. Introduction . . . . .	235
14.2. Battling on the “last frontier”: the Chilean neuroprotection legislation . . . .	236
14.3. The Chilean neuroprotection initiative, an unfinished project . . . . .	241
14.4. References . . . . .	246
<b>Chapter 15. Interrogating the Culture of Human Exceptionalism: Animal Research and the Neuroethics of Animal Minds and Brains . . . . .</b>	<b>249</b>
L. Syd M JOHNSON	
15.1. Introduction . . . . .	249
15.2. Brains, minds, consciousness and moral status . . . . .	250
15.3. Chimeras and humanization: the overexamined problem . . . . .	252
15.3.1. Chimeric non-human primates . . . . .	257
15.4. Already human-like: the overlooked problem . . . . .	260
15.5. Implications: justice in neuroscientific research . . . . .	260
15.6. Interrogating the anthropocentric culture and human exceptionalism of neuroethics . . . . .	263
15.7. References . . . . .	266
<b>Chapter 16. Cultural Neuroethics in Practice – Human Rights Law and Brain Death . . . . .</b>	<b>271</b>
Jennifer A. CHANDLER	
16.1. Introduction . . . . .	271
16.2. The concept of brain death . . . . .	273
16.3. Objections to brain death: culture, religion and demographic minorities . . . .	275
16.4. What is at stake with the definition of death? . . . . .	276
16.5. Legal responses to brain death objection . . . . .	279
16.6. Accommodation of dissenting views . . . . .	281
16.7. Conclusion . . . . .	282
16.8. Acknowledgments . . . . .	283
16.9. References . . . . .	283
<b>Chapter 17. Neuroscientific Research, Neurotechnologies and Minors: Ethical Aspects . . . . .</b>	<b>287</b>
Laura PALAZZANI	
17.1. The importance of neuroscientific and neurotechnological research on minors . . . . .	287

---

17.2. Ethical criteria of neuroscientific research on minors in the medical field . . .	289
17.2.1. Justification of scientific relevance of the research. . . . .	290
17.2.2. The benefit/risk balance and the protection of physical and mental integrity . . . . .	290
17.2.3. Personal identity. . . . .	291
17.2.4. Autonomy: informed consent of minors and informed consent of parents . . . . .	292
17.2.5. Incidental findings. . . . .	295
17.2.6. Predictive value of brain images . . . . .	296
17.2.7. Single-patient reports . . . . .	297
17.2.8. Privacy: the use of neural data . . . . .	297
17.2.9. Justice . . . . .	298
17.3. Research for neuro-enhancement purposes . . . . .	298
17.4. Use of neurotechnologies in non-medical field without any research . . . . .	300
17.5. Some conclusive reflections. . . . .	301
17.6. References . . . . .	302
<b>Conclusion</b> . . . . .	305
Michele FARISCO	
<b>List of Authors</b> . . . . .	311
<b>Index.</b> . . . . .	315
