<b>Preface</b> .....	ix
Sylvain DAVID, Jacques PERCEBOIS and Nicolas THIOLLIÈRE	
<b>Chapter 1. The Evolution of Nuclear Energy in the World and in France</b> .....	1
Daniel IRACANE, Stéphanie TILLEMENT and Frédéric GARCAS	
1.1. Introduction. ....	1
1.2. Nuclear power in the world .....	3
1.2.1. Creating long-term visibility seducing the market to invest: the case of the United Kingdom .....	4
1.2.2. Nuclear activities at the heart of State integration and at the service of economic diplomacy: the case of Russia. ....	8
1.2.3. The concrete implications of political change: the case of South Korea .....	11
1.2.4. A new innovation paradigm at the service of reconquering the market: the case of the United States .....	13
1.2.5. The severe nuclear accident or the possibility of a sudden halt to the use of nuclear energy: the case of Japan .....	18
1.2.6. China: the emergence of an international leader .....	22
1.2.7. The need for multinational coherence in energy policies: the case of difficult European convergence .....	27

1.3. The trajectory of the French nuclear ecosystem, between continuity and rupture . . . . .	33
1.3.1. The origins of French civil nuclear energy . . . . .	35
1.3.2. French nuclear power in the industrial age . . . . .	39
1.3.3. A story within a story: sodium-cooled fast reactors (SFRs) . . . . .	40
1.3.4. The “white” years: the gradual decline of new projects . . . . .	42
1.3.5. The painful emergence of a “nuclear revival” in France: projects, organizations and competencies. . . . .	44
1.4. Conclusion . . . . .	51
1.5. References . . . . .	53
<b>Chapter 2. Nuclear Costs: Methodological Aspects . . . . .</b>	<b>55</b>
Jean-Guy DEVEZEAUX DE LAVERGNE and Nicolas THIOLLIÈRE	
2.1. Introduction. . . . .	55
2.2. The different notions of costs . . . . .	56
2.2.1. Nuclear costs and associated challenges . . . . .	57
2.2.2. Defining the actors concerned by an economic question. . . . .	57
2.2.3. Organizing cost concepts following a temporal logic. . . . .	58
2.2.4. Specifying the scope of cost analyses . . . . .	59
2.2.5. Choosing the appropriate calculation methods. . . . .	63
2.2.6. Data . . . . .	65
2.3. The discounted cost of nuclear electricity . . . . .	66
2.3.1. Roles and challenges of economic calculation . . . . .	67
2.3.2. Key preliminary concepts for calculating the LCOE . . . . .	70
2.3.3. Calculation of the LCOE. . . . .	73
2.4. Determining the discount rate . . . . .	76
2.4.1. The three theoretical approaches . . . . .	77
2.4.2. Values and effects of the discount rate . . . . .	79
2.5. Case study: a new nuclear reactor. . . . .	83
2.5.1. Reference scenario . . . . .	83
2.5.2. Results . . . . .	88
2.6. Conclusion . . . . .	92
2.7. References . . . . .	94
<b>Chapter 3. The Production Costs of Nuclear Electricity. . . . .</b>	<b>97</b>
Jean-Guy DEVEZEAUX DE LAVERGNE	
3.1. Introduction. . . . .	97
3.2. Nuclear costs of existing reactors (Generation II) . . . . .	98

3.2.1. Cost assessment methods for historical reactors . . . . .	98
3.2.2. Existing fleet costs . . . . .	104
3.3. Costs of nuclear electricity at the power station terminal . . . . .	117
3.3.1. Construction costs of 3G water reactors. . . . .	118
3.3.2. Financing terms and risks for parties . . . . .	130
3.3.3. Changes in other components of the future nuclear cost . . . . .	137
3.4. Overview of production costs of other nuclear technologies: SMR and FNR. . . . .	142
3.4.1. SMR reactors . . . . .	143
3.4.2. Fast neutron reactors . . . . .	145
3.5. Electrical system costs and nuclear competitiveness. . . . .	147
3.5.1. Calculation of system costs . . . . .	149
3.5.2. Nuclear system costs . . . . .	149
3.5.3. System costs and choice hierarchy . . . . .	150
3.5.4. Competition, synergies and complementarities between nuclear and renewable energy . . . . .	152
3.6. Conclusion . . . . .	153
3.7. References . . . . .	158
<b>Chapter 4. The Costs of Nuclear Fuel . . . . .</b>	<b>163</b>
Cécile EVANS, Sophie GABRIEL, Christian POLAK and Philippe VALBUENA	
4.1. The cost of fuel expressed in the LCOE . . . . .	166
4.2. Uranium: availability and markets . . . . .	169
4.2.1. Uranium consumption . . . . .	169
4.2.2. Terminology, resources and reserves . . . . .	171
4.2.3. Uranium resources . . . . .	178
4.2.4. Secondary resources . . . . .	184
4.2.5. The uranium market . . . . .	186
4.2.6. Prospecting and exploration expenditures . . . . .	200
4.3. From conversion to fuel fabrication . . . . .	206
4.3.1. Conversion . . . . .	206
4.3.2. Enrichment. . . . .	214
4.3.3. Fuel design and fabrication . . . . .	222
4.3.4. Development prospects: advanced ATF fuels . . . . .	232
4.4. References . . . . .	233

<b>Appendix: Ore Deposits and Mining Projects</b> . . . . .	235
Sophie GABRIEL and Christian POLAK	
<b>List of Authors</b> . . . . .	241
<b>Index</b> . . . . .	243
<b>Summary of Volume 2</b> . . . . .	245
