Introduction	ix
Part 1. Phylogenetics of the Emergence of Humans	1
Chapter 1. The Long and Slow Emergence of Humans	3
1.1. The difficulty of thinking about the beginning of the human being	3
1.2. The current challenge of human construction.	7
Chapter 2. Technique and Becoming Human	9
2.1. A general definition of technique	9
2.2. Awareness and use of techniques	13
2.3. Technical posture in human phylogenesis	14
Chapter 3. Ethology: Technique and the Frog	17
3.1. The Goliath frog: a technician frog	17
3.2. Causes for the Goliath frog's gigantic size	18
Chapter 4. Neoteny: From Concept to Grand Narrative	19
4.1. Sources of the concept of neoteny in biology	19
4.2. Applying the concept of neoteny to the human being	20
4.3. Appropriation of the concept of neo-neoteny by the humanities.	22
4.4. Neotenization: a "grand narrative" of the emergence of the human being	24

Chapter 5. Issues of Neoteny and Technique	27
5.1. A very old conception of human “disabilities”	27
5.2. The equipped human and neotenic human: two unrelated concepts	28
5.3. The philosophy of technique: a recent discipline	30
Chapter 6. Neoteny and Fetal Consciousness	33
6.1. Humans before birth	33
6.2. Humanity of the baby at birth	35
6.3. Ancient protection of the human baby at birth	36
Chapter 7. Inversion of the Analysis: The Lamarckian Bias	39
7.1. The ambiguous concept of adaptation	39
7.2. The uselessness of adaptation with the concept of natural selection	41
7.3. The use of a tool: a selective system	43
7.4. From tool-based technique to body-based technique	44
7.5. New evolutionary narratives	46
Chapter 8. Animal Behavior: Hermit Crabs and Their Shells	51
8.1. The hermit crab: a strange crustacean	51
8.2. The hermit crab: an oblivious technician?	52
Chapter 9. Prejudice About the Priority of Values	55
9.1. The human sense of morality: an exception?	55
9.2. Prioritizing cognitive ability in human characteristics	56
9.3. Role of technique in the emergence of language	58
Chapter 10. The First Phase of the Hominization Process	61
10.1. The conditions of access to humans through technique	61
10.2. Verticality as the first pre-human technical experience	66
10.3. The consequences of verticality	78

Chapter 11. Towards the Verticalization of the Genus <i>Homo</i>	83
11.1. Aging of technical achievements	83
11.2. Phylogenesis of characteristics and lineages.	88
11.3. From Australopithecus to the genus <i>Homo</i> : the selection of technicality	94
 Chapter 12. Technical Evolution and Neoteny of the Genus <i>Homo</i>	101
12.1. <i>Homo habilis</i> : a new bushy development?	101
12.2. <i>Homo erectus</i> , the advent of a technical humanity	106
12.3. <i>Homo sapiens</i> , the advent of inner life and the imaginary.	113
 Part 2. Technique and Human Ontology	127
 Chapter 13. Technique as the Foundation of the Human Being	129
13.1. A look back at stone-knapping: the contribution of neuroscience	129
13.2. Explaining humans through technique: a conceptual error	132
13.3. Mental exaptation as a norm of human development	136
13.4. The relationship between bodily technique and tool technique	139
13.5. Variability of technical capabilities	145
 Chapter 14. The Domestication of the Wolf: A Decisive Advantage?	149
14.1. The oldest domestication	149
14.2. The co-evolution of humans and dogs	150
14.3. The strength of the association between humans and dogs	154
 Chapter 15. Reforming Our Thinking About Humans?	157
15.1. The human characteristic: a search without a future?	157
15.2. The major innovation in body techniques	159
15.3. Technique and the game: a fundamental intertwining factor	163
15.4. New accounts of the emergence of culture.	165
15.5. The influence of techniques on evolutionary processes	169

15.6. The relationship between technical behavior and biological evolution.	174
15.7. The selection of neoteny	180
15.8. Towards the human being: convergences and co-evolutions	187
15.9. <i>Homo sapiens</i> , a convergence of multiple capacities.	191
15.10. The ultimate technical step towards the human: mental technique	196
15.11. The technical inscription of the mind	204
15.12. The construction of thought.	205
Chapter 16. Emergence, Then Global Expansion	207
16.1. Rapid global development	207
16.2. Great linguistic diversification.	208
16.3. Co-evolution of cultures, languages and techniques	208
16.4. The anthropization of the planet.	209
Chapter 17. The Myth of the Golden Age	211
17.1. The Golden Age in ancient myths	211
17.2. The Golden Age of modern thinkers	213
17.3. Believing in a golden age: a cognitive bias?.	214
Conclusion	217
