Contents

Foreword ix

Preface xi

Chapter 1. Classical Branching Models 1

1.1. Bienaymé–Galton–Watson process 1
1.1.1. Moments and probability of extinction 4
1.1.2. Limit theorems 9
1.2. Processes with unrestricted immigration 17
1.2.1. Limit theorems 21
1.2.2. Critical process with decreasing to zero immigration 25
1.3. Processes with immigration after empty generation only 29
1.3.1. Limit theorems 31
1.3.2. Critical process with decreasing to zero immigration 36
1.4. Background and bibliographical notes 40

Chapter 2. Branching Processes with Migration 43

2.1. Galton–Watson process with migration 43
2.2. Limit theorems 47
2.2.1. Non-critical processes 47
2.2.2. Critical processes with non-negative migration mean 49
2.2.3. Critical processes with negative migration mean 52
2.3. Regeneration and migration 55
2.3.1. Alternating regenerative processes 56

2.3.2. An extension of Galton–Watson processes with migration . . . 58
2.4. Background and bibliographical notes . . . 62

Chapter 3. CB Processes: Extinction . . . 65

3.1. Definition of processes and basic properties . . . 65
3.1.1. Basic properties . . . 69
3.1.2. Probability generating functions and moments . . . 73
3.2. Extinction probability . . . 75
3.2.1. Subcritical processes . . . 76
3.2.2. Supercritical processes . . . 78
3.2.3. Critical processes . . . 84
3.3. Background and bibliographical notes . . . 91

Chapter 4. CB Processes: Limit Theorems . . . 95

4.1. Subcritical processes . . . 95
4.2. Critical processes . . . 100
4.2.1. Extinction is not certain . . . 101
4.2.2. Extinction is certain . . . 109
4.2.3. Feller diffusion approximation . . . 110
4.3. Supercritical processes . . . 115
4.3.1. Almost sure convergence . . . 117
4.3.2. L^1–convergence . . . 118
4.3.3. L^2–convergence . . . 121
4.4. Background and bibliographical notes . . . 125

Chapter 5. Statistics of CB Processes . . . 127

5.1. Maximum likelihood estimation . . . 127
5.1.1. MLE based on entire family tree up to nth generation . . . 130
5.1.2. EM algorithms for incomplete data . . . 146
5.1.3. Simulated example . . . 152
5.2. Conditional weighted least squares estimation . . . 158
5.2.1. Subcritical processes . . . 159
5.2.2. Critical processes . . . 161
5.2.3. Supercritical processes . . . 166
5.3. Minimum disparity estimation . . . 169

5.4. Bayesian inference 171
5.4.1. Estimation based on entire family tree up to nth generation . 172
5.4.2. MCMC algorithms for incomplete data 173
5.5. Background and bibliographical notes 176

Appendices 179

Appendix 1 181

Appendix 2 185

Appendix 3 191

Appendix 4 195

Bibliography 197
