Part 1. Data Analysis Classification	1
Chapter 1. Walking into the Digital Era: Comparison of the European Union Countries in the Last Decade	3
Fernanda Otilia FIGUEIREDO and Adelaide FIGUEIREDO	
1.1. Introduction	3
1.1.1. The dataset.	4
1.1.2. Preliminary analysis of the data	5
1.2. Double principal component analysis: a brief description	7
1.3. Representation of the trajectories.	8
1.4. Some final conclusions	11
1.5. Acknowledgements	12
1.6. References	12
Chapter 2. Multivariate Kernel Discrimination Applied to Bank Loan Classification	13
Mark Anthony CARUANA and Gabriele LENTINI	
2.1. Introduction	13
2.2. Multivariate kernel density estimation.	14
2.2.1. Kernel density estimator	15
2.2.2. The optimal bandwidth.	16
2.3. Kernel discriminant analysis	17
2.4. Applying kernel discriminant analysis to local data	18
2.4.1. Description of data	18
2.4.2. Variable selection.	20
2.5. Conclusion	25
2.6. References	25

Chapter 3. Introducing an Ontology of Adolescents' Digital Leisure	29
George FILANDRIANOS, Aggeliki KAZANI, Dimitrios PARSANOGLOU, Maria SYMEONAKI and Giorgos STAMOU	
3.1. Introduction	29
3.2. Related work	32
3.3. Ontology	35
3.4. Description of the ontology construction	36
3.5. Data annotation	39
3.6. Conclusions	41
3.7. Acknowledgments	41
3.8. References	41
Chapter 4. Blackjack and the Kelly Bet: A Simulation Assessment of Selected Playing Strategies	43
Jim FREEMAN and Haoyu MIAO	
4.1. Introduction	43
4.2. Blackjack	44
4.2.1. Rules of the game	44
4.3. Kelly bet	46
4.4. Simulation study	47
4.4.1. Modeling assumptions	47
4.5. Empirical results	48
4.6. Conclusions	49
4.7. References	50
Part 2. Estimators	51
Chapter 5. An Evaluation of the Efficiency of a Shape Parameter Estimator for the Log-logistic Distribution	53
Frederico CAEIRO and Ayana MATEUS	
5.1. Introduction	53
5.2. Estimation of the shape parameter	56
5.2.1. Estimators under study	56
5.2.2. Asymptotic properties of the estimators	57
5.3. Simulation study	58
5.4. References	60

Chapter 6. Restricted Minimum Density Power Divergence Estimator for Step-stress ALT with Nondestructive One-shot Devices	63
Narayanaswamy BALAKRISHNAN, María JAENADA and Leandro PARDO	
6.1. Introduction	63
6.2. Minimum density power divergence estimator and restricted minimum density power divergence estimator	65
6.3. Influence function of the restricted minimum density power divergence estimator	68
6.4. Applications of the restricted MDPDE	69
6.4.1. Rao-type test statistics	69
6.4.2. DPD-based statistics	72
6.5. Simulation study	73
6.6. Conclusions	75
6.7. References	75
Part 3. Finance	77
Chapter 7. Properties of American Options Under a Semi-Markov Modulated Black-Scholes Model	79
Kouki TAKADA, Marko DIMITROV, Lu JIN and Ying NI	
7.1. Introduction	79
7.2. American option pricing	81
7.3. Exercising strategies	83
7.3.1. Setting parameters	83
7.3.2. Relationship between the option price and “economic situation, asset price and maturity”	84
7.3.3. Relationship between option price and transition probability matrix	86
7.3.4. Consideration of the optimal exercise region	89
7.3.5. Condition of transition probability matrix for option price transition to be monotonous	91
7.4. Conclusion	93
7.5. References	93
Chapter 8. Numerical Studies of Implied Volatility Expansions Under the Gatheral Model	97
Mohammed ALBUHAYRI, Marko DIMITROV, Ying NI and Anatoliy MALYARENKO	
8.1. Introduction	97
8.2. Previous results	99
8.3. Accuracy of the asymptotic expansions	102
8.4. Numerical analysis.	105
8.5. Conclusion and future work.	106

8.6. Acknowledgments	106
8.7. References	106
Chapter 9. Constructing Trinominal Models Based on Cubature Method on Wiener Space: Applications to Pricing Financial Derivatives.	109
Hossein NOHROUZIAN, Anatoliy MALYARENKO and Ying NI	
9.1. Introduction and outline of this chapter	109
9.2. Cubature formula in Black–Scholes and Black’s models.	110
9.2.1. Black–Scholes model via cubature formula	111
9.2.2. Black’s model via cubature formula.	112
9.3. Constructing a trinomial tree via cubature formula	113
9.3.1. A trinomial tree approximation for the Black–Scholes model	113
9.4. Convergence to geometric Brownian motion	115
9.4.1. Convergence of finite-dimensional distribution	117
9.4.2. Relative compactness	122
9.5. Martingale probability measure	122
9.6. Extension of the results and examples	124
9.6.1. A trinomial tree approximation for Black’s model	126
9.6.2. Pricing American options using the trinomial tree	127
9.7. Discussion	129
9.8. References	129
Chapter 10. A Bayesian Approach to Measuring Risk on Portfolios with Many Assets	131
Samuel BONELLO, David SUDA and Monique BORG INGUANEZ	
10.1. Introduction.	131
10.2. Dynamic principal component analysis	133
10.3. The Bayesian GARCH(1,1) model	135
10.4. Modeling a portfolio with many assets.	137
10.5. Forecasting and risk estimation	140
10.6. Measuring predictive ability.	143
10.7. Conclusion	144
10.8. Acknowledgments	145
10.9. References	145
Chapter 11. Financial Management of Four Hellenic Public Health Units. Analysis and Evaluation through Numerical Indicators	147
Maria SACHINIDOU and George MATALLIOTAKIS	
11.1. Introduction.	148
11.2. Theoretical framework.	148
11.3. Methodology	149

11.4. Research results	149
11.4.1. Liquidity indicators	149
11.4.2. Activity ratios	153
11.4.3. Profitability ratios	157
11.4.4. Capital adequacy and viability ratios	159
11.5. Conclusions	162
11.6. References	163
Part 4. Health Services	165
Chapter 12. Lean Management as an Improvement Factor in Health Services. The Case of Venizeleio General Hospital of Crete, Greece	167
Eleni GENITSARIDI and George MATALLIOTAKIS	
12.1. Introduction	168
12.2. Theoretical framework	168
12.3. Purpose of the research	172
12.4. Methodology	172
12.5. Research results	172
12.6. Conclusions	179
12.7. References	180
Chapter 13. Satisfaction of Employees in Primary and Secondary Healthcare Structures During the Pandemic Period in the Prefecture of Magnesia.	183
Sofia TRIKALLIOTI and George MATALLIOTAKIS	
13.1. Introduction	184
13.2. The Covid-19 pandemic and its effects.	184
13.3. Job satisfaction of healthcare professionals	185
13.4. Healthcare professionals and the burnout syndrome	186
13.5. Research purpose.	188
13.6. Research methodology.	188
13.7. Research conclusions	189
13.8. References	193
Chapter 14. A Parametric Analysis of OpenFlow and P4 Protocols Based on Software Defined Networks	197
Lincoln S. PETER, Hlabishi I. KOBO and Viranjay M. SRIVASTAVA	
14.1. Introduction	198
14.2. Motivation	200
14.3. Challenges to the existing models	202
14.3.1. A comparison with OpenFlow	202

14.3.2. System: P4Consist.	203
14.4. Conclusions and future recommendations	205
14.5. References	205
Chapter 15. A Dynamic Neural Network Model for Accurate Recognition of Masked Faces	209
Oladapo T. IBITOYE and Viranjay M. SRIVASTAVA	
15.1. Introduction	210
15.2. Methodology	213
15.2.1. Data collection and preprocessing	214
15.2.2. Model training and validation	215
15.2.3. System implementation	216
15.2.4. System evaluation	217
15.3. Results and discussion	217
15.3.1. Training accuracy	217
15.3.2. Validation accuracy	218
15.3.3. Training loss	219
15.3.4. Validation loss	219
15.3.5. Overall accuracy	220
15.4. Conclusions and future recommendations	220
15.5. References	221
Chapter 16. An Action-based Monitoring Tool for Processes Subject to Multiple Quality Shifts	225
Konstantina TSIOTA and Konstantinos A. TASIAS	
16.1. Introduction	225
16.2. Problem definition and assumptions	227
16.3. Conventional versus proposed SPC approach	230
16.3.1. Conventional SPC approach	230
16.3.2. Proposed SPC approach.	231
16.4. Markov chain models	232
16.4.1. Transition probability matrix	232
16.4.2. Transition probabilities	234
16.4.3. Expected cost per time unit	236
16.5. Optimization problem	238
16.6. Numerical analysis	239
16.6.1. Numerical examples.	239
16.6.2. Performance comparisons	239
16.7. Conclusions	242
16.8. References	242

Chapter 17. Phi Divergence and Consistent Estimation for Stochastic Block Model	243
Cyprien FERRARIS	
17.1. Introduction	243
17.2. Statement of the problem	244
17.3. Results.	247
17.4. Simulations	248
17.5. Study of real dataset: email-Enron	250
17.6. Summary and discussion.	251
17.7. Acknowledgment	252
17.8. Appendix	252
17.9. References	257
List of Authors	259
Index.	263
