<b>Preface</b> . . . . .	vii
<b>Introduction</b> . . . . .	ix
<b>Chapter 1. The Biological Characteristics of Organisms Involved in Blue Biotechnologies</b> . . . . .	1
1.1. Fish . . . . .	1
1.1.1. Tilapia . . . . .	1
1.1.2. Trout . . . . .	3
1.1.3. Atlantic salmon . . . . .	5
1.1.4. Carp . . . . .	6
1.2. Algae . . . . .	8
1.2.1. Microalgae . . . . .	8
1.2.2. Macroalgae . . . . .	10
1.3. Other aquatic plants . . . . .	12
<b>Chapter 2. Production Methods</b> . . . . .	13
2.1. Fish farming . . . . .	13
2.1.1. Traditional fish farming . . . . .	13
2.1.2. Fish farming with transgenic fish or the concept of the blue revolution . . . . .	23
2.2. Algoculture . . . . .	56
2.2.1. Traditional seaweed farming . . . . .	56
2.2.2. Transgenic algae production . . . . .	72

<b>Chapter 3. Biotechnological Processing Methods</b> . . . . .	83
3.1. Enzymatic engineering (enzymatic hydrolysis). . . . .	83
3.1.1. Enzymatic engineering applied to fish matrices . . . . .	83
3.1.2. Enzymatic engineering applied to algal matrices . . . . .	94
3.2. Fermentation . . . . .	117
3.2.1. Fermentation applied to fish matrices . . . . .	117
3.2.2. Fermentation applied to algal matrices . . . . .	124
<b>Chapter 4. Products and Markets</b> . . . . .	133
4.1. Some examples of marketed and traditional products . . . . .	133
4.2. Main markets. . . . .	140
<b>Chapter 5. Regulations</b> . . . . .	147
5.1. Transgenic products. . . . .	147
5.2. Other products . . . . .	149
<b>Conclusion</b> . . . . .	161
<b>References</b> . . . . .	163
<b>Index</b> . . . . .	173
