Preface	ix
Chapter 1. Introduction: Why Do We Talk About Complexity in Management?	1
1.1. Examples of complex and/or innovative projects	2
1.2. Complex systems, rationality and knowledge	5
1.2.1. Outlines of complexity and complex systems	5
1.2.2. Information and learning	7
1.2.3. Rationality	10
1.3. Cognition and the theory of the firm.	15
1.3.1. Creativity and the evolutionary theory of the firm	17
1.3.2. Creativity and knowledge	18
1.3.3. Creativity and novelty within a system.	20
1.4. The entrepreneurial dimension	22
1.4.1. The philosophy of effectuation	24
1.4.2. Evolutionary models	25
1.5. Conclusions	26
Chapter 2. The Evolution of Complex Systems	29
2.1. Adaptation, learning and flexibility	30
2.2. The nonlinear behavior of “imbalanced” systems	32
2.3. Autonomy and responsibility	35
2.3.1. A sociological approach to the question of “irresponsible” complex systems	35
2.3.2. The role of the leader	36
2.4. Different evolutionary models	39

2.4.1. The large models inspired by the natural sciences.	39
2.4.2. Human evolution	41
2.4.3. The evolution of economic organizations.	42
2.4.4. Proactive evolution: from adaptation to exaptation	44
2.5. Implications for management	46
2.5.1. Thinking in a nonlinear way	46
2.5.2. Anticipating breakthroughs	48
2.5.3. Managing learning and encouraging agents	50
2.6. Closing remarks	52
Chapter 3. Steering Complex Adaptive Systems: Managing Weak Signals	55
3.1. Navigating the ocean of signals	57
3.1.1. Understanding the nature of the ocean	57
3.1.2. Observing the ocean	58
3.1.3. Taking a course	64
3.1.4. Navigating in symbiosis	67
3.2. Managing interdependences and dancing with the system	69
3.2.1. The transmission of signals as a creative process: the example of composite materials	71
3.2.2. The nonlinear changes at the source of evolution	74
3.3. Surfing on the wave	82
3.3.1. Preparing the actors means first listening to them.	82
3.3.2. Choosing the right methods to design a strategy.	83
3.3.3. Choosing a good steerer	85
3.4. Conclusion	97
Chapter 4. Entrepreneurship, Market Creation and Imagination	99
4.1. Some current stakes of entrepreneurship.	102
4.2. The entrepreneur in the history of economic thought	105
4.2.1. The entrepreneur, harbinger of decentralized creativity	106
4.2.2. The entrepreneur according to Jean-Baptiste Say: the assembler of factors	109
4.2.3. The Austrian approach: a form of serendipity within the economic process	110
4.2.4. The Schumpeterian approach: from serendipity to creativity.	111

4.2.5. The entrepreneur as a decision-maker in uncertain situations.	114
4.2.6. Towards a taxonomy of the entrepreneurial function	116
4.3. Motivations, responsibility and identity of the entrepreneur	117
4.3.1. The entrepreneur's responsibility	118
4.3.2. The entrepreneur's identity.	119
4.3.3. Conclusion on the entrepreneur's motivations	122
4.4. Entrepreneurship and complexity: the role of the imagination	123
Chapter 5. Managerial Approaches and Theories of the Firm	127
5.1. Complexity and management: the first steps.	130
5.2. Manager's role versus complex systems	132
5.3. Marketing and complex systems	134
5.3.1. Hypotheses and theories of complex systems	136
5.3.2. Four types of complex systems	137
5.3.3. Honda and the global automobile market	140
5.3.4. Implications for the marketing manager	145
5.4. Complex systems and human resource management	146
5.4.1. RBV and complex systems.	147
5.4.2. Strategic human resource management.	149
5.5. Conclusion: managers' creative responses	151
Conclusion	155
