Foreword	ix
Yvette DEWOLF	
Introduction: Water in Deserts	xiii
Fernand JOLY	
Chapter 1. Water Falling onto Soil and the Effects It Produces	1
Fernand JOLY	
1.1 The arrival of water	1
1.2 Weathering	3
1.2.1 Thermoclasty	3
1.2.2 Hydroclasty	5
1.2.3 Cryoclasty	6
1.2.4 Haloclasty	7
1.2.5 Biodegradation	8
1.2.6 Chemical changes	9
1.2.7 Desert varnish	11
1.2.8 Conclusion on weathering in the arid zone	13
1.3 Runoff	15
1.3.1 Diffuse runoff	16
1.3.2 Concentrated runoff	18
1.4 Geodynamic and geomorphological effects of runoff in arid zones	24
1.5 Groundwater	26
1.5.1 The penetration and circulation of water at a depth	26
1.5.2 Groundwater reserves	28
1.5.3 Large hydrogeological basins	30
1.6 References	33

Chapter 2. Temporary Water Bodies and Lakes	39
Fernand JOLY	
2.1 Water bodies	39
2.1.1 Elementary water bodies	40
2.1.2 Playas	42
2.2 Lakes	43
2.2.1 Inland seas	44
2.2.2 Endorrheic lakes	49
2.3 The principal features of lakes in an arid zone	75
2.4 References	82
Chapter 3. Hydrographic Networks	87
Fernand JOLY	
3.1 Endorrheism–arheism	87
3.1.1 Endorrheism–arheism in tropical deserts	88
3.1.2 Endorrheism–arheism in temperate deserts	90
3.1.3 Endorrheism–arheism in mountain deserts	93
3.2 The disruption of hydrographic networks	94
3.3 Allogenuous rivers and streams	97
3.3.1 Intrazonal allogeny	98
3.3.2 Interzonal allogeny	108
3.4 References	118
Chapter 4. Salts in Deserts	121
Guilhem BOURRIÉ	
4.1 The nature of the salts	123
4.2 The origin of salts and evaporite sequences	125
4.2.1 Evaporites	125
4.2.2 Evaporite sequences	125
4.3 Evaporation of seawater	128
4.4 Evaporation of continental freshwater	129
4.4.1 The neutral saline path	129
4.4.2 The alkaline path	129
4.4.3 The acidic path	130
4.5 Systems mixing surface water and deep water	131
4.5.1 The Saharan system	131
4.5.2 Potash deposits	131

4.6 Atmospheric origin of nitrate deposits	132
4.7 Mankind and salts	133
4.8 References	135
List of Authors	139
Index	141
