Preface	xi
Chapter 1. NG-RAN Network – Functional Architecture	1
1.1. Functional architecture NSA/SA	1
1.1.1. Option 3	4
1.1.2. Option 4	5
1.1.3. Option 7	6
1.2. Description of the NG-RAN network	7
1.2.1. The NG-RAN	8
1.2.2. AMF (Access management and Mobility Function)	10
1.2.3. SMF (Session Management Function)	11
1.2.4. UPF (User Plane Function)	12
1.3. Functional separation between the NG-RAN radio interface and the 5G core network	13
1.3.1. Mobile identities	13
1.3.2. Mobile mobility	17
1.4. Scheduling and QoS	19
1.4.1. Scheduling	19
1.4.2. Support for quality of service on radio link	21
1.5. Security architecture	24
1.6. Network slicing	26
1.7. References	28
Chapter 2. NG-RAN Network – Protocol Architecture	31
2.1. The protocol architecture of the radio interface	31
2.1.1. Protocol stack on the Uu interface	32
2.1.2. The protocol architecture on the Xn interface	35
2.1.3. Protocol architecture on the F1 interface	37
2.1.4. Protocol stack on the NG interface	42

2.2. Procedures on the radio network access	45
2.2.1. XnAP procedures	45
2.2.2. F1 interface procedures	48
2.2.3. NG-AP procedures	50
2.3. Identities of the XnAP and NG-AP application protocols	56
2.4. References	56
Chapter 3. NG-RAN Network – Procedures	59
3.1. General procedure of the 5G-NSA mode	59
3.1.1. LTE search procedure	60
3.1.2. Random access procedure	62
3.1.3. Data transfer	65
3.1.4. Removing a secondary node	70
3.2. General procedures of the 5G-SA	71
3.2.1. Initial random access and beam management procedure	71
3.2.2. Establishment of radio connection	74
3.2.3. Register request	75
3.2.4. The procedure for establishing a PDU session	84
3.3. References	87
Chapter 4. 5G-NR Radio Interface – The Physical Layer	89
4.1. 5G-NR radio interface	89
4.1.1. OFDM waveform	89
4.1.2. Frequency bands and multiplexing methods	90
4.1.3. NR frame structure	93
4.1.4. NR frame structure in the time domain	94
4.2. TDD mode configurations	96
4.2.1. Static configuration per cell	96
4.2.2. Specific TDD configuration	98
4.2.3. The dynamic configuration of the transmission for a group of mobiles	98
4.3. Physical resource	98
4.3.1. Resource grid	98
4.3.2. Resource bloc and bandwidth part	100
4.4. Physical channels and physical signals	101
4.4.1. Physical signals and reference signals	101
4.4.2. Physical channels	102
4.5. Downlink transmission	103
4.5.1. Synchronization signal	103
4.5.2. Reference signals	108
4.5.3. Physical control and data channels	120

4.6. Transmission in uplink	127
4.6.1. Physical reference signals	128
4.6.2. The physical channel	134
4.7. References	139
Chapter 5. 5G-NR Radio Interface – Operations on the Frequency Bands.	141
5.1. Operations on the frequency bands	141
5.2. Carrier aggregation	143
5.2.1. Carrier aggregation in the FR1 band	145
5.2.2. Carrier aggregation in the FR2 band	150
5.3. Supplementary UpLink (SUL)	154
5.4. Synchronization on the secondary cell	155
5.4.1. Carrier aggregation procedure	155
5.4.2. SUL procedure	158
5.5. References	159
Chapter 6. 5G-NR Radio Interface – MIMO and Beamforming.	161
6.1. Multiplexing techniques	161
6.1.1. MIMO mechanism	161
6.1.2. Baseband beamforming	163
6.1.3. Active antennas and massive-MIMO	163
6.1.4. Antenna systems	168
6.2. Antenna port	170
6.2.1. Downlink transmission	171
6.2.2. Uplink transmission	174
6.3. Uplink Control Information (UCI)	175
6.4. PDSCH transmission	176
6.4.1. Single-CSI and multiple-CSI transmission	176
6.4.2. Codebook configuration	179
6.5. PUSCH transmission	182
6.6. Beamforming management	183
6.6.1. Burst SSB: beam sweeping	183
6.6.2. Cell selection and cell re-selection procedures	185
6.6.3. Beam management	187
6.7. References	189
Chapter 7. 5G-NR Radio Interface – Bandwidth Part.	191
7.1. Bandwidth part	191
7.2. CORESET	193
7.2.1. Configuration of CORESET#0	194
7.2.2. CORESET configuration	199

7.3. BWP switching procedure	200
7.4. References	202
Chapter 8. 5G-NR Radio Interface – Data Link Layer	203
8.1. SDAP protocol	204
8.1.1. Operations	206
8.1.2. The protocol structure	208
8.2. PDCP	209
8.2.1. Procedures	210
8.2.2. Operations	214
8.2.3. Protocol structure	217
8.3. RLC protocol	218
8.3.1. Operations	219
8.3.2. Protocol structure	222
8.4. MAC protocol	226
8.4.1. Operations	226
8.4.2. Protocol structure	229
8.4.3. Control element	232
8.5. References	235
Chapter 9. 5G-NR Radio Interface – Radio Access Procedure	237
9.1. System information	237
9.1.1. MIB message	238
9.1.2. SIB1 message	240
9.1.3. SIB2 message	243
9.1.4. SIB3 message	244
9.1.5. SIB4 message	244
9.1.6. SIB5 message	244
9.1.7. SIB6 message	245
9.1.8. SIB7 message	245
9.1.9. SIB8 message	246
9.1.10. SIB9 message	246
9.1.11. Summary	246
9.2. Connection management	247
9.2.1. Paging	247
9.2.2. Connection establishment	248
9.2.3. Activation of security	250
9.2.4. Connection reconfiguration	251
9.2.5. Connection re-establishment	253
9.2.6. Connection release	254

9.3. Measurement configuration	255
9.3.1. Measurement objects	256
9.3.2. The measurement events	256
9.3.3. The filtering of the measurement	260
9.4. References	260
Index	263
