Foreword	ix
Samuel RUFAT	
Introduction	xiii
Richard LAGANIER	
Chapter 1. Territorial Crisis, Elements of Definition	1
Richard LAGANIER and Yvette VEYRET	
1.1. Crisis and catastrophe	6
1.2. Disasters of natural origin: a circumscribed crisis territory	10
1.3. Localized crises of natural origin aggravated or provoked by human activities.	16
1.4. Industrial, technological and nuclear disasters and crises: localized crises and spatial consequences.	17
1.5. More diffuse environmental, food and health crises on a regional or continental scale	21
1.6. “Reticular” crises	24
1.7. The “mega-crises” on a global scale, the domino effects.	27
1.8. Conclusion	30
Chapter 2. General Principles of Crisis Management	31
Freddy VINET and Anne-Marie LEVRAUT	
2.1. Nature of the crisis and forms of crisis management	33
2.1.1. The nature of the crisis: cycle, trajectory or “black swan”?	33
2.1.2. The nature of the crisis: scale of the crisis versus scale of its management	34
2.2. Preparing for the crisis: the prevention/preparation link	37

2.2.1. Preparation: the imperative link between prevention and crisis management	37
2.2.2. Monitoring: choosing the right indicators.	39
2.2.3. From monitoring to forecasting	39
2.2.4. Forecasting tools	40
2.3. Information in times of crisis	41
2.3.1. Upstream information in times of crisis: monitoring tools	42
2.3.2. Alert	43
2.3.3. Infodemia, misinformation and controversy	46
2.4. Crisis management: an integrated approach	47
2.4.1. Conditions for a shared vision	47
2.4.2. Integration of populations	49
2.4.3. The importance of logistics	53
2.4.4. Population management: the issue of evacuation	54
2.5. Conclusion	55
Chapter 3. Learning from Crisis Management	57
Freddy VINET, Alain CHEVALLIER, Hoilid LAMSSALAK and Dimitri LAPIERRE	
3.1. Feedback: objectives, contents, actors	60
3.1.1. Objectives of feedback	61
3.1.2. Feedback times: feedback and territories	62
3.1.3. Feedback methods and contents	65
3.1.4. Feedback: a tool for sharing and disseminating learning	66
3.1.5. Conclusions on feedback.	69
3.2. Crisis management exercises and simulation	69
3.2.1. Objectives and prerequisites	69
3.2.2. Organizing a crisis management exercise: methodology	71
3.2.3. Types of exercise	74
3.2.4. Communication and media awareness	75
3.2.5. Stress management	76
3.2.6. A community-wide exercise	77
3.3. Conclusion	79
Chapter 4. Crisis Management Resources	81
Jérémy ROBERT, Pauline GLUSKI, Sébastien HARDY, Pascale METZGER and Alexis SIERRA	
4.1. The reason for a shift from risk to crisis	83
4.1.1. Why be interested in crises?	83
4.1.2. From stakes to resources: conceptual framework	84
4.2. How to identify crisis management resources?	87
4.2.1. Different types of crisis management resources	87
4.2.2. Methodological aspects.	94

4.3. The benefits of a resource-based approach	105
4.3.1. Understanding the vulnerability of the territory	105
4.3.2. An operational interest	106
4.4. Conclusion: thinking about a “risk–crisis–development” continuum	107
Chapter 5. Post-disaster Recovery: Challenges and Resources	109
Annabelle MOATTY	
5.1. The challenge of coordinating a multitude of actors with inadequate regulatory frameworks	111
5.1.1. The actors and temporalities of the reconstruction process	111
5.1.2. Legislative and regulatory frameworks for recovery.	115
5.2. Financial resources for reconstruction and the weight of solidarity in individual recovery	117
5.2.1. Government resources	117
5.2.2. International aid directed mainly to developing countries.	119
5.2.3. The influence of solidarity mechanisms on the recovery of individuals and communities	120
5.3. Land resources and territorial restructuring	122
5.3.1. Relocation of areas deemed too dangerous for population settlement	122
5.3.2. On-site reconstruction, in the continuity of pre-existing structures.	125
5.3.3. Post-disaster as a catalyst for inequality?	126
5.4. Conclusion	128
Chapter 6. Crises and Territories: Legacies, Inertia and Dynamics	131
Nancy MESCHINET DE RICHEMOND and Yvette VEYRET	
6.1. Crises and territories: always complex articulations, in constant renewal	132
6.1.1. Crises and territories: scales, actors and contexts	132
6.1.2. Obstacles linked to conflicts and the interplay of actors in crisis management.	137
6.1.3. Crises and urban territories: rupture, bifurcation, sustainability, resilience?	143
6.2. Inertia of representations	145
6.2.1. Inertia of representations on the role of the population and its vulnerabilities	146
6.2.2. Inertia of the representations of the crisis itself	149
6.2.3. Territorial inertia feeds crises: a territorialization of data unsuited to management?	154
6.3. Crises feed territorial inertia	156
6.3.1. When crises and emergency become everyday life: the example of Haiti	157

6.3.2. Instrumentalization and resilience: the root causes of crises are still present	158
Chapter 7. Founding Crisis of Territorial Renewal.	165
Yvette VEYRET and Richard LAGANIER	
7.1. Managing a risk territory on a global scale	168
7.1.1. The age of risk management	169
7.1.2. SYMADREM	170
7.1.3. The Rhône Plan, a global vision	170
7.1.4. Crisis management	172
7.1.5. Evolution of the legislation, the future of SYMADREM	173
7.2. Reducing risk through protection.	174
7.2.1. Dikes and diking systems, regulation, management	175
7.2.2. The equipment of rivers with polders	177
7.2.3. Soft management of coastal risk areas	179
7.3. Adapting the habitat	182
7.3.1. Responses to natural hazards.	183
7.3.2. Housing and technological risks	186
7.3.3. Adapting buildings to the effects of climate change	188
7.4. Adapting the neighborhood and the city	189
7.4.1. Flood-safe neighborhoods	189
7.4.2. Urban technical networks and resilient critical infrastructures	194
7.4.3. Responses to climate risks – the urban heat island, “green” neighborhoods	195
7.4.4. Eco-neighborhoods, resilient neighborhoods?	196
7.4.5. From the eco-neighborhood to the “smart city”	198
7.5. Strategic retreat	200
7.6. Conclusion	203
