Note to Reader	ix
Jean-Pierre CHAMOIX	
Preface	xi
Jean-Pierre CHAMOIX	
Introduction	xvii
Jean-Pierre CHAMOIX	
Part 1. What's New and Why?	1
Introduction to Part 1.	3
Chapter 1. Digital Omnipresence: Its Causes and Consequences	5
Jean-Pierre CHAMOIX	
From analog to digital	7
Computerization, prior to the digital revolution	8
The Internet, a real breakthrough factor	9
Importance of competition.	11
Highly regulated communication infrastructure and services	14
Changes in European markets.	18
From crisis to American rebound.	20
Telephone and Internet companies.	22
Summary	23
Bibliography.	27
Appendix. The 2000 crisis: lessons and industrial consequences	28

Chapter 2. Mathematical Culture and Massive Data	35
Jean DHOMBRES	
The Turing machine, the inspiration for massive data?	39
What does “calculable” mean?	42
From natural to mathematics	46
An ancient algorithm and its programming: gcd.	48
Styles of mathematization	51
Mathematics, algorithms and measures of complexity	55
Representations of communities and massive data	58
Constraints of mathematization.	62
The notion of the invariant: perspective, vectorial, linear algebra and matrix representation	66
Graphs, their calculations and some algorithms	69
Conclusion	72
Bibliography	74
Chapter 3. From Sample to Big Data: Competing or Complementary Paradigms?	77
Philippe TASSI	
Sampling and big data: useful synergy.	79
Is this an ephemeral or sustainable phenomenon	84
How can data confidentiality be guaranteed?	89
Protecting personal data	95
How to conclude?	101
Bibliography	102
Chapter 4. Researching Forms and Correlations: the Big Data Approach.	105
Gilles SANTINI	
Deconstruction and accumulation of data	107
Massive databases	107
Playing games with the devil?	109
A case study	110
The protection of privacy.	112
Automatic processing	113
Conclusion	113
Bibliography	114

Chapter 5. Bitcoin: an Innovative System	115
G�rard DR�AN	
<i>Bitcoin</i> and <i>bitcoin</i> : some key concepts	117
The Bitcoin system	118
The transactions register	121
Overview	124
Reliability and safety	125
Software changes	127
Fraud and control takeover	128
Evolution of Bitcoin and peer-to-peer payment	129
In summary	131
Bibliography	131
Part 2. Tactics and Strategies	133
Introduction to Part 2	135
Chapter 6. Bitcoin and Other Cyber-currency	137
G�rard DR�AN	
Introduction	139
<i>Bitcoin</i> , the first cyber-currency	139
New tools of exchange	143
The problem of growth	144
Towards a refoundation?	146
Cyberspace and sovereign currencies	151
Competition between payment systems	153
Competition between units of account	156
Conclusion	159
Bibliography	161
Chapter 7. Health and Care: Digital Challenges	163
Isabelle HILALI	
What are we talking about?	165
Major changes for physicians	165
What about the patients?	168
New challenges for medication	168
Hospitals, clinics and nursing homes	171
Will we be able to insure health tomorrow?	172
The challenges of digital healthcare	174
Conclusion	178
Bibliography	180

Chapter 8. Access to Health Data: Debates and Controversies in France	183
Joumana BOUSTANY, Gabriella SALZANO and Christian BOURRET	
Methodology	185
Literature review	186
Information systems in France	188
Restricted and controlled access systems	190
Restricted access systems	193
Open information systems	194
Going towards an opening of health data?	196
Conclusion	197
Bibliography	198
Appendix. Main acronyms used in this chapter	199
Chapter 9. Artificial Intelligence: Utopia or Progress?	203
Jean-Pierre CHAMOIX	
Before computers, there were robots.	205
What does artificial intelligence cover?	207
Ambitions of artificial intelligence.	209
From machines to humanity.	212
Myths associated with artificial intelligence	215
Assessing the intelligence of a machine?	217
Concluding reflections	218
Bibliography	221
Appendices	223
Appendix 1	225
Appendix 2	227
List of Authors	229
Index of Names and Brands	231
Index of Notions	233
