<b>Preface</b> .....	xi
Nicolas SASPITURRY, Jessica UZEL and Alexandre ORTIZ	
<b>Chapter 1. Tectonics and Geodynamics of the Variscan Cycle in the Pyrenees</b> .....	1
Bryan COCHELIN, Charles GUMIAUX, Benjamin LE BAYON, Yoann DENÈLE and Thierry BAUDIN	
1.1. Introduction. ....	1
1.2. State of the knowledge at the start of the RGF Pyrenees project. ....	2
1.2.1. General .....	2
1.2.2. Magmatism and metamorphism .....	4
1.2.3. Deformation and tectonics. ....	7
1.2.4. Location(s) of the Pyrenean segment in the Variscan chain .....	14
1.2.5. Line of scientific questioning guiding recent research in the framework of the RGF Pyrenees project .....	16
1.3. Variscan tectonics .....	19
1.3.1. Main deformation D2 phase: generalities .....	20
1.3.2. Early phase D1 .....	40
1.3.3. Late Permian D3 phase. ....	43
1.4. Geodynamic integration .....	54
1.4.1. Early D1 phase .....	54
1.4.2. Late Variscan D2 phase .....	56
1.4.3. Late Permian D3 phase. ....	57

1.5. Implications of Paleozoic basement structuring on Alpine phases . . . . .	59
1.6. References . . . . .	63

**Chapter 2. Structure and Texture of Pb-Zn Mineralization:  
Example of a Multiscale Study in the Pyrenees to Constrain  
One-forming Processes and Critical Metals Mobility . . . . .** 81

Alexandre CUGERONE, Bénédicte CENKI,  
Émilien OLIOT and Manuel MUÑOZ

2.1. Introduction . . . . .	81
2.2. Geological overview of the Pyrenean Axial Zone . . . . .	85
2.2.1. Structural setting . . . . .	85
2.2.2. Pyrenean Pb-Zn mineralizations . . . . .	87
2.3. Structures of the studied Pb-Zn mineralizations . . . . .	87
2.3.1. Horcall and Crabioules stratabound mineralizations . . . . .	88
2.3.2. Arre and Anglas vein mineralizations . . . . .	92
2.4. A novel interest in base metal mineralizations: the presence of critical metals . . . . .	93
2.5. Discussion and conclusions . . . . .	95
2.6. References . . . . .	96

**Chapter 3. Meso-Cenozoic Kinematics of Western Europe  
Applied to the Pyrenean Domain . . . . .** 103

Paul ANGRAND and Frédéric MOUTHEREAU

3.1. Introduction . . . . .	103
3.1.1. Recalling plate tectonics and the Wilson cycle . . . . .	103
3.1.2. Types of plate boundaries . . . . .	105
3.2. Geological and scientific background . . . . .	105
3.3. State of the art: the Iberian-European plate boundary and issues . . . . .	108
3.3.1. The Pyrenees and Basque-Cantabrian system . . . . .	108
3.3.2. Kinematics at the Iberia-Europe plate boundary . . . . .	110
3.4. Geodynamic evolution of the Western European domain . . . . .	112
3.4.1. Upper Permian-Triassic (270–200 Ma) . . . . .	112
3.4.2. Jurassic (200–145 Ma) . . . . .	114
3.4.3. Early Cretaceous (145–94 Ma) . . . . .	116
3.4.4. Late Cretaceous to Paleogene (84–35 Ma) . . . . .	119
3.4.5. Latest Paleogene to present (35-0 Ma) . . . . .	122

---

3.5. Discussion of the main scientific issues surrounding the kinematics of the Iberian plate . . . . .	124
3.5.1. Deformation distribution at the Iberian-European plate boundary. . . . .	124
3.5.2. Variscan inheritance and Late Variscan position of the Ebro, Sardinia and Corsica blocks. . . . .	126
3.6. Acknowledgments. . . . .	127
3.7. References . . . . .	127
<b>Chapter 4. Sedimentary Breccias Synextension in the North-Eastern Pyrenees. . . . .</b>	<b>149</b>
Tarik KERNIF, Thierry NALPAS, Romain BOUSQUET and Roman CHELALOU	
4.1. Introduction. . . . .	149
4.2. The breccias of the north-eastern Pyrenees . . . . .	151
4.2.1. Geological background. . . . .	151
4.2.2. Description and organization of the breccias . . . . .	153
4.2.3. Interpretation. . . . .	158
4.3. Discussion . . . . .	159
4.3.1. Implications of the interpretation that the Lower Agly breccias had on the evolution of the Pyrenees . . . . .	159
4.3.2. Sedimentary breccias: markers of extension? . . . . .	160
4.4. Conclusion . . . . .	162
4.5. References . . . . .	163
<b>Chapter 5. The North Pyrenean Zone: Hyper-thinned Rift Crust and Exhumed Mantle . . . . .</b>	<b>165</b>
Yves LAGABRIELLE	
5.1. The North Pyrenean Zone: introduction . . . . .	165
5.2. The NPZ: a surprising association of varied lithologies. . . . .	168
5.2.1. Stratigraphy . . . . .	168
5.2.2. Cretaceous magmatism. . . . .	173
5.2.3. Thermometamorphism . . . . .	174
5.2.4. Fluids and metamorphism . . . . .	179
5.2.5. Lherzolites . . . . .	180
5.2.6. The issue of polygenic breccias. . . . .	184
5.2.7. Conclusion of section 5.2 . . . . .	187

5.3. Mechanisms of crustal thinning and mantle denudation in the NPZ – recent field data and modern models . . . . .	188
5.3.1. Years 2008–2010: outcrop of mantle rocks at the axis of the future NPZ – evidence and preliminary models. . . . .	188
5.3.2. Mantle exhumation and thermal evolution in the core of the Pyrenean rift . . . . .	196
5.3.3. Behavior of the cover, crust and mantle during exhumation . . . . .	200
5.3.4. Fluid flow, metamorphism and metasomatism during the formation of Cretaceous Basins in the NPZ . . . . .	210
5.3.5. Exhumation of the mantle: synthesis of geological data and modeling . . . . .	215
5.4. Conclusion . . . . .	221
5.5. Acknowledgments. . . . .	221
5.6. References . . . . .	222
 <b>Chapter 6. The Bay of Biscay Opening in the Frame of the Iberian-European Plate Boundary Formation . . . . .</b>	 241
Julie TUGEND and Isabelle THINON	
6.1. Introduction. . . . .	242
6.2. Structure and age of the Bay of Biscay . . . . .	245
6.2.1. The North Biscay passive margin . . . . .	246
6.2.2. North Iberia margin. . . . .	251
6.2.3. Eastern termination of the Bay of Biscay: the Aquitaine margin and Parentis Basin. . . . .	255
6.3. The Bay of Biscay and the Iberian-European plate boundary . . . . .	258
6.4. Future challenges . . . . .	260
6.5. Acknowledgments. . . . .	262
6.6. References . . . . .	262
 <b>Chapter 7. The Trimouns Talc-Chlorite Deposit . . . . .</b>	 273
Michel DE SAINT BLANQUAT, Philippe DE PARSEVAL, Alexandre BOUTIN, Benoit QUESNEL and Marc POUJOL	
7.1. The central place of Trimouns in the geology of the Pyrenees. . . . .	273
7.2. Pyrenean talc and its exploitation. . . . .	275
7.3. History of the work . . . . .	279
7.4. Geological context. . . . .	281
7.5. Lithology, structure and microstructures. . . . .	284
7.5.1. The wall . . . . .	285
7.5.2. The deposit. . . . .	286

7.5.3. The deposit-roof contact . . . . .	292
7.5.4. The roof . . . . .	292
7.5.5. Quaternary formations . . . . .	295
7.6. Ore, mineralogy and fluids . . . . .	295
7.6.1. Ore . . . . .	295
7.6.2. Mineralogy . . . . .	299
7.6.3. Origin of the fluids and formation conditions of the deposit . . . . .	300
7.7. Geochronological data . . . . .	302
7.8. Synthesis and formation model . . . . .	305
7.9. Conclusions and perspectives . . . . .	306
7.10. Acknowledgments . . . . .	309
7.11. References . . . . .	310
<b>List of Authors . . . . .</b>	<b>317</b>
<b>Index . . . . .</b>	<b>321</b>
