

Table of Contents

Preface	vii
Chapter 1. Introduction	1
Chapter 2. Semiconductor Industry Overview	7
2.1. The cyclical semiconductor market	7
2.2. The leading IC companies	12
2.3. The world IC market distribution	17
2.4. Semiconductor sales by IC devices	19
2.5. The semiconductor memory market.	22
2.6. The impressive price decline of IC circuits	26
2.7. Moore’s Law, the ITRS and their economic impacts	33
2.8. Exponential growth of manufacturing and R&D costs	46
2.9. The structural evolution of the semiconductor industry	56
2.10. Consolidation of the semiconductor memory sector.	64
2.11. Conclusions	70
2.12. References	73
Chapter 3. Research on Advanced Charge Storage Memories	77
3.1. Key features of Flash technology	78
3.2. Flash technology scaling.	87
3.3. Innovative paths in silicon NVM technologies	96
3.4. Research on advanced charge storage memories.	97
3.4.1. Silicon nanocrystal memories	97
3.4.2. Silicon nanocrystal memories with high-k IPDs	112
3.4.3. Hybrid silicon nanocrystal/SiN memories with high-k IPDs	117

3.4.4. Silicon nanocrystal double layer memories with high-k IPDs	119
3.4.5. Metal nano-dots coupled with organic templates	121
3.4.6. High-k IPD-based memories	127
3.4.7. High-k/metal gate stacks for “TANOS” memories	136
3.4.8. FinFlash devices	139
3.4.9. Molecular charge-based memories	151
3.4.10. Effects of the few electron phenomena	159
3.5. Conclusions	163
3.6. References	164
Chapter 4. Future Paths of Innovation	171
4.1. 3D integration of charge-storage memories	172
4.2. Alternative technologies	185
4.2.1. Ferro RAMs	187
4.2.2. Magnetic RAMs	187
4.2.3. Phase-change RAMs	188
4.2.4. Conductive bridging RAMs	199
4.2.5. Oxide resistive RAMs	202
4.2.6. New crossbar architectures	206
4.3. Conclusion	215
4.4. References	216
Chapter 5. Conclusions	223
5.1. References	232
Index	233
