<b>Preface</b> . . . . .	vii
<b>Chapter 1. Human RF Exposure and Communication Systems</b> . . . . .	1
1.1. Introduction. . . . .	1
1.2. Metric and limits relative to human exposure. . . . .	3
1.2.1. Human RF exposure and specific absorption rate . . . . .	3
1.2.2. Protection limits. . . . .	4
1.2.3. Exposure assessment for compliance tests . . . . .	10
1.2.4. Real exposure assessment. . . . .	22
1.3. European standards and regulation framework . . . . .	36
1.4. Conclusion . . . . .	39
<b>Chapter 2. Computational Electromagnetics Applied to Human Exposure Assessment</b> . . . . .	41
2.1. Introduction. . . . .	41
2.2. Finite difference in time domain to solve the Maxwell equations . . . . .	42
2.2.1. Introduction . . . . .	42
2.2.2. Stability, dispersion and accuracy . . . . .	47
2.2.3. Boundary conditions . . . . .	49
2.2.4. FDTD approach to thin wires and layers . . . . .	52
2.2.5. Power and impedance in FDTD . . . . .	58
2.2.6. FDTD and the Huygens box . . . . .	63
2.2.7. Near to far transformation and power radiated assessment . . . . .	69
2.3. FDTD and human exposure assessment . . . . .	71
2.3.1. SAR estimation using FDTD . . . . .	71

---

2.3.2. Anatomical numerical human models . . . . .	73
2.3.3. Heterogeneous and dispersive biological tissues . . . . .	84
2.3.4. FDTD sub-gridding and hybridization . . . . .	88
2.4. RF exposure assessment . . . . .	103
2.4.1. RF exposure to far source . . . . .	103
2.4.2. Exposure induced by a source in the near field . . . . .	106
2.4.3. Exposure induced by a source with tissues in the reactive field. . . . .	109
2.5. Conclusion . . . . .	117
<b>Chapter 3. Stochastic Dosimetry . . . . .</b>	<b>119</b>
3.1. Motivations . . . . .	119
3.2. The challenge of variability for numerical dosimetry . . . . .	120
3.3. Stochastic dosimetry and polynomial chaos expansion . . . . .	122
3.3.1. Surrogate models and numerical dosimetry . . . . .	122
3.3.2. Example of basic surrogate modeling in dosimetry . . . . .	124
3.4. PC and numerical dosimetry . . . . .	125
3.5. Calculation of the PC coefficients . . . . .	131
3.5.1. Coefficient assessment using spectral projection . . . . .	131
3.5.2. Coefficient assessment using regression . . . . .	134
3.6. Design of experiments . . . . .	135
3.7. Predictive model validation . . . . .	140
3.8. Surrogate modeling for dosimetry . . . . .	142
3.8.1. Surrogate modeling with full PCE basis . . . . .	142
3.8.2. Surrogate modeling with sparse PCE basis. . . . .	144
3.8.3. Stochastic dosimetry and SAR uncertainty linked to the phone position . . . . .	147
3.9. SA and signature of the PC . . . . .	150
3.9.1. SA and Sobol indices . . . . .	150
3.9.2. Sensitivity of SAR linked to the phone position. . . . .	152
3.9.3. PC signature . . . . .	153
3.10. Parsimonious quintile estimation . . . . .	155
3.11. Conclusion . . . . .	155
<b>Conclusion . . . . .</b>	<b>157</b>
<b>Bibliography . . . . .</b>	<b>159</b>
<b>Index . . . . .</b>	<b>179</b>
