Preface	ix
Introduction	xiii
Smain FEMMAM	
Chapter 1. A Survey of Switched Ethernet Solutions for Real-time Audio/Video Communications	1
Xiaoting LI and Laurent GEORGE	
1.1. Introduction.	1
1.1.1. Automotive industry	2
1.1.2. Aviation industry	3
1.1.3. Industrial automation.	5
1.2. Ethernet AVB solution	7
1.2.1. Physical and MAC layers	7
1.2.2. Ethernet AVB standard family	8
1.2.3. Evolution: Ethernet TSN	11
1.3. AVB deterministic RT communications.	12
1.3.1. Class A/B RT constraints	13
1.3.2. CBSA (credit-based shaping algorithm)	13
1.3.3. End-to-end communication delays.	16
1.4. A representative automotive configuration	25
1.5. Conclusion	28
1.6. Bibliography	28

Chapter 2. Representation of Networks of Wireless Sensors with a Grayscale Image: Application to Routing	31
Marc GILG	
2.1. Introduction.	31
2.2. The image analogy	33
2.2.1. Gray level images.	33
2.2.2. Construction of a gray level image for a network	34
2.2.3. Virtual neighbors	35
2.3. Image processing algorithm	36
2.3.1. Convolution filters	36
2.3.2. Mean filter	37
2.3.3. Gradient filter	37
2.3.4. Gaussian filter	38
2.3.5. Sobel filter	40
2.3.6. Deformable models for border detection	41
2.3.7. Potential energy	42
2.3.8. Minimal energy curve	43
2.3.9. Discretion	43
2.4. Routing algorithms	43
2.4.1. Routing algorithm based on the Sobel filter	43
2.4.2. Routing protocol with the mean filter	47
2.4.3. Routing protocol using deformations	51
2.5. Conclusion	61
2.6. Bibliography	63
Chapter 3. Routing and Data Diffusion in Vehicular Ad Hoc Networks	67
Frédéric DROUHIN and Sébastien BINDEL	
3.1. Introduction.	67
3.2. Background and challenges	68
3.2.1. Communication standard	69
3.2.2. Signal disturbance	70
3.3. Routing	76
3.3.1. Neighbor selection	77
3.3.2. Routing protocols.	82

3.4. VANET security	87
3.4.1. Security requirements in VANET	88
3.4.2. VANET security threats	88
3.4.3. VANET security mechanisms: IEEE 1609.2-2016 standard	92
3.5. Conclusion	93
3.6. Bibliography	94
Chapter 4. New “Graphiton” Model: A Computational Discrete Space, Self-Encoded as Trivalent Spin Networks	97
Smain FEMMAM and Raymond ASCHHEIM	
4.1. Introduction.	97
4.2. Graphitation, bottom-up approach	98
4.2.1. Construction	99
4.2.2. Global topology of space	102
4.2.3. Lattice regularity	102
4.2.4. Intrinsic space	103
4.2.5. Space as a network	104
4.3. Mathematical formalism	104
4.3.1. Definitions	104
4.4. Perturbation tolerance.	110
4.5. Conclusion	111
4.6. Bibliography	112
Chapter 5. Beacon Cluster-Tree Construction for ZigBee/IEEE802.15.4 Networks	115
Smain FEMMAM, Mohamed Ikbal BENAKILA and Laurent GEORGE	
5.1. Introduction.	115
5.2. IEEE 802.15.4 overview	118
5.2.1. IEEE 802.15.4 physical layer	118
5.2.2. IEEE 802.15.4 MAC sub-layer overview.	119
5.2.3. Non-beacon-enabled network.	122
5.2.4. Beacon-enabled network	123
5.3. Beacon frame collision problem in a Cluster-Tree topology.	124
5.3.1. Direct beacon frame collision.	124
5.3.2. Indirect beacon frame collision.	126

5.4. Proposed new approach	127
5.5. Narrowband multipath fading model	130
5.6. Model multipath simulation	134
5.7. Test bed bench	137
5.8. Conclusion	141
5.9. Bibliography	142
Chapter 6. One-by-One Embedding of the Twisted Hypercube into Pancake Graph	145
Smain FEMMAM and Faouzi M. ZERARKA	
6.1. Introduction.	145
6.2. Preliminaries theory analysis	146
6.2.1. Definition 6.1 construction	146
6.2.2. Definition 6.2 construction	147
6.2.3. Definition 6.3 construction	150
6.2.4. Notations	151
6.3. Embedding n-dimensional twisted hypercube graph into n-dimensional twisted pancake graph	152
6.3.1. Embed_node(node) algorithm	152
6.3.2. Embed_edge(nodedep, nodearr) algorithm	157
6.3.3. Embed1_edge(nodedep, nodearr) algorithm	157
6.3.4. Embed2_edge(nodedep, nodearr) algorithm	159
6.3.5. Embed3_edge(nodedep, nodearr) algorithm	160
6.4. Dilations of many-to-one n-dimensional twisted hypercube embedded into n-dimensional pancake.	162
6.4.1. Lemma 6.1	162
6.4.2. Lemma 6.2	164
6.5. Conclusion	166
6.6. Bibliography	167
List of Authors	171
Index	173
