

## Table of Contents

<b>List of Acronyms</b> . . . . .	xi
<b>Preface</b> . . . . .	xv
Otto Carlos M.B. DUARTE and Guy PUJOLLE	
<b>Chapter 1. Virtualization</b> . . . . .	1
Luís Henrique M.K. COSTA	
1.1. Virtualization techniques . . . . .	4
1.1.1. Full virtualization . . . . .	5
1.1.2. Paravirtualization . . . . .	6
1.2. Virtualization tools . . . . .	7
1.2.1. Xen . . . . .	7
1.2.2. VMware . . . . .	9
1.2.3. OpenVZ . . . . .	13
1.3. Scenario and methodology . . . . .	15
1.3.1. Hardware/software description . . . . .	18
1.4. Performance evaluation . . . . .	19
1.4.1. CPU Performance . . . . .	19
1.4.2. Memory performance . . . . .	19
1.4.3. Hard disk and file system performance . . . . .	19
1.4.4. Network performance . . . . .	20
1.4.5. Overall performance – linux kernel compilation . . . . .	20
1.4.6. Single virtual machine tests . . . . .	21
1.4.7. Multiple virtual machine tests . . . . .	29
1.5. Summary . . . . .	37
1.6. Bibliography . . . . .	38

<b>Chapter 2. Virtual Network Interfaces</b> . . . . .	39
Miguel Elias M. CAMPISTA	
2.1. Virtual networks: isolation, performance and trends . . . . .	41
2.1.1. Network virtualization approaches . . . . .	41
2.1.2. Network virtualization technologies . . . . .	44
2.1.3. Characteristics of Xen and OpenFlow network virtualization technologies . . . . .	49
2.1.4. Performance evaluation . . . . .	59
2.2. Xen prototype . . . . .	68
2.2.1. Virtual machine server (VMS) . . . . .	68
2.2.2. Virtual machine server client . . . . .	70
2.2.3. Graphical user interface . . . . .	73
2.3. OpenFlow prototype . . . . .	75
2.3.1. Applications . . . . .	75
2.3.2. OpenFlow Web server . . . . .	76
2.3.3. Graphical user interface . . . . .	78
2.4. Summary . . . . .	80
2.5. Bibliography . . . . .	80
 <b>Chapter 3. Performance Improvement and Control of Virtual Network Elements</b> . . . . .	 83
Igor M. MORAES	
3.1. Xen-based prototype . . . . .	85
3.1.1. Xen migration . . . . .	87
3.1.2. Xen statistics . . . . .	92
3.1.3. Xen topology . . . . .	92
3.1.4. Virtualization hardware improvements . . . . .	94
3.2. OpenFlow-based prototype . . . . .	96
3.2.1. FlowVisor . . . . .	98
3.2.2. OpenFlow migration . . . . .	99
3.2.3. OpenFlow statistics . . . . .	100
3.2.4. OpenFlow discovery . . . . .	101
3.2.5. OpenFlow spanning tree . . . . .	104
3.3. Summary . . . . .	106
3.4. Bibliography . . . . .	107

<b>Chapter 4. State of the Art in Context-Aware Technologies</b> . . . . .	109
Edmundo R.M. MADEIRA and Guy PUJOLLE	
4.1. Autonomic systems . . . . .	110
4.1.1. Characteristics of autonomic systems . . . . .	110
4.1.2. Architecture and operation of autonomic systems . . . . .	111
4.2. Piloting with multi-agent systems . . . . .	113
4.2.1. Definition of agents . . . . .	114
4.2.2. Characteristics of agents . . . . .	114
4.2.3. Cognitive agents . . . . .	115
4.2.4. Reactive agents . . . . .	115
4.2.5. Multi-agent systems . . . . .	116
4.3. Options to build the autonomic platform . . . . .	117
4.3.1. Ginkgo . . . . .	118
4.3.2. DimaX . . . . .	121
4.3.3. JADE . . . . .	123
4.4. Context-aware technology for network control . . . . .	127
4.4.1. Context-aware system architecture . . . . .	129
4.4.2. Sensing subsystem . . . . .	131
4.4.3. Thinking subsystem . . . . .	134
4.4.4. Acting subsystem . . . . .	136
4.5. Summary . . . . .	139
4.6. Acknowledgments . . . . .	141
4.7. Bibliography . . . . .	141
<b>Chapter 5. Providing Isolation and Quality-of-Service to Virtual Networks</b> . . . . .	145
Miguel Elias M. CAMPISTA	
5.1. Background on control and management of virtual networks . . .	146
5.2. Challenges in packet forwarding using Xen . . . . .	149
5.3. Controlling Domain 0 shared resources . . . . .	151
5.3.1. Maximum usage controller . . . . .	152
5.4. Summary . . . . .	159
5.5. Bibliography . . . . .	159
<b>Chapter 6. Piloting System</b> . . . . .	163
Edmundo R.M. MADEIRA and Nelson LUIS S. DA FONSECA	
6.1. Autonomic Piloting Systems . . . . .	164
6.1.1. Architecture . . . . .	165

6.1.2. Piloting plane of the horizon project . . . . .	167
6.1.3. Related work . . . . .	169
6.1.4. Interaction of piloting, management and virtualization planes . . . . .	170
6.1.5. Responsibilities of the piloting plane in the horizon architecture . . . . .	170
6.2. Piloting plane functions and requirements . . . . .	171
6.3. Preliminary piloting plane design . . . . .	172
6.3.1. Dynamic planner . . . . .	175
6.3.2. Behaviors . . . . .	177
6.3.3. Intra- and inter-system views . . . . .	185
6.3.4. Interfaces of the APS . . . . .	186
6.4. The piloting agents . . . . .	189
6.5. Testbed . . . . .	192
6.5.1. Tools . . . . .	193
6.5.2. Experiments in the testbed . . . . .	196
6.6. The multi-agent APS . . . . .	197
6.7. Results . . . . .	200
6.8. Multi-agent system for self-management of virtual networks . . . . .	202
6.8.1. Implementation of the prototype . . . . .	203
6.8.2. Experimental results . . . . .	205
6.9. Summary . . . . .	210
6.10. Bibliography . . . . .	212
<b>Chapter 7. Management and Control: The Situated View . . . . .</b>	<b>217</b>
Otto Carlos M.B. DUARTE	
7.1. The dynamic SLA controller . . . . .	218
7.1.1. Background on QoS for virtual networks . . . . .	219
7.1.2. The proposed fuzzy control system . . . . .	221
7.1.3. Results . . . . .	228
7.2. Update prediction mechanism for local information . . . . .	231
7.2.1. Background on anomaly-detection systems . . . . .	232
7.2.2. ADAGA system . . . . .	234
7.2.3. The anomaly system evaluation . . . . .	240
7.3. Summary . . . . .	246
7.4. Bibliography . . . . .	247

<b>Chapter 8. System Architecture Design</b> . . . . .	251
Otto Carlos M.B. DUARTE	
8.1. Overall architecture design . . . . .	253
8.1.1. The Xen architecture . . . . .	253
8.1.2. OpenFlow management architecture . . . . .	271
8.2. A hybrid Xen and OpenFlow system architecture design . . . . .	275
8.2.1. Pros and cons of Xen and OpenFlow virtualization platforms . . . . .	277
8.2.2. XenFlow architecture design . . . . .	279
8.2.3. Experimental results . . . . .	284
8.3. Summary . . . . .	287
8.4. Bibliography . . . . .	289
<b>List of Authors</b> . . . . .	293
<b>Index</b> . . . . .	295
