

## Table of Contents

<b>Preface</b> . . . . .	ix
<b>Introduction</b> . . . . .	xiii
<b>Chapter 1. Confocal Laser Scanning Microscopy</b> . . . . .	1
Thomas OLIVIER and Baptiste MOINE	
1.1. Introduction . . . . .	1
1.1.1. Context and framework of chapter . . . . .	1
1.1.2. From wide-field microscopy to confocal microscopy . . . . .	3
1.2. Principle and implementation. . . . .	6
1.2.1. General principle . . . . .	7
1.2.2. Axial and lateral resolution in confocal microscopy . . . . .	9
1.2.3. Some notions of fluorescence . . . . .	21
1.2.4. Main elements of a confocal scanning laser microscope . . . . .	25
1.3. Applications in biology, potential and limitations . . . . .	40
1.3.1. Basic elements of biology for the neophyte . . . . .	41
1.3.2. Fluorescent labeling . . . . .	43
1.3.3. Practical implementation of confocal microscopy . . . . .	46
1.4. Related and derived techniques . . . . .	62
1.4.1. Advanced contrast modes: FRAP, FLIP, FLIM, FRET, etc.. . . . .	62
1.4.2. The contribution of nonlinear contrast modes . . . . .	66
1.4.3. Recent major advances: overcoming the diffraction limit . . . . .	72
1.5. Bibliography . . . . .	74

<b>Chapter 2. Flow Cytometry (FCM) Measurement of Cells in Suspension</b> . . . . .	79
Odile SABIDO	
2.1. History of FCM . . . . .	79
2.2. Components of the cytometer: fluidics, optics and signal processing. . . . .	80
2.2.1. Fluidics . . . . .	81
2.2.2. Optics . . . . .	81
2.2.3. Signal processing . . . . .	83
2.3. Experimentation strategy . . . . .	83
2.3.1. Visualizations of the spectra . . . . .	84
2.3.2. Compensation of fluorescences . . . . .	84
2.3.3. Checking the optical bench. . . . .	84
2.3.4. Presentation of parameters A/H/W . . . . .	85
2.3.5. Graphical presentation. . . . .	85
2.4. Types of platform for FCM . . . . .	87
2.4.1. Clinical platform . . . . .	87
2.4.2. Research platform . . . . .	87
2.5. Principle of cell sorting . . . . .	88
2.6. Analyzed parameters . . . . .	90
2.6.1. Light scattering . . . . .	90
2.6.2. Fluorochromes . . . . .	90
2.7. Applications in biology . . . . .	93
2.7.1. Clinical . . . . .	93
2.7.2. Research . . . . .	93
2.7.3. Environment . . . . .	94
2.7.4. Plant biology. . . . .	94
2.7.5. Industrial microbiology . . . . .	94
2.8. Complementarities of the FCM with the other cytometries, confocal and dynamic . . . . .	95
2.9. Cytometry on beads, LUMINEX™ type . . . . .	95
2.10. Scientific societies. . . . .	96
2.11. Websites to visit . . . . .	96
2.12. Bibliography . . . . .	97
2.13. Reference books . . . . .	99
<b>Chapter 3. Optical Coherence Tomography</b> . . . . .	101
Claude BOCCARA and Arnaud DUBOIS	
3.1. Introduction . . . . .	101

3.2. Principles of OCT . . . . .	102
3.3. Frequency-domain OCT . . . . .	104
3.4. Spatial resolution . . . . .	106
3.5. Applications of OCT . . . . .	107
3.5.1. Ophthalmology . . . . .	107
3.5.2. Internal medicine . . . . .	107
3.5.3. Other fields of application . . . . .	108
3.6. Extensions of OCT . . . . .	109
3.7. Full-field OCT . . . . .	110
3.7.1. Principle . . . . .	110
3.7.2. Spatial resolution . . . . .	111
3.7.3. Dynamics and sensitivity . . . . .	113
3.7.4. Operating speed . . . . .	113
3.7.5. Applications . . . . .	114
3.8. Conclusion . . . . .	119
3.9. Bibliography . . . . .	119
<b>Chapter 4. Therapeutic Applications of Lasers.</b> . . . .	125
Geneviève BOURG-HECKLY and Serge MORDON	
4.1. Introduction . . . . .	125
4.2. Interaction of light with biological tissues. . . . .	127
4.2.1. Optical parameters characterizing light radiation . . . . .	127
4.2.2. The three types of interaction between a light beam and a biological tissue . . . . .	131
4.2.3. Penetration of light in biological tissues . . . . .	151
4.3. Therapeutic effects of lasers . . . . .	155
4.3.1. Thermal effect. . . . .	156
4.3.2. Photoablative effect . . . . .	167
4.3.3. Photochemical or photodynamic effect . . . . .	168
4.3.4. The electromechanical effect . . . . .	174
4.4. Conclusion . . . . .	175
4.5. For more information. . . . .	175
4.6. Bibliography . . . . .	176
<b>Chapter 5. Plasmonics</b> . . . . .	179
Emmanuel FORT	
5.1. Propagating surface plasmons . . . . .	180
5.1.1. Theoretical reminders and definitions . . . . .	180
5.1.2. Surface plasmon resonance sensors . . . . .	185

5.1.3. Units and sensitivity of SPR sensors . . . . .	189
5.1.4. Other SPR configurations. . . . .	190
5.1.5. SPR imaging. . . . .	191
5.1.6. Surface plasmons coupled fluorescence. . . . .	194
5.2. Localized surface plasmons . . . . .	201
5.2.1. Theoretical reminders . . . . .	201
5.2.2. Detection of plasmonic nanoprobe . . . . .	203
5.3. Conclusion . . . . .	210
5.4. Bibliography . . . . .	211
<b>List of Authors</b> . . . . .	<b>217</b>
<b>Index</b> . . . . .	<b>219</b>
