Preface xiii

Chapter 1. Some Revisions of the Concept of Information 1
Sylvie LELEU-MERVIEL and Philippe USEILLE

1.1. Introduction 1
1.2. A double-sided concept: Capurro and Hjorland 2
1.2.1. Towards an operational concept 2
1.2.2. An etymological explanation 3
1.2.3. Oppositions and relations, division and complexity 4
1.2.4. Carrying on… between measurable signal and meaningful emergence 5
1.3. The mathematical theory of information (MTI): Segal 6
1.3.1. Mathematics rejoining human sciences? 6
1.3.2. A senseless measure of information 6
1.3.3. A plan for unification that stumbles over semantics 8
1.3.4. The irruption of information in the human sciences 9
1.3.5. Beyond MTI 10
1.4. The diaphoric definition of data: Floridi 11
1.4.1. Information, data, meaning 11
1.4.2. A definition of information based on data 13
1.4.3. Diaphoric definitions of data on three levels 13
1.4.4. Diaphora and saliences 15
1.4.5. Of data as relational entity 16
1.4.6. Beyond DDD 18
1.5. A patterns approach: Bates 19
1.5.1. A definition of information based on patterns 19
1.5.2. Discussion 20

1.5.3. Evaluation in the form of attempts to reconcile the different points of view . . . 23
1.6. The general method of relativized conceptualization: Mugur-Schächter . . . 24
1.6.1. Constructing reality . . . 24
1.6.2. Constituting each outlook on reality . . . 25
1.6.3. Representing reality . . . 26
1.6.4. Data versus information . . . 27
1.6.5. Liction reliances and mechanisms of meaning . . . 28
1.7. Conclusion . . . 29
1.8. Bibliography . . . 30

Chapter 2. From Scientific Communication to Specialized Mediation: Communication of Knowledge and Forms of Hybridizations . . . 33
Viviane COUZINET

2.1. Introduction . . . 33
2.2. Scientific communication and communication between researchers . . . 34
2.2.1. The researcher, sole stakeholder . . . 35
2.2.2. Spaces for research distribution . . . 36
2.2.3. Research writing . . . 39
2.3. Popularization . . . 42
2.3.1. Journalists and researchers . . . 42
2.3.2. Places of distribution of popularized knowledge: France as an example . . . 45
2.3.3. Forms of writing . . . 47
2.4. Specialized communication and forms of hybridization . . . 50
2.4.1. A multitude of writers . . . 50
2.4.2. Are the diffusion spaces juxtaposed? . . . 52
2.4.3. Hybrid mediations . . . 55
2.5. Conclusion . . . 60
2.6. Bibliography . . . 61

Chapter 3. Time, Memory and Document . . . 65
Jean-Paul METZGER

3.1. Introduction . . . 65
3.2. Memory and history . . . 66
3.2.1. Memory and reminiscence . . . 66
3.2.2. Historical time . . . 70
3.2.3. Comprehension and representation . . . 71
3.3. Document and history . . . 74
3.3.1. Testimony . . . 74

3.3.2. The archive 75
3.3.3. Documentary proof 78
3.4. Time and document 79
3.4.1. Discursive documentation and formation 80
3.4.2. The time of discourse 83
3.4.3. Documentary time 86
3.5. Conclusion 88
3.6. Bibliography 88

Chapter 4. Document and Network 91
Sophie PÈNE

4.1. Introduction 91
4.2. Critique of ICS as an interdiscipline 92
4.2.1. Unity of object, diversity of means 93
4.2.2. The media as meta-media 95
4.3. ICS and ICT: an exceptional encounter 97
4.3.1. The technique stolen by ICST 97
4.3.2. Towards the reorganization of technique through its social organization 99
4.3.3. Social science of digital networks 100
4.4. The stakeholder network, visited by digital technology 102
4.4.1. Aphids on humans 103
4.4.2. A mutation masked by the psychologization of networks 104
4.4.3. Documentarization of human objects 105
4.5. Dating, metaphor of indexation 107
4.5.1. Seduction – the face of transition between dating and connection 108
4.5.2. Dating spaces are not sociological objects 109
4.5.3. Towards the removal of profiles 111
4.5.4. The social network as ready made 112
4.6. Conclusion 114
4.7. Bibliography 115

Chapter 5. Information Culture 119
Alexandre SERRES

5.1. Introduction? 119
5.2. What is information culture? 120
5.2.1. The terminological debate on information literacy in France 120
5.2.2. Three origins and three complementary approaches 122
5.3. Is information culture truly an emergent thematic? 126
5.3.1. Interest in bibliometric observations 127
5.3.2. An abundance of research work 132

5.4. Is it truly a (research) "problematic"? 134
5.5. One or more problematics? 135
5.5.1. The question of epistemological and scientific foundations 136
5.5.2. The axiological dimension 137
5.5.3. Content, borders, stakeholders, pedagogy 139
5.6. And ICS? 140
5.7. Bibliography 141

Chapter 6. Relevance in Information Science Different Models, one Theory? 145
Brigitte SIMONNOT

6.1. Introduction. 145
6.2. The nature of relevance 147
6.2.1. Topicality 147
6.2.2. The dynamic nature of relevance. 148
6.2.3. The situational nature of relevance 149
6.3. Multidimensional models of relevance. 150
6.3.1. Saracevic's stratified model of interaction (1996). 150
6.3.2. The model revisited by Cosijn and Ingwersen 152
6.3.3. Mizzaro's model (1998) 153
6.3.4. The five dimensions of Wang and Soergel's cognitive model. . . . 156
6.3.5. Summary 158
6.4. Criteria affecting relevance judgments. 158
6.5. Communication and relevance 160
6.5.1. Impact of Sperber and Wilson's theory 160
6.5.2. Emergent modeling. 162
6.6. Conclusion 163
6.7. Bibliography 164

Chapter 7. Electronic Information Access Devices: Crossed Approaches and New Boundaries 167
Stéphane CHAUDIRON and Madjid IHADJADENE

7.1. Introduction. 167
7.2. Conceptual clarifications 168
7.2.1. Information access devices: a composite object 168
7.2.2. Some terminological questions 172
7.3. Trends in information access studies 177
7.3.1. System-oriented approach 178
7.3.2. Models based on cognitive and psychological approaches. 180
7.3.3. Library and information science models 180
7.3.4. Models from management science 182
7.3.5. Models from marketing 184

7.4. Conclusion 184
7.5. Bibliography 186

Chapter 8. Relevant Information in Economic Intelligence 191
Amos DAVID

8.1. Introduction. 191
8.2. Current approaches of information relevance 192
8.3. Economic intelligence 194
8.4. Relevance indicators in EI 195
8.4.1. Knowledge of the decision-problem. 195
8.4.2. Knowledge of the information problem. 196
8.5. Towards integrated functionalities in IRS 199
8.6. Watching process and EI 200
8.7. Towards collaborative information retrieval 202
8.7.1. Information base of the domain 202
8.7.2. Domain knowledge base. 203
8.7.3. User's experiences 203
8.7.4. Knowledge of decision-problems 204
8.7.5. Knowledge of the information problem. 205
8.7.6. Collaboration diagrams 206
8.8. Conclusion 209
8.9. Bibliography 211

Chapter 9. Representations of Digital Documents in Automatic Text Analysis: a Pluridisciplinary Problem 213
Luc GRIVEL

9.1. Introduction. 213
9.2. Limits of the classic information retrieval scheme: an example in the pharmaceutical sector. 215
9.2.1. The socio-economic dimension and its impact in the process of information retrieval 215
9.2.2. The documentary dimension 216
9.2.3. The cognitive dimension and the space of discourse in the context of an automatic analysis of texts 218
9.3. Themes of reflection 220
9.3.1. Revisiting the documentary space 220
9.3.2. Revisiting methods of contents modeling. 222
9.4. Conclusion 227
9.5. Bibliography 229

Chapter 10. Freedom of Information, Participative Democracy and Local Economy 233
Yves THÉPAUT

10.1. Introduction 233
10.2. Technological mutation and freedom of information 234
10.2.1. Automation and information revolution 234
10.2.2. Potentialities and limits of technological mutation 235
10.2.3. Freedom of information, liberalization and economic globalization. 236
10.3. Freedom of information and participative democracy 237
10.3.1. Globalization, regionalization and need for information 237
10.3.2. Economic information theory and secret information strategies 238
10.3.3. Profitable information and participative democracy. 241
10.4. Freedom of information and local economy 242
10.4.1. Information and freedom of information, factors of prosperity and economic and social development. 242
10.4.2. Local economic and social development 243
10.4.3. Information and freedom of information as global collective goods. 244
10.5. Conclusion 245
10.6. Bibliography 248

Chapter 11. Internet in the Public Library 253
Muriel AMAR, Agnès CAMUS-VIGUÉ, Christophe EVANS, and Françoise GAUDET

11.1. Introduction 253
11.2. A still inadequate national supply 254
11.3. The Bpi: an observatory of expectations and uses 256
11.3.1. Foreigners and the French 259
11.3.2. Job-seekers 262
11.3.3. Practices in which the Internet interferes 263
11.4. Private in public and vice versa 266
11.4.1. Using the Internet in public 267
11.4.2. A familiar space in the library: finding your Internet 268
11.4.3. Between domestic space and the library: optimizing tasks and time management 270
11.5. Conclusion 272
11.6. Bibliography 273

Chapter 12. Electronic Editing for Mobile Devices: Original Audiovisual Contents on Mobile, Socio-technical and Socio-economic Conditions of their Emergence 277
Bruno HÉNOCQUE

12.1. Introduction 277
12.2. On the capacity of the channel and the quality of reception. 280
12.2.1. Channel capacity and quantity of information transmitted 280
12.2.2. Screen ergonomics 283
12.3. Emergence of an original production for PMT 285
12.3.1. Index Multimedia, first European publisher of original content 285
12.3.2. The modes of cooperation between publishers, operators and subscribers. 288
12.4. From multi-support content to original content 290
12.4.1. Multi-support content. 290
12.4.2. Unpublished formats between clips and short films 291
12.5. Mobile screen culture of young people 292
12.5.1. Screen culture of the Y generation 292
12.5.2. Practices of consultation in a mobile situation 293
12.5.3. Self-produced partners of publishing 294
12.6. Conclusion 295
12.7. Bibliography 296

List of Authors 299
